“BETTER STATISTICS, BETTER MANAGEMENT, BETTER DEVELOPMENT OUTCOMES”
Launch of CARICOM Statistics Helpdesk
The Statistical Component is a part of the Caribbean Integration Support Programme (CISP) funded by the European Commission under the Ninth European Development Fund (9th EDF).

The overall objective is to provide the decision-makers of CARICOM with the information necessary to monitor and guide the progress in the establishment and the Strengthening of the CARICOM Single Market and Economy.
The expected outcome of the Statistical Component is the Improvement and Harmonised production of Economic Statistical data at the regional and national levels.

The are a number of interventions and support to strengthen the production and dissemination of statistics, both at the CARICOM Secretariat and in Member States.

One of such interventions is the establishment of an electronic Statistics Help Desk Facility;
Some key functions of the Statistics Helpdesk include:

• To enhance the input resources used by producers and end users thereby enabling them to improve the quality and range of statistics;

• To provide information on a range of basic concepts used in statistics regionally and internationally so as to guide the process of interpreting statistics through the use of *inter alia*, manuals, guidelines, classifications and etc.
• To facilitate discussions among producers and end users of statistics within CARICOM regarding statistical areas of interest;

• To facilitate widespread networking and improve information and knowledge-sharing of statistics in key areas including user best practices and other Frequently Asked Questions (FAQs);

• To provide links to other useful websites including knowledge-based websites.
The **Statistics Helpdesk Service** is supported by:

- **An Electronic Centralised Registration System** where users can post a question using an online form.

- **Web-based Discussion Forums** where stakeholders can follow and participate in various statistics-related topics.

- **A Documentary Service** with a repository of relevant documents and manuals such as common regional guidelines for the production and dissemination of all statistics.
• Technical support and information on basic statistical methods and Trade Information System used in the region.

• Frequently Asked Questions (FAQs)

Welcome to the CARICOM Statistics Helpdesk Web Site!

This statistics helpdesk was established primarily to assist the National Statistics Offices and other Organizations in Member States that are engaged in the production and dissemination of statistics.

Some key functions of the Statistics Helpdesk:

1. To enhance the input resources used by producers and end users thereby enabling them to improve the quality and range of statistics.

2. To provide information on a range of basic concepts used in statistics, regional and internationally so as to guide the process of interpreting statistics through the use of inter data, manuals, guidelines, classifications and so on.

3. To facilitate discussions among producers and end users of statistics within CARICOM regarding statistical areas of interest.

4. To facilitate widespread networking and improve information and knowledge-sharing of statistics in key areas including user best practices and other Frequently Asked Questions (FAQs).

5. To provide links to other useful websites including knowledge-based websites...MORE
