## MINISTER'S REMARKS

Census taking is one of the oldest traditions in the world, dating back to biblical times when they were done initially to assess military might. The use of censuses has evolved from a simple stocktaking exercise to one that seeks to collect a variety of information for assessing social and economic progress and to provide the basis for national development planning.

Having an annual budget of over nine hundred million dollars, the Government of Belize is fully aware that the optimal use of those funds would be best informed by hard evidence, such as the results of the 2010 Population and Housing Census. As the Minister of State responsible for Economic Development under whose portfolio the Statistical Institute of Belize falls, I hold the development of Belize as a national concern and therefore recognize the need for accurate and reliable statistics as an indispensable part of government's decision making process.

While there are still many challenges ahead, the findings of the 2010 census show that in the last ten years Belize has made significant progress in the areas of education, housing, and information technology. I welcome the publication of this report and encourage our national and international partners to make full use of the information in it.

I extend a heartfelt thank you to the Statistical Institute of Belize and all the other stakeholders who have contributed to making the 2010 Census a success, especially to the people of Belize for their cooperation in providing the information.

HON. SANTIAGO 'SANTINO' CASTILLO  
Minister of State  
Ministry of Finance and  
Economic Development

Glenn Avilez  
Director-General

In 2010, Belize conducted its sixth decennial population and housing census since 1960. This exercise was a part of the 2010 World Population and Housing Census Programme which is expected to see nearly all countries/areas of the world conducting at least one population census between 2005 and 2014. The 2010 census in Belize was fully funded by the Government of Belize. Like all of the other national statistical offices in the CARICOM region, the Statistical Institute of Belize (SIB) received significant technical assistance from the CARICOM Secretariat Statistics Programme, thanks to the generous contributions of the United Nations Population Fund (UNFPA) and Inter-American Development Bank (IDB).

The first preliminary 2010 census results were released in April 2011. Notwithstanding that the data was still being cleaned in the ensuing sixteen months, throughout that time, the SIB has provided additional data to several corporate and individual users in the public and private sectors to facilitate their planning and policy work.

Having completed virtually all of the data cleaning, the Institute has prepared this report to present the final official results of Belize's 2010 census. Due to space limitations, however, the results are only presented at the national and district levels. Users who are interested in information for other geographical areas and topics covered by the census can request them from the Institute, providing the release of such data would not compromise the confidentiality of personal data.

Cognizant that it is virtually impossible for it to analyse all of the census data on its own, the SIB will disseminate the results of the 2010 census by other means. It has developed an application that will allow users to produce their own tables via the Internet according to their specific needs, just as was done for the 2000 census. The SIB can provide bona-fide researchers with an anonymised subset of the census database for their own analyses; on-site access to the complete census database can also be arranged according to the Institute's microdata access policy.

A census is by nature a very difficult and challenging exercise that can never be done perfectly due to the many variables that are outside of one's control. This, however, did not diminish the Statistical Institute of Belize's aim for perfection, and I am immensely grateful to the Government of Belize, Board of Directors and all the staff of SIB for their invaluable contribution to the success of the 2010 Census.

## ACKNOWLEDGEMENTS

A Population and Housing Census requires significant outlays of resources to be successful, and the Statistical Institute of Belize wishes to take this opportunity to acknowledge some of the major players for their role in Census 2010.

We would like to thank the Government of Belize for recognizing the importance of the Census to the country's development, and for providing the necessary funding and statutory support. The Board of Directors, under the chairmanship of Dr. Aaron Paul Lewis, was a huge pillar of support and encouragement.

Many thanks to the Inter-American Development Bank for funding the Regional Public Goods Project. Under this Project, the CARICOM Secretariat, through the Regional Census Coordination Committee, provided valuable technical resources, including training and the creation of a common questionnaire for the 2010 round of censuses.

Thanks to the Caribbean Development Bank for providing funds to enable us to acquire satellite imagery for creating our census maps.

To the Belize Defence Force, for facilitating an aerial inspection of the Toledo and Stann Creek districts as part of our field preparations, we say thank you.

Special thanks to the UNFPA for providing technical assistance in the design of the census questionnaire and the training of the trainers. Additionally, we appreciate the financial contribution to the printing of this report.

Many thanks to the UNICEF, Belize Country Office for providing many of the photographs used in this publication.

