PREFACE

This is the eighth edition of the National Accounts Digest prepared by the Regional Statistics Sub-programme of the Caribbean Community (CARICOM) Secretariat. This Digest presents data for the period, 2003-2006 and is an update to the last edition which presented information for the period, 2000-2003 and was produced in 2007. During the interval, the Sub-programme continued to update its website with data received from Member States for the years beyond 2003.

The National Accounts Digest aims at providing statistics on the economic conditions and performance of the CARICOM region over a specific period as reflected in the Gross Domestic Product of its Member States. Most of the data presented were submitted by the National Statistical Offices or were extracted from national and/or sub-regional reports. More specifically the report presents:

- Summary tables for CARICOM and Member States presenting data on GDP at constant and current prices, including annual percentage changes and distributions, GNI and per capita GDP and GNI;
- Industry profile of GDP in current and constant prices by Member State;
- Expenditure components of GDP by Member State;
- Selected Economic Aggregates for selected countries.

For the most part, the data in the report are presented in Eastern Caribbean dollars (EC$) and in the national currency of Member States at constant and current prices. However, there are few key selected summary statistics, such as, per capita GDP and the summary of GDP for all Member States, which are also presented in United States dollars (US$).

Similar to previous National Accounts Digests, it was not possible to prepare percentage changes at current prices based on the EC dollar due to uncoordinated changes between prices and exchange rates for some Member States. The conversion of GDP at current prices, from national currencies to a common currency through the use of official exchange rates, is a less than satisfactory solution due to the possibility of wide fluctuations between the national currencies and a common currency such as the EC or US dollar. This conversion renders the comparison of current prices among countries or current and constant prices of the same country meaningless.

The use of the nominal (official) exchange rate to convert GDP of one country to the currency of another assumes that the price structures of both countries are identical and that the goods being traded are also similar. Another approach would be to use Purchasing Power Parity (PPP) which seeks to eliminate the discrepancy that can arise in the interpretation of GDP when using nominal exchange rates conversion. However, the data requirements of detailed price and expenditure data are usually quite enormous and are often not available.

In the case of constant prices, the GDP for those Member States with base years other than 2000, were arithmetically converted to this base year. While this method does not result in any changes of the growth rates in national currency, it is however, not the ideal approach and is, at best, an approximation. The ideal situation would be to rebase the GDP using deflators/ extrapolators that are available at the national statistical offices. However, in a situation in which there has
traditionally been a lack of harmonisation in the choice of base years throughout the Region, it is necessary to perform this arithmetic rebasing of the constant price data as was done in this report to achieve some semblance of comparability.

The national accounts data presented in this report use the data available from the national statistical offices as an authoritative source of information. In specific cases, countries will flag preliminary or crude estimates usually for the latest available years. In other instances, the identification of excessively high changes in variables, irregular fluctuations, lack of agreement of identical country totals (GDP by expenditure and industry), valuation problems and other similar irregularities are noted in the course of the evaluation and analysis of the data at the CARICOM level. In some cases, however, there are no ready short-term solutions to ascertain whether the outlying values are anomalies or not. Further analysis and use of the data will undoubtedly highlight more questions that need to be addressed.

The data series in this report does not extend beyond 2006 because of the availability of final estimates after a three year lag. During this time, the survey data of establishments, which are used as the main foundation for compiling the industry estimates, are being collected and processed, i.e. the financial accounts are available in successive years. To offset this lag, it is necessary, perhaps, to establish throughout the Region procedures to compile quarterly GDP estimates to enable the availability of information on the short-term movements in GDP that can guide policy makers.

There is an increasing demand for data that can monitor, analyse and evaluate the economies of the Region, information that is relevant, timely and readily available not only to policy and decision makers, but to anyone wishing to conduct economic analyses or research as well as information that lay persons can understand and relate to. The 1993 System of National Accounts provides the framework within which these data can be collected and compiled in order to observe and analyse the interactions taking place between the different sectors of the economy. The United Nations Statistical Commission at its fortieth session approved the 2008 System of National Accounts. However, for countries of the CARICOM Region there is need to focus on the 1993 SNA implementation and to take the practical steps to move to 2008 SNA. The issue of data comparability, timeliness and reliability will have to be considered if the information is to be relevant and of an acceptable quality. In this vein, the CARICOM Secretariat welcomes any suggestions from users and producers that will guide us in improving the national accounting framework as reflected in this report.
ACKNOWLEDGEMENTS

The CARICOM Secretariat thanks the National Statistics Offices of Antigua and Barbuda, The Bahamas, Barbados, Belize, Dominica, Grenada, Guyana, Jamaica, Montserrat, St Kitts and Nevis, Saint Lucia, St Vincent and the Grenadines, Suriname and Trinidad and Tobago for supplying the data for the compilation of this report.

Special thanks to the staff of the Regional Statistics Sub-Programme for producing this report.
# ACRONYMS AND ABBREVIATIONS

**General**
- c.i.f: cost, insurance and freight
- FISIM: Financial Intermediation Services Indirectly Measured
- f.o.b: free on board
- GDP: Gross Domestic Product
- GNI: Gross National Income
- NNDI: Net National Disposal Income
- NNI: Net National Income
- SNA: System of National Accounts
- SUT: Supply and Use Table
- VAT: Value Added Tax

**Groupings/Organisations**
- CARICOM: Caribbean Community
- LDCs: Less Developed Countries
- MDCs: More Developed Countries
- OECS: Organisation of Eastern Caribbean States
- ECCB: Eastern Caribbean Central Bank

**Currency**
- $BH: The Bahamas Dollar
- $BD: Barbados Dollar
- $BZ: Belize Dollar
- $EC: Eastern Caribbean Dollar
- $G: Guyana Dollar
- $JM: Jamaica Dollar
- SF: Suriname Guilder
- $TT: Trinidad and Tobago Dollar
- $US: United States Dollar

**Country Abbreviations**
- AG: Antigua and Barbuda
- BS: The Bahamas
- BB: Barbados
- BZ: Belize
- DM: Dominica
- GD: Grenada
- GY: Guyana
- JM: Jamaica
- MS: Montserrat
- KN: St Kitts and Nevis
- LC: Saint Lucia
- VC: St Vincent and the Grenadines
- SR: Suriname
- TT: Trinidad and Tobago
GENERAL NOTES

1. The term MDC, as stated in Article 4 of the Revised Treaty of Chaguaramas Establishing the Caribbean Community including the CARICOM Single Market and Economy (Revised Treaty), refers to More Developed Countries namely Barbados, Guyana, Jamaica, Suriname and Trinidad and Tobago. The other Member States were designated as Less Developed Countries (LDC) according to the Revised Treaty.

2. Gross Domestic Product (GDP) at constant prices for Belize and Trinidad and Tobago is calculated at base year 2000. For the other Member States, GDP at constant prices is at varying base years ranging from 1974 in the case of Barbados, to 1988 for Guyana, to 1990 for the OECS countries and Suriname, to 2003 for Jamaica, to 2006 for the Bahamas. In an effort to arrive at comparable data, except for Belize and Trinidad and Tobago, the real GDP of all the other Member States have been recalculated from their respective base years to a 2000 base year.

3. Comparability of GDP data is also affected by the type of valuation used by Member States when compiling their estimates. The OECS countries reported GDP by Industry in Basic Prices whereas The Bahamas, Barbados and Guyana prepared the estimates at Factor Cost. Jamaica’s GDP by Industry is in Producer’s Prices while it was not stated which valuation Trinidad and Tobago used.

4. The term ‘billion’ signifies 1000 million.

The table represents the exchange rates between the Eastern Caribbean Dollars (SEC) and the national currencies of the respective countries for the years 2003 to 2006. The table is structured with the country name, national currency, and the exchange rates for each year. The exchange rates are shown in decimals, indicating the number of national currency units per one SEC.

CONCEPTS AND DEFINITIONS

1. GROSS DOMESTIC PRODUCT:

A key aggregate of the system of National Accounts is the Gross Domestic Product. The Gross Domestic Product (GDP) of an economy is the total value of all goods and services produced by all institutional units resident in the economy within a given time period, usually one year. It includes the allowance made for the consumption of fixed capital.

