## **PREFACE**

The intra-regional trade report seeks to give in a single publication a profile of trade within CARICOM over the period 1990-2000. From the period of the late 1970s to the present there have been changes in trade policies in the region either at an individual country level or through the establishment of common policies such as the Common External Tariff (CET). The rapid changes in the international economic environment and particularly the forces of liberalisation and globalisation present challenges to CARICOM's intra-regional trade. The report is therefore timely in providing a picture with some analysis with regard to recent trends in intra-region trade over the specific period.

This report presents data on intra-regional trade for the period 1990-2000 and comprises approximately 164 tables at the level of CARICOM, Member States and additional tables in the appendices. The tables provide the following information:

- ❖ Values of intra-regional exports, imports and trade balance;
- ❖ Shares of intra-regional imports/exports to total intra-regional imports/exports.
- ❖ Values/percentage distribution of CARICOM's intra-regional imports/exports by SITC Sections, including domestic exports;
- ❖ CARICOM's intra-regional imports/exports as a percentage of imports/exports by all sources/destinations.

The report also shows data for the categorizations More Developed Countries (MDCs), Less Developed Countries (LDCs) and the Organization of Eastern Caribbean States (OECS). The report also provides graphical information on the profile of intra-regional trade based on the tables presented. In addition data highlights relative to the main trends in intra-regional trade are included.

The report does not present the conceptual framework for the Merchandise Trade Statistics. Most Member States follow the International Merchandise Trade Statistics: Concepts and Definitions, Revision 2 of the United Nations Statistical Commission. The Statistics Sub-programme of the CARICOM Secretariat is however compiling the methodological information from Member States to assess the conformity to the international concepts and definitions as well as to evaluate regional consistency. The concepts and definitions are therefore not being presented with the current report but will be documented for future dissemination.

The current report contains rich information that perhaps can form the basis of numerous academic research efforts and be of use to policy-makers and governments in Member States as well as in regional and international institutions.

The Statistics Sub-programme is also considering preparing a second report that will provide more detailed information at the commodity level. Ultimately however, it is hoped that with the work-in-progress relative to the development of the Trade Information System (Tradsys), it may be possible to disseminate some of this information utilizing Simple Query Language (SQL) procedures to users.

## **ACKNOWLEDGEMENTS**

The CARICOM Secretariat expresses its sincere thanks to the National Statistical Offices in Member States for supplying the data used to compile this report.

The Secretariat also thanks the staff of its Statistics Sub-Programme for compiling and preparing this report.

# DATA HIGHLIGHTS

## HIGHLIGHTS OF CARICOM'S INTRA-REGIONAL TRADE REPORT

### 1. GENERAL OVERVIEW OF THE DATA

In the interpretation of the data in this report there are a few issues that ought to be taken into consideration. Data limitations result from the absence of data for Guyana (1995-2000) and Antigua and Barbuda (1993-98 and 2000) at the detailed commodity level for inclusion in the database to generate the pertinent tables. Monsterrat had missing data for the years 1995-98, barring exports data for 1995 and 1996, while Suriname had no data for the period 1990-94 prior to becoming a CARICOM Member State.

The absence of data for Guyana, Antigua and Barbuda and Suriname affects the ability to compile a regional database and to obtain complete and accurate information on intra-regional trade. In addition data were not available by Sections for some years and Member States. Therefore, an "unallocated" category was inserted where required in the tables by SITC sections, in order to enable the balancing of these tables by Sections with the summary tables showing the distribution of intra-regional trade by Member States. There are other fundamental issues such as problems with coverage, classification, valuation and time of recording of the trade data that inherently affect the quality of the data.

While in principle total intra-regional imports should be equal to total intra-regional exports at the CARICOM level, this did not hold in reality due to the reasons highlighted above. This is a basic check on the quality of the data that ought to be researched in the future. CARICOM's balance of trade was therefore not zero for any of the years 1990-2000. Also at the country level, imports from country A to country B should be equal to the exports of country B to country A. This equality did not hold. It is possible to use this equality in an effort to derive data for the missing countries but no effort was made to perform this estimation in the report. These are some of the main issues that affect the quality of the data in this report.