The success of the census depended on the tireless efforts of all members of staff of the Statistical Institute of Belize, who worked unstintingly through the planning, training, data collection and data processing phases to ensure the delivery of a high quality product. We wish to express our gratitude for your long days and nights away from family, and the dedication displayed in seeing the census through to the end.

To our field staff, who undertook the task of visiting every household throughout Belize, a heartfelt thank you. Your willingness to work under what can only be described as harsh conditions and your perseverance in persuading respondents to participate are very much appreciated. We could by no means have done this without you.

Finally, without a population, there cannot be a census. Therefore the Statistical Institute of Belize congratulates all the people of Belize for your cooperation in welcoming the enumerators into your homes and investing the time to respond to the many questions that made up the questionnaire. You are the census. We thank you.

## INTRODUCTION

### ***History of Census-Taking in Belize***

The first recorded population census occurred in Belize in December 1816, and included a count of both the slave and free populations. That was followed by a count of only slaves in 1820, after which there was a count of the entire population every three years until 1835. Following a 26 year 'census drought', the next census was taken in 1861, then at irregular intervals ranging from 11 to 15 years. However, since 1960, Belize has conducted a Population and Housing Census every ten years, the exception being in 1991.

### ***Use of Census Data***

A population census is the single most comprehensive data collection exercise a country can undertake, as it allows the opportunity to garner data from every member of the population on a wide variety of topics. Census data provide government and other decision makers with the bases on which to formulate policies and make long-term plans for the development of the country, especially as it relates to demographic, social and economic issues. In addition to policy makers, the census provides an excellent source of information for non-governmental organizations, business owners, researchers, academicians and the general public. The census serves as the reference point for statistics produced during the intercensal period, and provides the most complete sample frame for household sample surveys.

### ***Legal Authority***

The 2010 Population and Housing Census was conducted under the authority of the Statistical Institute of Belize Act No. 9 (2006), and in accordance with the Census Act, Chapter 155 of the Laws of Belize, Revised Edition 2000. Through a Census Order issued in February 2010, the Hon. Erwin Contreras, Minister responsible for Statistics, declared May 12, 2010 as Census Day.

### ***Methodology***

The 2010 Housing and Population Census followed the *de jure* model, counting all persons who had resided or planned to reside in Belize for at least six months. This includes persons living in households and institutions, whether or not they were present at the time of the enumerator's visit, as well as those persons who were found living on the streets. Excluded from the census were military personnel and their families who were living in military barracks or camps, and members of the diplomatic corps living in residences of the Ambassadors or High Commissioners.

### ***Scope***

Considering that this was the only opportunity to collect data from the entire population for the next ten years, there was an attempt to collect information on the following topics:

#### **The Household Questionnaire**

- Housing
- Emigration
- Agriculture
- Environment
- Crime
- Mortality
- Women in Leadership Positions

## The Person Questionnaire

- General Characteristics (age, sex, religion, ethnicity, language, orphanhood)
- Migration
- Disability and Health
- Education
- Access to the Internet
- Training
- Economic Activity
- Marital and Union Status
- Fertility

### ***Geography***

Belize is the only English-speaking country in Central America, and by virtue of its geographical location and historical background, is a part of both Central America and the Caribbean. The country therefore participates in the activities of the Central American Integration System (SICA) as well as the Caribbean Community (CARICOM). Spanning approximately 8,867 square miles, Belize is bordered on the east by the Caribbean Sea, on the north and north-west by Mexico, and on the west and south by Guatemala.

The country of Belize consists of six major administrative areas or districts: Corozal in the north, Orange Walk in the north-west, Belize in the east, Cayo in the west, Stann Creek in the south-east and Toledo in the south.

Within each of these districts are clearly defined boundaries delineating urban from rural areas. The capital of the country, the City of Belmopan, lies in the Cayo District.

***Definition of Some Concepts used in Census 2010******Household***

A household consists of one or more persons living together, that is, sleeping at least four nights of a week and sharing at least one daily meal. It is not necessary for a household member to be related to the main family, and it is possible that a close family member, for example a spouse or child, may belong to a different household, depending on the living arrangements.

***Household Head***

The head of the household is that person who is acknowledged as such by the other members of the household. For the purpose of the Census, each household must have only one head.

***Dwelling***

A dwelling is any building or separate and independent part of a building where people can live, and can provide accommodation for one or more households. This may be a single house, flat, apartment, out-room, part of a commercial building, or a boarding house catering to less than six persons.