Gross value added is a measure of GDP in which a principal consideration is that duplications must be avoided which is achieved by deducting from the output of each producing unit the value of the inputs of goods and services received from other units, at home or abroad, i.e. GDP can be derived as the sum of the value added of resident institutional units in an economy. This measure of GDP is also identical with the sum of the final expenditures on consumption, on gross capital formation and adjusted for exports less imports of goods and services. GDP is also equal to the sum of the incomes accruing from production which includes compensation of employees, consumption of operating surplus and fixed capital.

2. GROSS NATIONAL INCOME/PRODUCT (GNI/GNP):

Gross National Income (GNI) is equal to GDP less primary incomes payable to non-resident units plus primary incomes receivable from non-resident units. In the 1993 System of National Accounts (SNA), GNI is synonymous with the GNP of the 1958 SNA, however, conceptually GNI is not a concept of value added, but more one of income. GNI (GNP) is the aggregate value of the gross balances of primary incomes for all industries. The primary income components are taxes (less subsidies) on production and imports, compensation of employees and property income in all cases payable/receivable to/from the rest of the world.

3. THE GROSS OUTPUT OF INDUSTRIES:

Gross output is the value of goods and services produced within an accounting period adjusted for changes in stocks of finished goods and work-in-progress. Output consists of goods and services that are produced within an establishment that are disposed of in one of the following ways:

(a) Market output which includes the total value of all goods and services sold on the market, bartered, used for payments in kind, supplied by one establishment to another belonging to the same market enterprise and the total value of changes in inventories of finished goods and work-in-progress intended for all these uses mentioned herein.

(b) Output for own final use which includes goods and services that are retained for their own final use by the owners of the establishments within which they are produced, the total value of fixed assets produced by an establishment that are retained within the same enterprise for use in future production and the total value of changes in inventories of finished goods and work in progress intended for one of the uses contained herein.

(c) Other non-market output includes goods and services that are provided free or at prices that are not economically significant. Common examples are the goods and services produced by government units or by non-profit units serving households (NPISHs) such as education and health services.
4. INTERMEDIATE CONSUMPTION:

Intermediate consumption consists of the value of non-durable goods and services consumed as inputs by a process of production. The value of all goods and services that are used as inputs into ancillary activities such as accounting, marketing etc. are included as intermediate consumption. The consumption of fixed assets is excluded from intermediate consumption as well as purchases of valuables (capital account). In addition goods and services that are produced within the same establishment and fed back as inputs into production within the same establishment are not recorded as intermediate consumption.

5. CONSUMPTION OF FIXED CAPITAL:

Consumption of fixed capital is defined as the decline during the accounting period in the current value of the stock of fixed assets owned and used by a producer. This decline in the fixed assets can be due to physical deterioration, normal obsolescence, or accidental damage and excludes the damage caused by acts of war and other such exceptional events. Consumption of fixed assets should be considered a cost of production. The inclusion of this item in value added gives rise to the *gross* concept of GDP with the inclusion allowing for a *net* measure of value added and GDP.

6. VALUATION OF GDP

Outputs and inputs can be valued in the following ways:

*Basic prices*

The basic price is the amount receivable by the producer from the purchaser of a unit of a good or service produced as output minus any tax payable and plus any subsidy receivable on that unit, as a consequence of its production or sale. It excludes any transport charges invoiced separately by the producer.

*Producers’ prices*

The producers’ price is the amount receivable by the producer from the purchaser for a unit of a good or service produced as output minus any value added (VAT) or similar deductible tax, invoiced to the purchaser. It excludes any transport charges invoiced separately by the producer.

*Purchasers’ price*

The purchasers’ price is the amount paid by the purchaser, excluding any deductible VAT or similar deductible tax, in order to take delivery of a unit of a good or service at the time and place required by the purchaser. It includes any transport charges paid separately to take delivery at the required time and place.

The above valuation concepts are in-keeping with the recommendations of the 1993 SNA. Output can be measured either at basic or producers’ prices. Intermediate inputs should be valued at purchasers’ prices.

Commonly used valuation concepts in the CARICOM Region are at market prices and factor costs. Valuation of GDP at *factor costs* excludes all taxes on products and is therefore obtained by deducting taxes (less subsidies) on production from market prices. Essentially, gross value added at factor cost is a measure of income since it represents the amount left over from gross value added for distribution after the payment of all taxes and receipt of all subsidies. This concept of factor cost perhaps approaches that of Basic prices given earlier.

GDP at *Market Prices* is equal to GDP at factor cost plus taxes less subsidies on production and imports.

7. TAXES ON PRODUCTION AND IMPORTS
Taxes are compulsory unrequited payments in cash or in kind made by institutional units to government units. Taxes on production and imports consist of:

- taxes on products payable on goods and services when they are produced, sold and otherwise disposed of by their producers;
- other taxes on production comprising taxes on ownership/use of land, buildings or other assets used in production or on the labour employed or on the compensations paid to employees.

These taxes are recorded as being payable out of the gross value added. The term indirect tax which was formally used is no longer commonly used in the 1993 SNA. Indirect taxes which correspond to the taxes on production and income are compulsory payments to Government which industries treat as part of the cost of production. They include import and export duties, excise, sales, entertainment and turnover taxes, real estate and land taxes, levies on value added and the employment of labour (but not social security contributions), motor vehicles, driving tests, licenses, airport and passport fees when paid by producers.

8. **SUBSIDIES**

Subsidies are current unrequited payments that government units, including non-resident government units, make to enterprises on the basis of the levels of their production activities or values of the goods and services they produce, sell or import. They are receivable by resident producers or importers and may be designed to influence the levels of production, the prices at which outputs are sold or the remuneration of the institutional units engaged in production. Subsidies are not payable to final consumers. Current transfers that government make to households are treated as social benefits. In effect, subsidies are treated as negative taxes on production.

9. **FINANCIAL INTERMEDIATION SERVICES INDIRECTLY MEASURED - IMPUTED SERVICE CHARGES**

The imputed service charge, referred to as Financial Intermediation Services Indirectly Measured (FISIM) in the 1993 SNA, is an adjustment that is required to GDP to take into consideration the estimation of the output of some financial intermediaries that do not charge explicitly for all services provided. These services include the borrowing and lending of funds from/to different categories of borrowers and lenders while paying/charging different rates of interest. The net receipt of interest defrays the costs of providing these services (that are not individually charged) and also provides operating surplus for the intermediaries. This total value of FISIM is the net property income received by these intermediaries and should in principle be allocated as intermediates among the users of these services. Due to the difficulty in allocating FISIM, in practice, it is normally recorded as intermediate consumption of a nominal industry and deducted from GDP (Imputed Service Charge).

10. **SELECTED EQUATIONS IN THE SYSTEM OF NATIONAL ACCOUNTS**

(1) Gross Domestic Product (GDP) at market prices
    = Output plus Taxes, less Subsidies, on products – Intermediate Consumption

(2) Gross Domestic Product (GDP) at Market Prices
    = Final Consumption Expenditure plus Changes in Inventories plus Gross fixed capital formation plus Acquisition less Disposal of valuables plus Exports of Goods and Services less Imports of Goods and Services

(3) Gross National Income (GNI which is equivalent to GNP) = GDP at Market Prices plus Taxes, less Subsidies, on Production and Imports (net receivable abroad) plus
compensation of employees (net, receivable abroad) plus Property Income (net receivable abroad)

(4) Net National Income (NNI or equivalent to NNP) at Market Prices
   = GNI at Market Prices less consumption of fixed capital

(5) Net National Disposable Income (NNDI) = NNI at Market Prices plus Current Taxes on income, wealth etc. (net receivable from abroad) plus social contributions and benefits and other Current Transfers (net, receivable from abroad)

(6) Net National Disposable Income (NNDI) = Final Consumption Expenditure plus Adjustment for the change of net equity of households on Pension funds (net receivable from abroad) plus Saving, net.

11. NATIONAL ACCOUNTS AT CONSTANT PRICES:

For analytical purposes, the National Accounts at Constant Prices are derived by breaking current values down into a price component and a quantity component. For the purposes of deriving constant price estimates of GDP, a base year is selected which is deemed to be a normal year. Estimates at Constant Prices are usually derived by deflating the current year’s values by price indices or by extrapolating the base year values by appropriate volume indices. Both methods are equivalent to expressing current period quantities at base period prices.