### 2. CARICOM - TOTAL IMPORTS AND EXPORTS

Despite the limitations above CARICOM's total intra-regional imports moved from \$EC1.35 billion in 1990 to \$EC2.78 billion in 2000, just over twice the value of that in 1990. Exports also increased, moving from \$EC1.37 billion in 1990 to \$EC3.32 billion by 2000 (*Table 1.01a*).

#### 2.1 THE CONTRIBUTION OF MDCS AND LDCS TO TOTAL INTRA-REGIONAL TRADE

Looking at the distribution of intra-regional trade between MDCs and LDCs (*Table 1.01b*), MDCs exports to total intra-regional exports increased from 81.4% in 1990 to 92.7% in 2000. For the years 1990-93, the percentage contribution of imports for MDCs was close to 60% and this increased to 73.1% by 2000. These proportions for MDCs imply that the contribution of LDCs to total intra-regional exports moved from 18.6% in 1990 to 7.3% in 2000. Imports for LDCs moved from 39.8% of total intra-regional imports in 1990 to 26.9% in 2000.

## 2.2 THE DISTRIBUTION OF TOTAL INTRA-REGIONAL TRADE BY MEMBER STATES

For the period 1990-92 (*Table 1.01b*), Barbados recorded the highest contribution to total intra-regional imports with percentages of 21.9%, 21% and 19.8% respectively for these years. Jamaica was second to Barbados in 1990 with 17.5%. However Trinidad and Tobago followed Barbados as the next highest intra-regional importer for 1991 and 1992 with percentages of 16.8% and 15% respectively. From 1994 Jamaica surpassed Barbados as the highest intra-regional importing Member State with proportions such as 23.4% in 1994, 35.4% in 1995, 34.7% in 1998 and 38.7% in 2000.

The contribution of Barbados to Intra-regional imports showed a steady decline from 1990 through to 1997. Figures for the period 1990-92 were given above. From 1993 the contribution was 19.5% moving to 18.5% in 1994 to 12.9% in 1997, with the contribution for 1998 and 2000 being 18.2% and 22.3% respectively. Saint Lucia's contribution to total imports was over 10% for the period 1991-94. The contribution to total imports for Trinidad and Tobago fell from 15% in 1992 to 9.4% in 1993 and was approximately over 10% for the remaining years with the percentage for 2000 being 12.2% (*Table 1.01b*).

In the case of total intra-regional exports, the percentage contribution of total intra-regional exports by Trinidad and Tobago was 52% in 1990 and increased to 60.2% in 1993, 71.6% in 1995 and 79.2% in 2000. Jamaica had a contribution of 13.8% of total intra-regional exports in 1990 followed by Barbados with 13%. The OECS sub-region contributed to 16.9% of total intra-regional exports in 1990 and 17.6% in 1991, but by 1995 the proportional contribution fell to 8.7% and in 2000 to 6.5%.

## 2.3 PERCENTAGE DISTRIBUTION OF CARICOM'S INTRA-REGIONAL TRADE BY SITC SECTIONS

In 1990, Manufactured goods classified chiefly by materials contributed to 22.1% of total intra-regional imports as compared to 20% for Mineral fuels, 18.5% for Food and Live Animals chiefly for food and 15.5% for Chemicals and Related products (*Table 1.03*). Collectively these four sections contributed to approximately 76% of total intra-regional imports.

In 1991-1993, Manufactured goods classified chiefly by materials also displayed the highest percentage contribution of intra-regional imports with 21% and over for these years with the exception of 1992. In fact, in 1992 Food and Live animals chiefly for Food was the highest contributor to intra-regional imports with 23%.

Mineral fuels, lubricants and related materials contributed significantly to total intra-regional imports by SITC Sections on a consistent basis, surpassing Manufactured goods as the highest contributor to intra-regional imports in 1994 with a percentage contribution of 23.4% as compared to 19.6% for Manufactured goods and 18.7% for Food. The contribution of Mineral fuels and lubricants increased to 36.3% in 1995, 36.6% in 1999 and was 48% of total intra-regional imports in 2000.

