Special Topic Statistical Bulletin - COVID-19

Issue I, 26 March 2020

The **Special Topic Statistical Bulletin on COVID-19 in CARICOM Countries, Issue I**, provides a synopsis of the trajectory of the disease from the confirmation of the first case in the CARICOM Region on 10 March 2020 to the period ending 26 March 2020. Essentially, the bulletin provides information on the pattern of the disease, graphically summarising the total number of cases, new cases and deaths by date as well as providing information on the patterns for each country and doubling time in days. Future bulletins would provide summary information and country details where there are changes in the data of the latter.

Data are preliminary and will be adjusted as more reliable data are made available. While international data sources were used, these were supplemented by web-scraping of information from official sources of countries including situation updates and official media releases, from ministries of health, government information departments and other similar sources. At least one Member State was able to submit data to support this effort.

Situation at a Glance

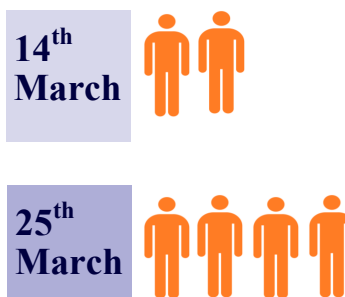

Total Confirmed cases –
21-26 March 2020

Saturday, 21 st	112 Cases
Sunday, 22 nd	119 Cases
Monday, 23 rd	131 Cases
Tuesday, 24 th	157 Cases
Wednesday, 25 th	175 Cases
Thursday, 26 th	210 Cases

Confirmed cases increased by **98** over **5 days almost doubling (1.9)**