12. COMPILATION PRACTICES

The main practices used to compile National Accounts are the Production, Income, Expenditure and the Commodity Flow approaches. The conceptual bases of these approaches are as follows:

- The production approach uses establishments as the basic reporting units and groups them into production activities. The sources of data are normally surveys or censuses of establishments, agriculture and similar sources, business accounts of enterprises and administrative records. Total output and intermediates are compiled from which the value added is estimated. Estimates are adjusted for the output of financial intermediation. The production data are also to be reorganised by institutional sectors.

- In the expenditure approach elements of expenditure as illustrated in the equations highlighted earlier are estimated. Imports and exports, usually measured freight on board (f.o.b.), are estimated from the data on foreign trade and balance of payments statistics. Data on government’s final expenditure are obtained from the records of government’s revenue and expenditure. Gross capital formation comprises gross fixed capital formation, changes in inventories and acquisitions less disposals of valuables. The sources of data for gross capital formation are surveys and administrative records.

- The income approach derives independent estimates of compensation of employees, operating surplus, gross fixed income, and taxes less subsidies on production. Sources of data are similar to the expenditure aggregates.

- The commodity flow approach incorporates the three approaches described above and uses as a basis the Supply and Use Tables (SUT). The supply table, which shows the value of different products that are produced by each industry as well as imports, and the use table, shows the use of every product in the economy including exports. The basic principle is that the supply of
every product must be equal to the use of that product at the level of the economy. The method therefore entails the compilation of product or commodity flows. Sources of data are derived from those of the other approaches.

13. GOVERNMENT’S FINAL CONSUMPTION EXPENDITURE

This is defined as expenditure including imputed expenditure, incurred by general government on both individual consumption of goods and services as well as on collective consumption (e.g. community services such as security). Government’s expenditure is largely financed out of taxation and other government’s revenues. Government’s final consumption expenditure may be classified according to its purpose or function such as Education, Health, General Administration and so forth.

14. PRIVATE FINAL CONSUMPTION EXPENDITURE

This component of GDP is defined as the outlays of households on new durable and non-durable goods and services less their net sales of second-hand goods, scraps and waste. Purchases of dwellings are treated as gross fixed capital formation of the real estate industry. The imputed rent of owner-occupied dwellings is a part of the gross output of the real estate industry and is also included in the final consumption expenditure of households.

15. GROSS CAPITAL FORMATION:

Gross capital formation consists of gross fixed capital formation, changes in inventories and acquisitions less disposals of valuables. Gross fixed capital formation in turn, consists of acquisitions of fixed assets less disposals plus certain additions to the values of non-produced assets. Fixed assets are produced assets that can be used repeatedly or continuously over a period of time of one year or more. The acquisitions of new assets also include major improvements and renovations to fixed assets that increase significantly their productive capacity. Non-produced assets consist of assets that are needed for production but have not themselves been produced, e.g. land and mineral deposits.

Changes in inventories are the market value at the owning establishment of the physical change during an accounting period in stocks of materials, supplies, work-in-progress except on construction projects, finished products, livestock raised for slaughter, merchandise of strategic materials held by resident industries in stock and emergency stocks of important products held by Government services. In practice, the closest feasible approximation may be the difference between the levels of these stocks at the beginning and the end of the period, both valued at approximate average prices ruling over the period.

Valuables are assets that are not used for production or consumption and are therefore held primarily as a store of value.

16. EXPORTS AND IMPORTS OF GOODS AND NON-FACTOR SERVICES

Exports and imports of goods and services consist of the transactions in goods and services of the residents of a given country with the rest of the world, and covers merchandise, transportation, travel, insurance and other non-factor services, such as various fees, rentals, royalties, gifts in kind, etc. Military equipment transferred between governments may, however, go unrecorded. Expenditure abroad by residents such as tourists and other persons, seasonal workers, and diplomatic and military personnel stationed abroad are treated as imports. Similarly, expenditures in the domestic territory by non-residents are considered exports.
The valuation of exports and imports are free on board (f.o.b.) which is the price at the frontier of the exporter after it has been loaded onto the carrier and also after payment of export taxes less receipt of any rebates. In practice, some countries in the region record imports according to the convention of cost, insurance, freight (c.i.f.) which is the valuation at the frontier of the importing country inclusive of the cost of transportation and insurance.

NATIONAL ACCOUNTS HIGHLIGHTS: 2003-2006

1 CARICOM OVERVIEW

GDP in Constant 2000 Prices

CARICOM’s real Gross Domestic Product (GDP) increased by 7.3 percent in 2006, the highest annual increase for the period under review. For 2005, real GDP growth rate was 3.6 percent. In Constant 2000 Prices, CARICOM’s total GDP increased from EC$82.8 Bn (US$30.7 Bn) in 2003 to EC$95.9 Bn (US$35.5 Bn) in 2006 at an average annual growth rate of 5.0 percent for the period (Tables 1.1 and 1.1A).

The MDCs were the major contributors to CARICOM’s total GDP in Constant 2000 Prices. For 2003, total GDP of the MDCs increased from EC$60.5 Bn (US$22.4 Bn) in 2003 to EC$71.2 Bn (US$26.4 Bn) in 2006 at an average annual growth rate of 5.6 percent for the period. For 2006, the MDCs reflected a growth of 8.2 percent over the 2005 value. As a percentage of CARICOM’s total GDP, the MDCs represented 73.1 percent in 2003 and 74.3 percent in 2006 (Tables 1.1, 1.1A and 1.1B).

For the LDCs, total GDP in Constant 2000 Prices increased from EC$8.9 Bn (US$3.3 Bn) in 2003 to EC$10.2 Bn (US$3.8 Bn) in 2006 which represented 10.7 percent of CARICOM’s total GDP in 2003 and 10.6 percent in 2006.

With respect to the contribution of individual Member States to the Region’s total GDP at Constant 2000 prices, the top contributors were Trinidad and Tobago and Jamaica. Total GDP for Trinidad and Tobago increased from EC$28.4 Bn (US$10.5 Bn) in 2003 to EC$36.7 Bn (US$13.6 Bn) in 2006. The percentage contribution of this Member State to CARICOM’s total GDP increased from 34.3 percent in 2003 to 38.2 percent in 2006. Jamaica’s total GDP also expanded from EC$22.5 Bn (US$8.3 Bn) in 2003 to EC$23.6 Bn (US$8.7 Bn) in 2006 representing 27.1 percent of total GDP in 2003 and 24.6 percent in 2006. Collectively these two Member States accounted for more than 61 percent of CARICOM’s total GDP throughout the period (Tables 1.1, 1.1B).

GDP in Current Prices

In Current Market Prices, CARICOM’s total GDP stood at EC$94.9 Bn (US$35.2 Bn) in 2003 and EC$133.1 Bn (US$49.3 Bn) in 2006 (Tables 1.3 and 1.4).

Per Capita GDP in Constant 2000 Prices

Table 1.6 shows that for the period, CARICOM’s Per Capita GDP in Constant 2000 Prices expanded from EC$12,585.5 (US$4,661.3) in 2003 to EC$14,273.5 (US$5,286.5) in 2006. The Bahamas, Trinidad and Tobago, Antigua and Barbuda and Barbados reflected the highest Per Capita GDP for the period under review. Per Capita GDP for The Bahamas increased from EC$42,432.1 (US$15,715.6) in 2003 to EC$43,972.6
(US$16,286.1) in 2006. Trinidad and Tobago’s Per Capita GDP increased from EC$22,172.1 (US$8,211.9) in 2003 to EC$28,242.8 (US$10,460.3) in 2006 while Per Capita GDP for Antigua and Barbuda expanded from EC$21,071.4 (US$7,804.2) in 2003 to EC$24,858.3 (US$9,206.8) in 2006. Barbados’ Per Capita GDP moved from EC$21,011.2 (US$7,781.9) in 2003 to EC$23,594.0 (US$8,738.5) in 2006.

**Per Capita GDP in Current Market Prices**

CARICOM’s Per Capita GDP in Current Market Prices increased from EC$14,429.7 (US$5,344.3) in 2003 to EC$19,812.2 (US$7,337.8) in 2006. For 2006, the Member States with the highest Per Capita GDP in Current Prices were The Bahamas, Trinidad and Tobago, Antigua and Barbuda and Barbados (Tables 1.8 and 1.9).

