

THE EXTERNAL PUBLIC DEBT OF CARICOM MEMBER STATES: 2002 – 2012

CARIBBEAN COMMUNITY (CARICOM) SECRETARIAT

DECEMBER 2013

SYMBOLS AND ABBREVIATIONS

The interpretation of symbols and abbreviations used in this report is as follows:

...	Data not available or not separately recorded
-	Magnitude zero
0	Magnitude IS less than US\$0.1 million
- -	Data not meaningful
p	Provisional data
MDCs	More Developed Countries
LDCs	Less Developed Countries
OECS	Organisation of Eastern Caribbean States
ECCB	Eastern Caribbean Central Bank
SDR	Special Drawing Rights
GDP	Gross Domestic Product

SOURCES OF DATA

Data for the following countries were provided by the *Central Banks*:

- The Bahamas
- Barbados
- Belize
- Trinidad and Tobago

Data for the following countries were provided by the *Ministries of Finance* of each country with assistance from the *Central / National Statistical Offices*:

- Antigua and Barbuda
- Dominica
- Grenada
- Jamaica
- Montserrat
- St. Kitts and Nevis
- Saint Lucia
- St. Vincent and the Grenadines
- Suriname

GENERAL NOTES

1. Mid-Year Estimates may vary from those published in other reports since these figures reflect the data that were sent by countries in response to the data request made in April 2012.
2. Estimates of Gross Domestic Product at Market Prices (GDP at MP) may also vary from those published in other reports since these figures reflect the data that were sent by countries in response to the data request made in April 2012.

EXPLANATORY NOTES AND DEFINITIONS

External Public Debt is defined as debt owed to non-residents of a country by its national Government, Government agencies and autonomous public bodies. It also includes private debt guaranteed for repayment by the Government or a public entity. The debt has a maturity of more than one year.

Disbursed Debt Outstanding is the total public or publicly guaranteed long-term debt, which has been drawn by the borrower and is outstanding at the end of the year.

Disbursements are drawings (the amounts actually received) by the borrower on loan commitments during the year specified.

Amortisation is the repayment of principal by the borrower in the year specified.

Debt Service Payments is the sum of amortisation and interest payments actually made by the borrower in the year specified.

Net Borrowing is disbursements minus amortisation. It represents the net flows received by the borrower in the year specified.

Valuation Adjustment is a residual item that is used to account for cancellations and adjustments resulting from the use of different exchange rates, and the rescheduling of other liabilities into external public debt.

Exports of Goods (XG) covers international movement of goods and services across custom borders. Exports are valued at free on board (fob).

Exports of Goods and Services (XGS) covers international movement of goods and non-factor services across custom borders. Exports are valued at free on board (fob). Exports of goods and services include all transactions involving a change of ownership of goods and services between residents of a country and the rest of the world, including merchandise goods and services.

Central Government Current Revenue (CGCR) consists of tax revenue and non-tax revenue but excludes capital receipts. Tax revenue covers taxes on income, profits social security contributions, taxes on property, domestic taxes on goods and services, etc. Non-tax revenue consists of property income, and operating surpluses of departmental enterprises, receipts from public enterprises, voluntary unrequited non-repayable receipts other than from government, administrative fees and charges, fines, etc.

(Gross) International Reserves is the sum of all the gross foreign of the Central Bank and commercial Banks of a country. These include monetary gold holdings, IMF reserve Tranche Position, Special Drawing Rights (SDR's) holdings and foreign currency balances.

DEBT INDICATORS (RATIOS)

Disbursed Debt Outstanding and total Debt Service Payments, while defining the broad magnitude of the debt problem, are not, by themselves, accurate measures of a country's debt problem. When used in conjunction with other macro economic indicators, however, they can result in ratios that present a fairly accurate picture of a country's debt burden and its capacity to service its external debt. Two of these ratios are highlighted below:

The Ratio of Total Debt to GDP is a measure of the total debt obligations relative to the productive capacity of the country. It indicates the magnitude of effort required, from the productive machinery, to liquidate the outstanding external debt.

The Debt Service Ratio is the ratio of Debt Service Payments (amortisation plus interest payments) to the exports of goods and services. Unlike the Total Debt to GDP ratio, this ratio contrasts the payment obligations due with the principal source from which they will have to be serviced, i.e., foreign exchange earnings from the exports of goods and services. A maximum acceptable limit for this ratio is considered to be 15 percent. Beyond this limit, it is felt that borrowing countries will find it extremely difficult to service their external debts while sustaining current levels of services in their domestic economies.

The two ratios described above, along with the others provided in the publication, give some indication as to the cost of, and capacity for, servicing the external public debt in terms of the output, foreign exchange earnings and tax revenue foregone. The following indicators are provided in the report:

- Disbursed Debt Outstanding per Capita
- Disbursed Debt Outstanding to Gross Domestic Product (GDP)
- Disbursed Debt Outstanding to Exports of Goods (XG)
- Disbursed Debt Outstanding to Exports of Goods and Services (XGS)
- Debt Service Payments to GDP
- Debt Service Payments to XG
- Debt Service Payments to XGS (Debt Service Ratio)
- Debt Service Payments to Central Government Current Revenue (CGCR)
- Debt Service Payments to Disbursements
- Debt Service Payments to International Reserves (IR)
- Interest Payments to GDP
- Interest Payments to XG
- Interest Payments to XGS.