In contrast manufactured goods fell from 20.5% in 1993 to 17.3% in 1995, 13.7% in 1999 and 11.8% in 2000. Food fell from 23% in 1992 to 17.8% in 1995, and stood at 19% in 2000. The following summary

shows the movement in the contribution of the four key contributing SITC Sections to CARICOM's total intra-regional imports for selected years:

**CONTRIBUTION OF KEY SECTIONS TO CARICOM'S TOTAL INTRA-REGIONAL IMPORTS FOR SELECTED YEARS (Percentages)**

SECTION	1994	1995	1999	2000
Food	18.7	17.8	18.6	19.0
Mineral fuels	23.4	36.3	36.6	48.0
Manufactured Goods	19.6	17.3	13.7	11.8

**Source: Table 1.03**

With respect to CARICOM's total intra-regional domestic exports (*Table 1.04*), Food, Mineral fuels and Manufactured goods, were also the key contributing sections intra-regionally. The section, Mineral, fuels, lubricants and related materials was clearly the most significant commodity exported intra-regionally increasing to a high of 53% of total intra-regional domestic exports in 2000. The allocation of CARICOM's total intra-regional domestic exports by SITC sections are highlighted below:

**CONTRIBUTION OF KEY SECTIONS TO CARICOM'S TOTAL INTRA-REGIONAL DOMESTIC EXPORTS FOR SELECTED YEARS (Percentages)**

SECTION	1994	1995	1999	2000
Food	19.5	16.5	15.7	13.5
Minerals	27.2	38.4	40.6	53.0
Manufactured Goods	20.7	16.5	14.2	12.2

**Source: Table 1.04**

Total intra-regional exports (intra-regional domestic and re-exports) effectively reflect the allocation by Sections of total domestic exports, domestic exports being almost equal to the former (*Table 1.05*). *Tables 1.09 -1.11* present a picture of total trade, imports, domestic exports and total exports for purposes of comparison.

## **2.4 COMPARISON BETWEEN INTRA-REGIONAL TRADE AND TOTAL TRADE**

### **Intra-regional imports as a proportion of total imports all sources**

*Table 1.06* shows CARICOM's intra-regional imports as a proportion of total imports all sources. Intra regional imports comprised a small percentage of total imports all sources and was approximately 10% or under for the period 1990-97 (with the exception of 1994, 10.7%). In 1999 and 2000 this percentage crossed the 10% barrier with values of 12.3% in 1999 and 11.1% in 2000.

The percentage contribution of total intra-regional imports of Mineral fuels, lubricants etc., to total imports all sources was around 12.8% in 1990, increasing to 31.8% in 1995, 31.9% in 1999 and reflecting a percentage of 25.1% in 2000. Intra-regional imports of Food were 12.6% of Total Food imports in 1990, 12.2% in 1995 and 17.8% in 2000. Corresponding proportions for Manufactured goods were 12.2% in 1990, 9.5% in 1995 and 8.9% in 2000.

Therefore in 2000 approximately 91% of manufactured goods were imported from outside the region, 82% in the case of Food and 75% of Mineral fuels and other lubricants.

### **Intra-regional domestic exports to total domestic exports all destinations**

*Table 1.07* relates CARICOM's intra-regional domestic exports to total domestic exports all destinations. Intra-regional domestic exports to total domestic exports all destinations, stood at 12.3% in 1990. In 1995 intra-regional domestic exports were 14.9% of total domestic exports, increasing to 19.6% in 1998. For 2000, this percentage fell to 19.1%. These figures imply that only a small proportion of total domestic exports is intra-regional domestic exports.

The Section, Manufactured goods exhibited high contributions of intra-regional domestic exports to total domestic exports with figures of 43.1% in 1990, 41.2% in 1993, the lowest percentage of 27.9% in 1995 and 35.1% in 2000.