**GNI in Market Prices**

The Region’s Gross National Income (GNI) in Market Prices expanded from EC$89.7 Bn (US$33.2 Bn) in 2003 to EC$115.7 Bn (US$42.8 Bn) in 2006. For 2006, Trinidad and Tobago reflected the highest GNI, approximately EC$50 Bn (US$18.5 Bn). Jamaica and The Bahamas followed with GNI of EC$30.7 Bn (US$11.4 Bn) and EC$18.2 Mn (US$6.8 Bn) respectively (Tables 1.10 and 1.11).

**Per Capita GNI in Market Prices**

Between 2003 and 2006, Table 1.12 shows CARICOM’s Per Capita GNI in Current Market Prices moving from EC$228,905 (US$84,779.6) in 2003 to EC$248,422.1 (US$92,008.2) in 2006. The Bahamas reflected the highest Per Capita GNI, EC$55,315.4 (US$20,487.2) in 2006. Trinidad and Tobago and Antigua and Barbuda followed with Per Capita GNI of EC$38,495.3 (US$14,257.5) and EC$30,074.9 (US$11,138.9) respectively.

## 2 COUNTRY HIGHLIGHTS– INDUSTRY AND EXPENDITURE COMPONENTS

### 2.1 The Bahamas

**GDP in Constant 2000 and 2006 Prices**

In 2006, Real GDP growth rate for The Bahamas reflected the highest value, 4.6 percent, for the period under review. For 2005, real GDP growth rate stood at 3.3 percent. In Constant 2006 Market Prices, real GDP increased from BHS$6.4 Bn in 2003 to BHS$6.9 Bn in 2006. In Constant 2000 Market Prices, real GDP was EC$13.4 Bn (US$5.0 Mn) in 2003 and EC$14.5 Bn (US$5.4 Mn) in 2006. Overall, the average annual growth rate of this Member State’s GDP stood at 2.6 percent (Tables 3.1, 3.1A and 3.2).

Throughout the period, the significant sector contributors to real GDP were Real Estate, Rent and Business; Wholesale and Retail Trade and Financial Intermediation. For 2006,
the percentage contribution of Real Estate, Rent and Business to total GDP was 17.6 percent compared to 17.0 percent in 2005. The contribution of Financial Intermediation to total GDP was 11.5 percent in 2006 and 11.3 percent in 2005. Wholesale and Retail Sale accounted for 12.2 percent of total GDP in 2006 compared to 12.0 percent in 2005 (Table 3.2A).

For the major industries in 2006, the growth of Real Estate, Rent and Business expanded by 3.1 percent, Financial Intermediation increased by 1.6 percent and Wholesale and Retail Trade rose by 1.3 percent over the respective 2005 values. For 2006, Construction, showed the highest growth rate, 20.4 percent. Hotels and Restaurants reflected a growth rate of 5.1 percent (Table 3.1A).

GDP in Current Prices

For 2006, Real Estate, Rent and Business which accounted for 16.7 percent of total Current Prices GDP was the top industry for this Member State. Wholesale and Retail Trade and Financial Intermediation followed with percentage contributions of 11.6 percent and 10.9 percent respectively. Construction represented 10.7 percent of total GDP in Current Prices in 2006 (Tables 3.3 and 3.4A).

Expenditure on GDP in Current Prices

Table 3.5A shows that Total Consumption expenditure, which comprised of Private Final Consumption and General Government, represented 83.7 percent of total GDP in 2006 compared to 74.6 percent in 2003 of which Private Final Consumption accounted for 70.0 percent in 2006 and 61.4 percent in 2003.

Gross Capital Formation represented 29.3 percent and 39.3 percent of total GDP in 2003 and 2006 respectively.

The net of Goods and Non-Factor Services was negative throughout the period. This expenditure group represented 3.9 percent of total GDP in 2003 and 23.1 percent in 2006. Exports of Goods and Non-Factor Services accounted for 43.7 percent in 2006 while imports of Goods and Non-Factor Services represented 66.8 percent of total GDP (Tables 3.5 and 3.5A).

2.2 MDCs

2.2.1 Barbados

GDP in Constant 1974 and 2000 Prices

Table 4.1A shows that for 2005 and 2006, real GDP expanded by 4.1 percent and 3.9 percent respectively. Real GDP at Constant 1974 Prices increased from BDS976.7 Mn in 2003 to BDS1106.4 Mn in 2006. In Constant 2000 Prices, real GDP expanded from
EC$5.7 Bn (US$2.1 Bn) in 2003 to EC$6.5 Bn (US$2.4 Bn) in 2006. Overall, the average annual growth rate for the period under review stood at 4.2 percent.

Throughout the period, 2003-2006, the most significant industries of this Member State were Wholesale and Retail Trade; Business and General Services; Tourism and Government Services. Wholesale and Retail trade accounted for approximately 20.0 percent of total GDP throughout the period while Business and General Services accounted for 17.2 percent of total GDP annually for the period, 2003-2005 and 17.5 percent in 2006. The percentage contribution of Tourism moved from 15.7 percent in 2003 to 15.1 percent in 2006 while Government Services accounted for approximately 14 percent of total GDP annually throughout the period (Table 4.2A).

For 2006, except for Agriculture and Mining and Quarrying, all industries reflected positive growth rates. The growth rates of Agriculture and Mining and Quarrying stood at -5.7 percent and -3.0 percent respectively. Electricity, Gas and Water which expanded by 9.8 percent reflected the highest growth rate in 2006. This was followed by Construction with a growth rate of 6.9 percent. With respect to the growth rate of the top industries, Wholesale and Retail Trade and Business and General Services each increased by 5.3 percent in 2006 while Government Services and Tourism reflected growth rates of 3.0 percent and 1.6 percent respectively in 2006 (Table 4.1A).

**GDP in Current Prices**

Throughout the period under review, the dominant industries of Barbados’ Current Prices GDP were Business and General Services; Wholesale and Retail Trade; Government Services; and Tourism. Business and General Services accounted for more than 25 percent of total GDP in Current Prices throughout the period. The percentage contribution of Wholesale and Retail Trade ranged from 17.0 percent to 17.9 percent for the period while the percentage contribution of Government Services decreased from 18.0 percent in 2003 to 16.2 percent in 2006. Tourism represented 11.8 percent of total GDP in 2003 and 11.6 percent in 2006. Collectively these four industries accounted for 72 percent of Barbados’ total GDP in Current Prices in 2006 (Tables 4.3 and 4.4A).

**Expenditure on GDP in Current Prices**

On the expenditure side, Total Consumption expenditure represented 85.6 percent of total GDP in 2003 and 80.2 percent in 2006. Private Final Consumption expenditure, the major component represented 62.4 percent of GDP in 2003 and 58.9 percent in 2006.

Gross Capital Formation expenditure represented 20.7 percent of total GDP in 2003 and 26.6 percent in 2006.

The net of Goods and Non-Factor Services were negative throughout the period. Exports of Goods and Non-factor Services represented 59.8 percent of total GDP in 2006 while imports of Goods and Non-Factor Services represented 66.6 percent (Tables 4.5 and 4.5A).
2.2.2 Guyana

GDP in Constant 1988 and 2000 Prices

Guyana’s real GDP growth rate was 5.1 percent in 2006 compared to -2.0 percent in
2005. GDP in Constant 1988 Prices was approximately G$5.5 Bn in 2003 and G$5.8 Bn
in 2006. At Constant 2000 Prices, GDP of this Member State was approximately EC$1.7
Bn annually for the period, 2003 - 2006. Overall, the average annual growth rate was 1.5
percent for the period under review (Tables 8.1, 8.1A and 8.2).

Agriculture, Forestry and Fishing and Government Services were the two largest
contributors to Guyana’s total GDP throughout the period. Agriculture, Forestry and
Fishing represented 31.6 percent of total GDP in 2006 compared to 31.1 percent in 2005.
For 2003 and 2004, this industry represented 34.8 percent and 35.4 percent respectively
of total GDP. The percentage contribution of Government Services to total GDP was 12.5
percent in 2006, decreasing from 12.9 percent in 2005. For 2003 and 2004, Government
Services accounted for 12.5 percent and 12.4 percent respectively of total GDP. Other
major contributors in 2006 were Transport and Communication which accounted for 12.0
percent compared to 11.5 percent in 2005 and Construction and Engineering which
represented 10.4 percent in 2006 and 9.7 percent in 2005 (Table 8.2 A).

For 2006, except for Mining and Quarrying, which showed a growth rate of -21.7
percent, all industries reflected positive growth rates. For the major industries, Agriculture, Forestry and Fishing showed a growth rate of 6.6 percent in 2006 compared
to a growth rate of -13.7 percent in 2005. Government Services reflected growth rates of
approximately 2.0 percent annually in 2005 and 2006. Construction and Engineering
reflected a growth rate of 12.1 percent in 2006 while Distribution; and Transport and
Communication each reflected growth rate of 10.0 percent (Table 8.1A).

GDP in Current Prices

Throughout the period, Agriculture, Forestry and Fishing was the top industry for GDP
in Current Prices. Between 2003 and 2006, this industry represented more than 30
percent of Guyana’s total GDP for the respective years. Government Services followed
with a percentage contribution of over 18 percent for most of the period. For 2006,
Transport and Communication and Mining and Quarrying were also major industries
accounting for 11.3 percent and 9.7 percent respectively of total GDP in Current Prices.
Collectively, these four industries represented 68.9 percent of Current Prices GDP in
2006 (Tables 8.4 and 8.4A).

Expenditure on GDP in Current Prices

For expenditure on GDP in Current Market Prices, Total Consumption Expenditure
accounted for 76.0 percent in 2003 and 89.3 percent in 2006. Private Final Consumption,
the main contributor to Total Consumption Expenditure accounted for 65.3 percent
of GDP in 2006 compared to 49.7 percent in 2003.
Gross Capital Formation represented 35.0 percent of total GDP in 2003 and 45.2 percent in 2006. The net Goods and Non-Factor Services was negative throughout the period representing 34.7 percent of GDP in 2006 compared to 11.1 percent in 2003 (Tables 8.5 and 8.5A).

### 2.2.3 Jamaica

**GDP in Constant 2000 and 2003 Prices**

Jamaica’s real GDP grew at a rate of 2.7 percent in 2006 compared to a growth rate of 1.0 percent in 2005. Jamaica’s GDP in Constant 2003 Producers’ Prices moved from J$476.7 Bn in 2003 to J$501.6 Bn in 2006. It’s GDP in Constant 2000 Prices moved from ECS22.5 Bn in 2003 to ECS23.6 Bn in 2006. The average annual growth rate of this Member State for the period, 2003-2006 was 1.7 percent (Tables 9.1, 9.1A and 9.2).

Jamaica’s top industry throughout the period under review was Distributive Trade which accounted for approximately 24.0 percent of total GDP. For 2006, other major contributors were Transport, Communication and Storage which represented 12.1 percent of total GDP followed by Producers of Government Services with 11.7 percent and Financial and Insurance Services with 11.0 percent (Table 9.2A).

With respect to the 2006 growth rates of the respective industries, all industries except Manufacturing and Construction and Installation reflected positive growth rates. Manufacturing reflected a growth rate of -2.3 percent while Construction and Installation was -1.9 percent. Agriculture, Forestry and Fishing displayed the highest growth rate in 2006, 16.2 percent. Transport, Communication and Storage and Miscellaneous Services followed with growth rates of 4.4 percent and 4.3 percent respectively. The growth rates of the remaining industries in 2006 ranged from 0.7 percent to 3.8 percent (Table 9.1A).

**GDP in Current Prices**

Distributive Trade; Producers of Government Services and Transport, Communication and Storage were the top contributors to Jamaica’s GDP in Current Purchasers’ Prices with percentage contributions of 21.7 percent, 10.6 percent and 10.2 percent respectively (Table 9.4A).

**Expenditure on GDP in Current Prices**

In Current Purchasers’ Prices, Jamaica’s Final Consumption expenditure represented 88.6 percent in 2003 and 91.5 percent in 2006 of total GDP. Private Final Consumption accounted for 74.9 percent of total GDP in 2003 compared to 77.6 percent in 2006.

Gross Capital Formation represented 26.3 percent of GDP in 2003 and 28.3 percent in 2006.
The net of *Goods and Non-Factor Services* was negative throughout the period. As a percentage of GDP, this component represented *15.0 percent* in 2003 and *19.8 percent* in 2006. For 2006, *Exports of Goods and Non-Factor Services* represented *39.6 percent* of total GDP while *Imports of Goods and Non-Factor Services* represented *59.4 percent* of total GDP (*Tables 9.5 and 9.5A*).

### 2.2.4 Suriname

**GDP in Constant 1990 and 2000 Prices**

For 2006, this Member State exhibited a growth rate of real GDP of *4.7 percent* compared to a rate of *6.5 percent* in 2005. At *Constant 1990 Prices*, Suriname’s GDP increased from SF$3.6 Bn in 2003 to SF$4.3 Bn in 2006. In *Constant 2000 Prices*, this Member State’s GDP were ECS2.3 Bn in 2003 and ECS2.7 Bn in 2006. Overall, the average annual growth rate of real GDP was *6.3 percent* for the period under review (*Tables 14.1, 14.1A and 14.2*).

For the period under review, *Financial and Business Services* and *Trade, Restaurant and Hotels* were the two most significant contributors to Suriname’s GDP. The percentage contributions of *Financial and Business Services* were *19.3 percent* in 2006 and *19.8 percent* in 2005 while for *Trade, Restaurants and Hotels*, the percentage contributions were *19.1 percent* in 2006 and *17.3 percent* in 2005. Other significant contributors in 2006 were *Transport, Storage and Communication, 13.5 percent*, *Manufacturing, 13.5 percent* and *Agriculture, 8.0 percent*. Collectively these five industries represented *73.3 percent* of Suriname’s GDP in 2006 (*Table 14.2A*).

With respect to the growth rates of the respective industries, *Table 14.1A* shows that for 2006, except for *Transport, Storage and Communication*, which reflected a growth rate of *-3.5 percent*, all industries reflected positive annual growth rates. *Trade, Restaurants and Hotels* reflected the highest growth rate in 2006, *15.3 percent*. *Financial and Business Services*: *Agriculture* and *Manufacturing* reflected growth rates of *1.8 percent*, *5.2 percent* and *1.8 percent* respectively.

**GDP in Current Prices**

For 2006, *Manufacturing (23.3 percent)*, *Financial and Business Services (16.0 percent)* and *Trade, Restaurants and Hotels, (13.4 percent)* were Suriname’s top contributors to its GDP in *Current Prices* (*Table 14.4 and 14.4A*).

**Expenditure on GDP in Current Prices**

For the period under review, GDP expenditure data was limited and not available in most cases.
2.2.5 Trinidad and Tobago

GDP in Constant 2000 Prices

Real GDP for Trinidad and Tobago grew by 13.3 percent in 2006 compared to 5.4 percent in 2005. Real GDP at Constant 2000 Prices expanded from ECS28.4 Bn in 2003 to ECS36.7 Bn in 2006 at an average annual growth rate of 8.8 percent over the period (Table 15.1 and 15.1A).

Mining and Quarrying and Manufacturing were the two top contributors to this Member State’s economy. The percentage contribution of Mining and Quarrying to total GDP stood at 22.9 percent in 2003 and 24.6 percent in 2006. Manufacturing accounted for 20.3 percent in 2003 and 23.3 percent in 2006. Together these two industries represented 43.2 percent of total GDP in 2003 and 47.9 percent in 2006. Distribution Services and Financial, Insurance, Real Estate and Business Services were the other two major industries for the period under review. Distribution Services represented 13.4 percent of total GDP in 2006 compared to 13.3 percent in 2005 while Financial, Insurance, Real Estate and Business Services accounted for 12.5 percent in 2006 and 13.9 percent in 2005 (Table 15.2A).

For 2006, all industries displayed positive growth rates, except for Agriculture, Fishing and Forestry; Electricity and Water; Hotels, Guesthouses and Restaurants; and General Government which reflected growth rates of -19.2 percent; -0.4 percent; -2.2 percent and -1.5 percent respectively. Mining and Quarrying exhibited a growth rate of 17.2 percent in 2006 compared to 9.1 percent in 2005. Manufacturing reflected the highest growth rate in 2006, 25.2 percent compared to 9.1 percent in 2005. Distribution Services grew by 14.7 percent in 2006 from 4.9 percent in 2005 while Financial, Insurance, Real Estate and Business Services expanded by 1.6 percent in 2006 as opposed to a rate of -2.4 percent in 2005 (Table 15.1A).