The percentage contribution of intra-regional domestic exports to total domestic exports for the Section, Mineral fuels lubricants and related materials was 7.6% in 1990. This percentage fell to under 7% in 1991 and 1992 followed by an increase to 25.3% in 1995. The highest percentage contribution of intra-regional domestic exports to total domestic exports in this Section was 29.1% in 1998 with the percentage for 2000 being 21.9%.

In the Section, Food, live animals chiefly for food, the percentage contribution of intra-regional domestic exports to total domestic exports was 14.6% in 1990, and 16.2 % in 1995. In 2000 the contribution of this section to total intra-regional domestic exports stood at 22.4%.

While some of the other sections exhibited high proportions of intra-regional domestic exports to total domestic exports all sources, in general the contributions of these sections to total intra-regional domestic exports were negligible.

*Clearly there is a greater degree of dependence on the intra-regional market for the regional production of manufactured goods as compared to other sections. Mineral fuels have increased in importance over time intra-regionally. The corollary is that approximately 65% of domestic exports of Manufactured goods, 80% of Mineral fuels and 78% of Food go to the extra-regional markets*

## 2.5 INTRA-REGIONAL IMPORTS EXPORTS AND TRADE BALANCE – SELECTED MEMBER STATES

### MDCs

#### **JAMAICA**

Jamaica's intra-regional imports moved from \$EC236.8 million in 1990 to \$EC1.08 billion in 2000 while exports decreased from \$EC190.2 million to \$EC131.2 million. This represents an annual increase in imports of 16% and an annual decrease of exports of 4% for the ten-year interval. The trade balance was in deficit for all the years of the period, moving from \$EC46.6 million in 1990 to \$EC944.6 million in 2000. The years 1991 and 1992 recorded values under \$EC20 million.

Relative to the distribution of Jamaica's intra-regional imports and intra-regional exports in the region, Trinidad and Tobago is the main trading partner for Jamaica followed by Barbados. Individually the Member States of the OECS sub-region do not contribute significantly to Jamaica's imports and exports. Collectively however this sub-region is an important destination of Jamaica's exports. Approximately 61.3% of Jamaica's imports came from Trinidad and Tobago in 1990 while 44.7% of the trade was exported to Trinidad and Tobago in this same year. The trade balance with Trinidad and Tobago for 1990 was a deficit of \$EC60 million. In 1995 Jamaica imported 87.1% of its intra-regional imports from Trinidad and Tobago and 80.2% in 2000. Intra-regional exports to Trinidad and Tobago accounted for 48.8% of Jamaica's total intra-regional exports in 1991, the highest for the period. In 1995 the proportion of intra-regional exports to Trinidad and Tobago was 35.9% of Jamaica's total intra-regional exports and 44.2% in 2000. The trade balance between Jamaica and the OECS sub-region was positive in the pre-1996 period and negative from 1996 onwards.

The following summary highlights the relationship of Jamaica's intra-regional trade, percentage contribution to total intra-regional imports and exports and the value of the trade balance, with Trinidad and Tobago, Barbados and the OECS.

#### **SUMMARY OF JAMAICA'S TRADE WITH TRINIDAD AND TOBAGO, BARBADOS AND THE OECS**

COUNTRY	TRADE	YEAR		
		1990	1995	2000
Trinidad and Tobago	Imports (%)	61.3	87.1	80.2
	Exports (%)	44.7	35.9	44.2
	Trade			
	Balance (\$EC Mn)	-60.0	-532.4	-804.7
Barbados	Imports (%)	15.5	6.2	4.2
	Exports (%)	22.2	20.7	16.0
	Trade			
	Balance (\$EC Mn)	5.6	-8.7	-24.0
OECS	Imports (%)	11.7	3.2	4.1
	Exports (%)	16.8	21.1	24.3
	Trade			
	Balance (\$EC Mn)	4.8	12.1	-12.3

An analysis of Jamaica's intra-regional domestic exports by Sections shows that in 1990 Chemicals and related products contributed 24.7% of total domestic exports, Food and live animals chiefly for food contributed 18% to total intra-regional domestic exports, while Manufactured Goods classified by material contributed 17.1%. From 1991-93, Food and live animals was the highest contributor to total domestic exports for these years. In 2000, Food and live animals chiefly for food contributed 38.7% of total intra-regional domestic exports with the contribution of Manufactured goods declining to 10.1% in 2000.