GDP in Current Prices

In Current Market Prices, Trinidad and Tobago’s top industries were Mining and Quarrying and Manufacturing. For 2006, Mining and Quarrying accounted for 30.1 percent of total GDP compared to 23.1 percent in 2003 while Manufacturing accounted to 21.4 percent in 2006 compared to 18.1 percent in 2003. Other top industries in 2006 were Distribution Services (14.3 percent) and Financial, Insurance, Real Estate and Business Services (11.3 percent) (Tables 15.4 and 15.4A).

Expenditure on GDP in Current Prices

Regarding expenditure on GDP in Current Market Prices, Trinidad and Tobago’s Total Final Consumption expenditure accounted for 60.7 percent of total GDP in 2003 and 47.9 percent in 2006 of which, Private Final Consumption represented 48.0 percent of total GDP in 2003 and 37.1 percent in 2006.
The percentage contributions of *Gross Capital Formation* to total GDP were **25.2 percent** in 2003 and **12.7 percent** in 2006.

The net of *Goods and Non-factor Services* was positive throughout the period under review. As a percentage of total GDP, this category represented **14.1 percent** in 2003 and **39.4 percent** in 2006. *Exports of Goods and Non-Factor Services* in 2006 represented **75.9 percent** of GDP compared to *imports of this category* which reflected **36.5 percent** (Tables 15.5 and 15.5A).

### 2.3 LDCs

#### 2.3.1 Belize

**GDP in Constant 2000 Prices**

Belize’s growth rate of real GDP was **4.9 percent** in 2006 compared to **3.9 percent** in 2005. GDP in *Constant 2000 Prices* rose from ECS2.3 Bn (US$0.9 Bn) in 2003 to ECS2.7 Bn (US$1.0 Bn) in 2006 at an average annual growth rate of **4.7 percent** for the period (Tables 5.1 and 5.1A).

**Table 5.2A** shows that for 2006, *Trade, Hotels and Restaurants; Manufacturing; Agriculture; and Transport and Communications* were the four major industries contributing to Belize’s GDP at *Constant 2000 Prices*. *Trade, Hotels and Restaurants*, which was the top industry throughout the period under review, accounted for **21.4 percent** total GDP in 2006 and **21.8 percent** in 2005. This was followed by *Manufacturing*, which accounted for **12.3 percent** in 2006 compared to **9.6 percent** in 2005. The percentage contribution of *Agriculture* stood at **12.0 percent** in 2006 and **12.5 percent** in 2005 while *Transport and Communication* represented **11.8 percent** of GDP in 2006 compared to **11.6 percent** in 2005.

Except for *Fishing, Construction and Public Administration*, all industries reflected positive growth rates in 2006. The highest growth rate for 2006, **38.0 percent** was reflected by *Electricity and Water*. For the top industries, in 2006, *Trade, Hotels and Restaurants* grew by **2.7 percent** while *Manufacturing* reflected a growth rate of **35.3 percent**, *Agriculture*, **0.9 percent** and *Transport and Communication*, **6.0 percent*. *Fishing; Construction and Public Administration* showed growth rates of **-15.8 percent**, **-6.5 percent** and **-4.6 percent** respectively in 2006 (Table 5.1A).

**GDP in Current Prices**

For 2006, in *Current Prices*, the leading industries of this Member State were *Trade, Hotels and Restaurants* (22.0 percent); *Manufacturing* (12.3 percent) and *Transport and Communication* (12.1 percent). Collectively these three industries represented **46.4 percent** of Belize’s total GDP (Table 5.4).
Expenditure on GDP in Current Prices

On the expenditure side, Total Consumption Expenditure accounted for 92.1 percent of total GDP in 2003 and 78.8 percent in 2006, of which, Private Final Consumption accounted for 77.4 percent of GDP in 2003 and 65.2 percent in 2006.

Gross Capital Formation represented 20.5 percent of GDP in 2003 and 19.3 percent in 2006, of which Gross Fixed Capital Formation, the major contributor to this group represented 19.0 percent of GDP annually in 2003 and 2006.

Except for 2006, the net of Goods and Non-Factor Services was negative throughout the period. Exports of Goods and Services represented 63.5 percent of total GDP in 2006 while imports of Goods and Services represented 61.9 percent (Tables 5.5 and 5.5A).

2.3.2 OECS

Antigua and Barbuda

GDP in Constant 1990 and 2000 Prices

Table 2.1A shows that for 2006, real GDP growth rate for Antigua and Barbuda increased to 12.4 percent from a rate of 5.5 percent in 2005. Real GDP in Constant 1990 Prices moved from EC$1.4 Bn (US$0.5 Bn) in 2003 to EC$1.7 Bn (US$0.6 Bn) in 2006. In Constant 2000 Prices, real GDP increased from EC$1.7 Bn (US$0.6 Bn) in 2003 to EC$2.1 Bn (US$0.8 Bn) in 2006 at an average annual growth rate of 7.6 percent for the period.

The top industries for this Member State in 2006 were Construction which accounted for 18.9 percent total GDP in Constant 1990 Prices. The industries that followed were Government Services (15.3 percent); Transport (11.5 percent); Bank and Insurance (10.6 percent) and Hotels and Restaurants (10.6 percent). Collectively these five industries represented 66.9 percent of Antigua and Barbuda’s total GDP in Constant 1990 Prices (Table 2.2A).

For 2006, all the industries reflected positive annual growth rates (Table 2.1A). Mining and Quarrying showed the highest growth rate, 45.0 percent followed by Construction with 35.0 percent. Transport was next with a growth rate of 13.2 percent while the remaining industries reflected growth rates which ranged from 2.9 percent to 10.9 percent.

GDP in Current Prices

In Current Prices, Antigua and Barbuda’s top industries in 2006 were Construction (20.5 percent), Government services (15.8 percent) and Transport (12.5 percent) (Table 2.3A).
Expenditure on GDP in Current Prices

On the expenditure side, Table 2.4 shows that for 2003 and 2006, Private Final Consumption accounted for 37.4 percent and 34.2 percent respectively of total GDP in Current Market Prices. For 2003, General Government expenditure accounted for 20.3 percent of total GDP and 17.9 percent in 2006.

For 2006, Gross Capital Formation expenditure represented 74.5 percent of total GDP compared to 51.8 percent in 2003.

The net of Goods and Non-Factor Services was negative throughout the period. As a percentage of total GDP, this expenditure group represented 9.6 percent in 2003 and 26.6 percent in 2006. Exports of Non-Factor Services represented 55.4 percent of total GDP in 2003 compared to 47.6 percent in 2006. Exports of Goods represented minimal percentage contributions to GDP, ranging from 5.9 percent to 9.5 percent between 2003 and 2006. For 2003, imports of Goods accounted for 46.7 percent of total GDP compared to 55.8 percent in 2006 while for imports of Non-Factor Services represented 24.2 percent of total GDP in 2003 and 25.8 percent in 2006.

Dominica

GDP in Constant 1990 and 2000 Prices

The growth rate of real GDP for Dominica stood at 4.0 percent in 2006 compared to 3.3 percent in 2005. For 2006, Dominica’s GDP in Constant 1990 Prices was ECS460.1 Mn (US$170.4 Mn) compared to ECS415.6 Mn (US$153.9 Mn) in 2003. In Constant 2000 Prices, real GDP stood at ECS626.7 Mn (US$232.1 Mn) in 2006 and ECS566.0 Mn (US$209.6 Mn) in 2003. Overall, real GDP in Constant 2000 Prices expanded at an average annual growth rate of 3.5 percent for the period under review (Tables 6.1, 6.1A and 6.2).

Government Services and Agriculture were consistently the two top contributors to GDP at Constant 1990 Prices throughout the period. For 2006, the percentage contribution of Government Services was 19.0 percent compared to 19.4 percent in 2005 while Agriculture accounted for 17.0 percent in 2006 and 17.1 percent in 2005. Other significant contributors were Banks and Insurance which represented 14.6 percent of total GDP in 2006 and 14.3 percent in 2005 and Wholesale and retail trade which accounted for 13.9 percent of total GDP in both 2006 and 2005 (Table 6.2A).