Jamaica's intra-regional imports of Food stood at 25.4% of total intra-regional imports in 1990, moving to 33.9% in 1992 and declining to under 20% in the period 1993-97. In 2000 the contribution of Food to Jamaica's total intra-regional imports was 21%. Manufactured goods was 24.4% of Jamaica's total intra-regional imports in 1990, 31% in 1992 and declined to 8% in 2000, reflecting high extra-regional imports of Manufactured goods for Jamaica. The section Mineral fuels recorded proportions under 5% for intra-regional imports for the period 1990-92. However from 1993 the proportions of mineral fuels, lubricants of Jamaica's total intra-regional imports moved to 29.3% and in 2000 the proportion was 54.9%, which shows a significant change from extra to intra-regional source for Mineral fuels, lubricants from the pre-1993 period to the 1993 period and beyond.

Jamaica's intra-regional imports to its total imports all sources recorded proportions under 10% for the period 1990-96. For the years 1997-2000 these proportions were over 10% with the proportion for 2000 being 12.5%. Intra-regional imports of Food, live animals were 10.7% of total imports all sources in 1990, as low as 5.6% in 1991, and increased to 18.7% in 2000. Intra-regional imports of Mineral fuels, lubricants was 1% or less of total imports all sources for the years 1990-92 but by 1995 this proportion increased to 34.3% and reached a high of 49.5% in 1999. This trend showed a general increasing reliance on the intra-regional market by Jamaica for Mineral fuels, lubricants and related materials. The Section, Manufactured goods intra-regional imports to total imports all sources, was always under 10% for the entire period, showing the reliance on the extra-regional markets for the commodities under this section.

The contribution of intra-regional domestic exports to total domestic exports all destinations for Jamaica was under 7% for the entire period 1990-2000 and was actually under 4% from 1996-2000. Chemicals and related products and Manufactured goods which were significant intra-regional domestic exports show some interesting trends relative to total domestic exports all destinations. Intra-regional domestic exports of Chemicals and related products recorded a proportion to total exports all destinations of 72.2% in 1990, and 65% in 1991. The contribution for this section declined to 55% in 1994 and to 16.8% in 2000, showing that there is some transformation relative to the direction of exports of the commodities in this section. Manufactured goods classified chiefly by material recorded high proportions of intra-regional domestic exports to total domestic exports all destinations ranging from 71% in 1990 to 64.5% in 1995 and 62.1% in 2000. While these proportions decreased from 1990 to 2000, the reliance on the intra-regional market still remained fairly high.

## BARBADOS

Barbados' intra-regional imports moved from \$EC295.6 million in 1990 to \$EC619.2 million in 2000. Intra-regional exports increased from \$EC178.1 million in 1990 to \$EC318.2 million in 2000. The annual growth rate for the period for intra-regional imports was 7.7% and 6% for intra-regional exports. The trade balances were negative for the entire period 1990-2000, recording deficits of \$EC117.4 million in 1990, \$EC124.6 million in 1999 and \$EC301.1 million in 2000.

Similar to Jamaica, Trinidad and Tobago led the other Member States by being in general the key trading partner in the region for Barbados. Barbados imported 70.9% of its intra-regional imports from Trinidad and Tobago in 1990 and exported 27.9% of its exports to this same country. In 2000, 82.9% of Barbados's intra-regional imports came from Trinidad and Tobago and 30.6% of its exports were to Trinidad and Tobago. The proportion of exports to Trinidad and Tobago crossed the 30% barrier with 33.2% in 1991, 33.3% in 1992 and 30.6% in 2000. Trinidad and Tobago is therefore a significant importer and exporter for Barbados. After Trinidad and Tobago, Jamaica was the second most important individual trader with Barbados. Jamaica received 25% of Barbados's exports in 1996 as the most significant proportion in trade between these Member States for this year.