For 2006, other than Manufacturing, all industries reflected positive growth rates over 2005. Hotels and Restaurants reflected the highest growth rate, 15.0 percent while Construction; and Mining and Quarrying followed with growth rates of 8.5 percent and 8.4 percent respectively. For the top 2006 industries, Government Services reflected a growth rate of 1.5 percent over 2005 while Agriculture showed a growth rate of 3.4
percent. Manufacturing, which showed a growth rate of -2.0 percent, was the only industry that declined in 2006 (Table 6.1A).

**GDP in Current Prices**

In Current Prices, Government Services, Agriculture and Wholesale and Retail Trade were consistently Dominica’s top three contributors to GDP throughout the period under review. The percentage contributions of these industries to total GDP were 19.6 percent, 17.6 percent and 13.1 percent respectively in 2006 (Tables 6.3 and 6.3A).

**Expenditure on GDP in Current Prices**

With respect to expenditure on GDP in Current Market Prices, Total Final Consumption expenditure accounted for 89.9 percent of total GDP in 2003 compared to 88.3 percent in 2006 of which, Private Final Consumption expenditure represented 70.8 percent of total GDP and 69.5 percent respectively.

Gross Capital Formation represented 25.0 percent of total GDP in 2003 and 28.9 percent in 2006.

The net of Goods and Non-Factor Services was negative throughout the period. Exports of Non-factor services accounted for 29.4 percent in 2003 compared to 31.6 percent in 2006 while exports of Goods represented 15.5 percent of total GDP in 2003 and 14.0 percent in 2006. On the other side, Goods imports as a percentage of total GDP were 42.8 percent in 2003 and 46.3 percent in 2006 while imports of Non Factor Services accounted for 16.4 percent of total GDP in 2006 compared to 17.0 percent in 2003 (Tables 6.4 and 6.4A).

**Grenada**

**GDP in Constant 1990 and 2000 Prices**

Real GDP growth rate for Grenada was -2.4 percent in 2006 compared to 11.0 percent in 2005. Real GDP at Constant 1990 Prices stood at EC$0.8 Bn (US$0.3 Bn) in the years, 2003 and 2006. At Constant 2000 Prices, real GDP was EC$1.0 Bn (US$0.4 Bn) in both 2003 and 2006. Between 2003 and 2006, GDP at Constant 2000 Prices grew at an average annual growth rate of 0.7 percent (Tables 7.1, 7.1A and 7.2).

For 2006, the industries which contributed the most to Grenada’s GDP at Constant 1990 Prices were Transport which accounted for 13.4 percent of total GDP, Government Services (12.9 percent), Communication (11.9 percent), Other Services (11.8 percent) and Construction (11.4 percent). Together these five industries represented 61.4 percent of this Member State’s GDP at Constant 1990 Prices.
With respect to the growth rate of the of the respective industries, Table 7.1A shows that, for 2006, Hotel and Restaurants recorded the highest growth rate, 50.6 percent followed by Mining and Quarrying, 41.0 percent and Agriculture, 28.1 percent. For the top 2006 industries, Government Services, Communications and Other Services reflected growth rates of 5.5 percent, 6.1 percent and 5.0 percent respectively while Transport and Construction showed rates of -14.0 percent and -30.1 percent respectively.

GDP in Current Prices

Government Services with a percentage contribution of 16.6 percent in 2006 was the largest contributor to Grenada’s GDP in Current Prices. Transport with percentage contribution of 14.3 percent, Construction, 13.9 percent and Other Services, 12.7 percent were the industries that followed. Collectively these four industries represented 57.5 percent of this Member State’s GDP in Current Prices (Tables 7.4 and 7.4A).

Expenditure on GDP in Current Prices

For the period, 2003-2006, Total Consumption Expenditure accounted for 87.9 percent of GDP at Current Market Prices in 2003 and 97.7 percent in 2006. Private Final Consumption represented 73.5 percent of GDP in 2003 and 81.5 percent in 2006.

Gross Capital Formation represented 37.8 percent of GDP in 2006 compared to 38.6 percent in 2003. The net of Goods and Non-Factor services was negative throughout the period. For the period, exports of Goods as a percentage of GDP ranged from 9.5 percent to 5.6 percent while exports of Non-Factor Services accounted for 27.9 percent of total GDP in 2003 and 23.0 percent in 2006. On the other hand, imports of Goods represented 46.6 percent of total GDP in both 2003 and 2006 while imports of Non-Factor services as a percentage of total GDP ranged between 17.2 percent and 19.6 percent (Tables 7.4 and 7.4A).

Montserrat

GDP in Constant 1990 and 2000 Prices

Following a real GDP growth rate of 4.5 percent in 2004, Montserrat’s GDP declined to -3.8 percent in 2006. Montserrat’s GDP at Constant 1990 Prices moved from EC$58.2 Mn (US$21.6 Mn) in 2003 to EC$58.3 Mn (US$21.6 Mn) in 2006. At Constant 2000 Prices, GDP increased from EC$78.9 Mn (US$29.2 Mn) in 2003 to EC$79.0 Mn (US$29.3 Mn) in 2006 (Tables 10.1, 10.1A and 10.2).

Throughout the period, 2003-2006, Government Services, Real Estate and Housing, Banks and Insurance and Construction were the most dominant industries for Montserrat’s GDP at Constant 1990 Prices. The percentage contribution of Government
Services to GDP moved from 32.7 percent in 2005 to 35.5 percent in 2006 while for Real Estate and Housing the percentage contribution moved from 14.0 percent in 2005 to 15.3 percent in 2006. Banks and Insurance accounted for 12.7 percent of GDP in 2005 compared to 12.8 percent in 2006 while the percentage contribution of Construction moved 15.1 percent in 2005 to 10.4 percent in 2006 (Table 10.2A).

For 2006, except for Manufacturing, Construction, Wholesale and Retail Trade, Hotel and Restaurants, Banks and Insurance and Other Services, all industries reflected positive growth rates over 2005. Mining and Quarrying reflected the highest growth rate, 276.5 percent followed by Agriculture with a growth rate of 15.5 percent. Government Services showed a growth rate of 4.5 percent while Banks and Insurance reflected -3.3 percent. The growth rate for Construction was -33.8 percent (Table 10.1A).

**GDP in Current Prices**

The most significant industries to Montserrat’s GDP in Current Prices for 2006 were Government Services (40.7 percent), Real Estate and Housing (13.8 percent), Banks and Insurance (10.2 percent) and Construction (8.8 percent). Collectively these top four industries accounted for 73.5 percent on Montserrat’s GDP in Current Prices (Table 10.3 and 10.3A).

**Expenditure on GDP in Current Prices**

Tables 10.4 and 10.4A show that Montserrat’s Total Consumption Expenditure represented 122.8 percent of total GDP in 2003 and 134.3 percent in 2006. Of this expenditure group, Private Final Consumption Expenditures were 69.6 percent of total GDP in 2003 and 75.7 percent in 2006.

Gross Capital Formation represented 54.4 percent of GDP in 2003 compared to 26.8 percent in 2006.

Between 2003 and 2006, the net of Goods and Non-Factor Services was negative. Exports of Non-Factor Services represented 31.6 percent of total GDP in 2003 and 32.9 percent in 2006 while exports of Goods represented minimal percentage contribution to total GDP, 6.1 percent in 2003 and 3.8 percent in 2006.

On the other hand, imports of Goods represented 66 percent of total GDP in 2003 and 59.2 percent in 2006 while imports of Non Factor Services represented 48.9 percent of total GDP in 2003 and 38.6 percent in 2006.
St. Kitts and Nevis

GDP in Constant 1990 and 2000 Prices

St. Kitts and Nevis’ growth rate of real GDP stood at 4.0 percent in 2006 compared to 4.4 percent in 2005. Its’ GDP at Constant 1990 Prices expanded from EC$555.5 Mn (US$205.7 Mn) in 2003 to EC$647.1 Mn (US$239.7 Mn) in 2006. At Constant 2000 Prices, real GDP rose from EC$766.0 (US$283.7 Mn) in 2003 to EC$892.3 Mn (US$330.5 Mn) in 2006. Overall, the average annual growth rate of GDP in Constant Prices stood at 5.2 percent (Tables 11.1, 11.1A and 11.2).