The OECS sub-region as a group was also a key recipient of Barbados' exports with 48.7% in 1990 with exports to Saint Lucia being 14.9% of the total intra-regional exports for this country. The data for Barbados reflected trade surpluses with the OECS sub-region as a group. Intra-regional imports from the OECS sub-region were 9.4% in 1990 and fell to 6.5% in 2000 which were accounted for by increased intra-regional trade imports to Trinidad and Tobago. For the OECS sub-region, the proportion of intra-regional exports to this area was always over 41%, with Saint Lucia being the main recipient of these exports. A summary of Barbados trade with its key intra-regional trading partners is given below:

An analysis of intra-regional imports for Barbados by Sections indicate that the key intra-regional imports were Mineral fuels, lubricants and related materials, Food and live animals chiefly for food and

Manufactured goods chiefly by material. In 1990 imports of Mineral fuels were 32.9% of total intra-regional imports for Barbados with the percentage for 1995 being 24% and 2000, 56.1%. Food, live animals were 16.6% of intra-regional imports in 1990 for Barbados and increased to 23.4% in 1995. Throughout the period the contribution of this Section fluctuated and in 2000 it reflected a contribution of 11.7% of total intra-regional imports. Intra-regional imports of manufactured goods constituted approximately 15% of total intra-regional imports for Barbados in 1990 and increased to 18.8% in 1995. In 2000, the percentage contribution of Manufactured goods to intra-regional imports fell to 10% for Barbados.

With respect to intra-regional domestic exports, Food and live animals chiefly for food, Chemicals and related products and Manufactured Goods classified chiefly by material were the main products exported. The Section Food and live animals represented 13% of total intra-regional domestic exports of Barbados in 1990, accounting for over 20% of intra-regional exports during 1992-94 and over 25% from 1995 onwards and became the chief intra-regional domestic exports for the period 1998-2000. This reflected a change from the earlier period 1990-95 when Manufactured Goods chiefly by material and Chemicals and related products were the significant domestic exports with percentages of over 30 for some years of that period. Chemicals and related products not elsewhere specified contributed to 31.6% of total intra-regional domestic exports in 1990 and approximately 30% and over for the next four years. However the contribution of Chemicals and related products to total domestic exports declined to 20% in 2000 and exhibited lower proportions than Food for the period 1996-00. Manufactured goods displayed the highest contribution to total intra-regional domestic exports for the following years: 1990 (35.8%), 1993 (30.5%), 1994 (31.1%), 1996 (28.6%) and 1997 (28.9%).

Barbados's intra-regional imports to total imports all sources stood at 15.5% in 1990 and at 19.8% in 2000. Imports of mineral fuels, lubricants and related materials increased its reliance on the intra-regional market over the period, with proportions of 35.3% in 1990, 71.3% in 1994 and 96.6% in 2000. Food, live animals was 18.6% of total imports all sources, averaged around 26% in the period 1992-1995 and fell to 19.2% in 2000. Intra-regional imports of Manufactured goods stood at 12.8% in 1990 and 11.5% in 2000.

## **TRINIDAD AND TOBAGO**

Total intra-regional imports for Trinidad and Tobago was \$EC214 million in 1990. This figure decreased to \$EC210.2 million in 1995 and was \$EC339.1 million in 2000. Intra-regional exports stood at \$EC 714.5 million in 1990 and \$EC2.63 billion in 2000. The annual growth rate for imports for the period 1990-2000 was 4.7% and for exports 13.9%, showing phenomenal growth in intra-regional exports over the period. The trade balance exhibited surpluses for all years for the period 1990-2000 and moved from \$EC500.5 million in 1990 to \$EC2.3 billion in 2000.

The proportional distribution of Trinidad and Tobago's total intra-regional imports shows that this country's imports were derived mainly from Jamaica for the period 1990-96. The proportion of intra-regional imports from Jamaica was as high as 42.5% in 1990 and declined to 27.1% in 1995 with a further decline to 15.6% in 2000. Barbados and Suriname were the other main contributors to the intra-regional imports of Trinidad and Tobago.

For the years 1996-2000, imports from Suriname surpassed those of other Member States with the figures for the years 1999 and 2000 being respectively 38.2% and 32.9% of total intra-regional imports for

Trinidad and Tobago. Mineral fuels and other lubricants comprised the bulk of the imports from Suriname to Trinidad and Tobago. In 1990, 22.3% of Trinidad and Tobago's intra-regional imports came from Barbados. This proportion increased to 34.6% in 1993 and was approximately 29% in 1999 and in 2000. Trinidad and Tobago's imports from the OECS as a group stood at approximately 26% in 1990, falling to 11.1% in 1995 and to 7.9% in 2000.

In absolute terms the MDCs and the OECS countries as a group all contributed significantly to total intra-regional exports from Trinidad and Tobago. From 1990-93 Barbados was the largest single importer of Trinidad and Tobago's exports, receiving 28% of these exports in 1990 after which there was a decline to 22.1% in 1993. In 2000 Barbados contributed to 21.4% of exports from Trinidad and Tobago. Jamaica in 1990 received 21.4% of Trinidad and Tobago's intra-regional exports, following which there was a decline for the next two years.

In 1995, Jamaica received 36.6% of total intra-regional exports from Trinidad and Tobago, with the proportions being over 32% for the remaining years. Guyana consistently contributed to over 10% of total intra-regional exports of Trinidad and Tobago for the entire period 1990-2000. Suriname on average was the destination of about 11% of Trinidad and Tobago's intra-regional exports for the period 1995-2000. For the OECS sub-region, 39.8% of the intra-regional exports went to these Member States in 1990, increasing to 43.9% in 1992. However the proportion of goods exported by Trinidad and Tobago to the OECS declined to 21.9% in 2000. Saint Lucia was the destination of 10.1% of these exports in 1990 but the proportion fell to 6.1% in 2000.

The sections that contributed significantly to intra-regional imports for Trinidad and Tobago were Chemicals and related products, Manufactured goods classified chiefly by material and Food and live animals. There were changes in the importance of these sections over time. Chemicals and related products contributed to 26.6% of intra-regional imports in 1990 and was over 24% for the period 1991-94. However there was a decline in the contribution of this section from 1995 through to 2000 with the proportion being 10.3% in 2000. The intra-regional imports of Food and live animals showed a more consistent trend and stood at 21% in 2000. Mineral fuels, lubricants and related materials contributed negligibly to total intra-regional imports in the period 1990-94, approximately 1 to 3% but this proportion rose to 25.3% in 1995, was 54.9% and 51% respectively in 1999 and 2000. Imports of crude petroleum from Suriname from 1995-2000 *as well as other gas oils* contributed to this sudden rise in this section's imports. There was also an increase in imports of crude petroleum from Barbados in 1998.

Mineral fuels and other lubricants contributed significantly to Trinidad and Tobago's intra-regional domestic exports with 38.3% in 1990, 49.5% in 1995 and 63.6% in 2000. However there was a decline in the contribution of manufactured goods to under 20% for the remaining years. Intra-regional domestic exports of food and live animals showed a consistent trend with values over 11% of total intra-regional exports for all the years with the exception of 8.5% in 2000.

The proportion of intra-regional imports to total imports all sources recorded a value of 6.3% in 1990 and from 1993-2000 was under 4% showing the heavy reliance on imports from the extra-regional market for Trinidad and Tobago. Intra-regional domestic exports to total domestic exports all destinations stood at

12.6% in 1990 and increased over the years to 23.7% in 1995, 30% in 1998 and 22.4% in 2000. Relative to the significant sections, mineral fuels recorded a proportion of intra-regional domestic exports to total domestic exports all destinations of 7% in 1990 increasing to 24.3% in 1995 and was 21.5% in 2000. While there were some inroads in the intra-regional market, Trinidad and Tobago is still heavily dependent on the extra-regional market for its exports of mineral fuels. Manufactured goods recorded proportions of intra-regional domestic exports to total domestic exports all destinations of 30.4% in 1990, 25.8% in 1995, over 33% in 1998 and 1999 and 29.9% in 2000.