Throughout the period under review, the top contributors to St. Kitts and Nevis’ total GDP at Constant 1990 Prices were Banks and Insurance, Construction and Government Services. For 2006, Banks and Insurance represented 15.3 percent of total GDP compared to 14.9 percent in 2005. Construction accounted for 15.3 percent of total GDP in 2006 compared to 14.6 percent in 2005. The percentage contribution of Government Services stood at 15.0 percent in 2006 and 15.1 percent in 2005 (Table 11.2A).

For 2006, all industries showed positive real GDP growth rates except for Agriculture and Manufacturing, which reflected real GDP growth rates of -21.2 percent and -4.2 percent respectively. Communication displayed the highest growth rate in 2006, 11.8 percent followed by Construction with 9.0 percent and Wholesale and Retail Trade with 8.6 percent (Table 11.1A).

GDP in Current Prices

For 2006, Banks and Insurance (18.6 percent), Government Services (17.8 percent) and Construction (14.3 percent) were St. Kitts and Nevis’ top industries for GDP in current prices (Table 11.3A).

Expenditure on GDP in Current Prices

For the period under review, Total Consumption expenditure represented 79.5 percent and 80.5 percent of the respective total GDP in Current Market Prices in 2003 and 2006. Private Consumption expenditure was 62.4 percent of total GDP in 2006 compared to 60.8 percent of GDP in 2003.

Gross Fixed Capital Formation represented 37.8 percent of total GDP in 2006 compared to 45.6 percent in 2003. Also for the period, expenditure on Construction represented 26.5 percent of total GDP in 2006 compared to 29.7 percent in 2003.

The net of Goods and Non-factor services was negative throughout the period. Exports of Non-Factor Services represented 29.8 percent of total GDP in 2003 and 35.5 percent in 2006 while exports of Goods represented 15.7 percent in 2003 and 11.9 percent in 2006. On the other side, imports of Goods represented 48.5 percent of total GDP in 2003 and
44.9 percent in 2006 while imports of Non-Factor Services represented 22.1 percent of total GDP in 2003 and 20.8 percent in 2006 (Tables 11.4 and 11.4A).

Saint Lucia

GDP in Constant 1990 and 2000 Prices

Real GDP growth rate for this Member State stood at 4.4 percent in 2006 compared to 3.8 percent in 2005. Saint Lucia’s GDP at Constant 1990 Prices expanded throughout the period moving from EC$1.2 Bn (US$0.5 Bn) in 2003 to EC$1.4 Bn (US$0.5 Bn) in 2006. At Constant 2000 Prices, GDP of this Member State rose from EC$1.6 Bn (US$0.6 Bn) in 2003 to EC$1.8 Bn (approximately US$0.7 Bn) in 2006. For the period under review, the average annual growth rate was 4.5 percent (Tables 12.1, 12.1A and 12.2)

For 2006, the top contributors to Saint Lucia’s total GDP at Constant 1990 Prices were Government Services (12.7 percent), Banks and Insurance (12.6 percent), Hotels and Restaurants (12.6 percent), Real Estate and Housing (12.3 percent) and Wholesale and Retail trade (12.1 percent). Collectively these five industries accounted for 62.2 percent of total GDP (Table 12.2A).

With regards to growth rates of the industries, except for Hotels and Restaurants, Manufacturing and Electricity and Water, which declined in 2006, all industries reflected positive growth rates for 2006. Banks and Insurance showed the highest growth rate, 21.8 percent in 2006 compared to a rate of 8.7 percent in 2005. Mining and Quarrying followed with a growth rate of 19.8 percent in 2006 compared to a rate of -3.5 percent in 2005. The growth rates for Hotels and Restaurants, Manufacturing and Electricity and Water for 2006 were -2.7 percent, -4.4 percent and -8.6 percent respectively (Table 12.1A).

GDP in Current Prices

Throughout the period, 2003-2006 Government Services, Hotels and Restaurants and Wholesale and Retail Trade were consistently the Saint Lucia’s top three contributors to GDP in Current Prices. Government Services represented 15 percent of total GDP in 2006 compared to 14.8 percent in 2005 while Hotels and Restaurants accounted for 13.8 percent in 2006 as opposed to 14.7 percent in 2005. The percentage contribution of Wholesale and Retail Trade was 12.3 percent in 2006 and 12.6 percent in 2005 (Tables 12.3 and 12.3A).

Expenditure on GDP in Current Prices

On the expenditure side, Total Consumption expenditure represented 94.4 percent of total GDP at Current Market Prices in 2003 compared to 98.5 percent in 2006. Private Final consumption expenditure, the larger component of this expenditure group represented 73.7 percent of total GDP in 2003 and 81.7 percent in 2006.
Expenditure on Gross Capital Formation represented 20.4 percent and 29.9 percent of total GDP in 2003 and 2006 respectively. Construction, the most significant category in this group represented 13.5 percent of total GDP in 2003 and 18.1 percent in 2006.

The net of Goods and Non-Factor Services was negative throughout the period. For 2006, exports of Non-Factor Services were 36.6 percent of total GDP while exports of Goods represented 10.6 percent of total GDP. Imports of Non-factor Services accounted for 57.1 percent of total GDP compared to imports of non-factor services which represented 18.5 percent of total GDP. (Tables 12.4 and 12.4A).

St. Vincent and the Grenadines

GDP in Constant 1990 and 2000 Prices

For the period under review, St. Vincent and the Grenadines reflected the highest real GDP growth rate in 2006, 7.6 percent. The growth rate for 2005 was 2.6 percent. Real GDP at Constant 1990 Prices rose from EC$649.5 Mn (US$240.6 Mn) in 2003 to EC$766 Mn (US$283.7 Mn) in 2006. At Constant 2000 Prices, GDP moved from EC$807.4 Mn (US$299 Mn) in 2003 to EC$952.1 Mn (US$352.6 Mn) in 2006. Overall the average annual growth rate of real GDP between 2003 and 2006 was 5.6 percent ((Tables 13.1, 13.1A and 13.2).

Accounting for 19.4 percent of total GDP in 2006, Wholesale and Retail Trade was the top contributor to St. Vincent and the Grenadines’ total GDP at Constant 1990 Prices. This industry was consistently the leading industry throughout the period. Transport with a percentage contribution of 16.4 percent and Government Services with 15.2 percent were the next top contributors to follow in 2006 (Table 13.2A).

With respect to the growth rates, except for Hotels and Restaurants, all industries reflected positive growth rates in 2006. The industries with the highest growth rates in 2006 were Transport (17.5 percent), Construction (11.9 percent) and Communications (10.3 percent). Wholesale and Retail Trade showed a growth rate of 6.6 percent in 2006 while Government Services displayed a growth rate of 4.6 percent.

GDP in Current Prices

For GDP in Current Prices, the dominant industries for the period under review were Wholesale and Retail Trade, Government Services and Transport which represented 19.5 percent of total GDP, 18.8 percent and 14.4 percent respectively. Collectively these three industries represented 52.7 percent of total GDP in Current Prices (Tables 13.3 and 13.3A).
Expenditure on GDP in Current Prices

Tables 13.4 and 13.4A show that Total Consumption expenditure represented 84.6 percent and 88.3 percent of total GDP in Current Market Prices in 2003 and 2006. The major component of this category, Private Final Consumption expenditure represented 65.1 percent of total GDP in 2003 and 69.8 percent in 2006.

The ratio of Gross Capital Formation to total GDP moved from 33.3 percent in 2003 to 35.0 percent in 2006. Construction, the most significant category within this group represented 20.0 percent of GDP in 2003 and 23.3 percent in 2006.

Between 2003 and 2006, this Member State’s imports of Goods and Non-Factor Services exceeded its exports of these categories resulting in a negative net position throughout the period. For 2006, Imports of Goods represented 48.1 percent of total GDP while imports of Non-factor Services accounted for 17.8 percent of total GDP. On the other hand, exports of Goods for 2006 were 8.3 percent of total GDP compared to exports of Non-factor Services which represented 34.3 percent of total GDP (Tables 13.4 and 13.4A).