***Average Household Size***

The average household size is the average number of persons who make up a household. This is obtained by dividing the population in a particular area by the number of households in that area.

***Adult and Youth Literacy Rates***

Usually, the adult (15 years or older) and youth (15 to 24 years) literacy rates are best obtained from the result of a literacy survey, and is, in the most basic sense, the proportion of the population in the age group that can read and write. In the absence of a literacy survey, this may be measured "... by means of a proxy variable utilizing the number of years of primary schooling (i.e., 5 or 6 or 8 years of primary schooling equals a 'literate' person)" (Wagner, 2005). This report uses the completion of Standard 5 (seven years of primary education) as the proxy measure for literacy.

***Intercensal Period***

The intercensal period is the time between two consecutive censuses.

## FINDINGS

# Findings

## POPULATION

### Size of the Population

The 2010 Census revealed that there were a total of 324,528 persons living within the borders of the country of Belize. This is comprised of a non-institutional population of 322,453 upon which the bulk of this report is based, 1,957 persons residing in institutions and 118 persons found living on the streets. While in theory the census counts every single person living in Belize, the fact is that there were some persons whom the enumerators were unable to reach, either because they were unavailable for interview or had declined to participate in the exercise, resulting in an undercount of the population. This undercount was estimated at 3.6 percent (11,683 persons), similar to the level of undercount estimated at Census 2000.

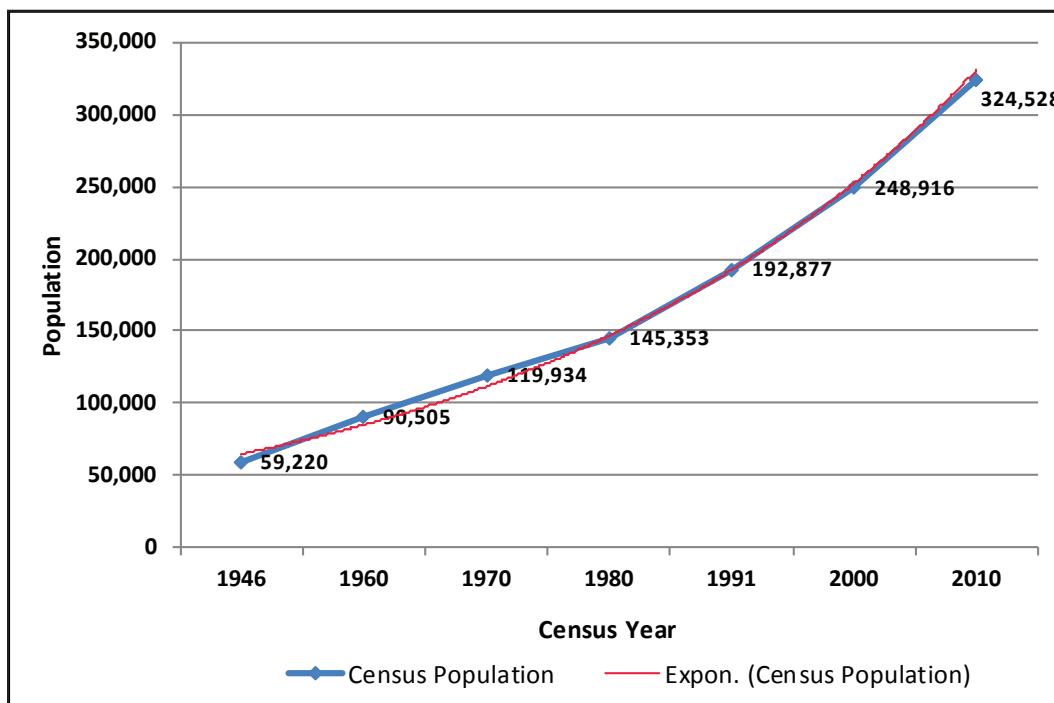

Table 1: Population Change and Average Annual Growth Rates, Belize 1960 to 2010

Year	Census Population	Absolute Change	Intercensal Change (%)	Average Annual Growth Rate (%)
1946	59,220	-	-	-
1960	90,505	31,285	52.8	3.03
1970	119,934	29,429	32.5	2.82
1980	145,353	25,419	21.2	1.90
1991	192,877	47,524	32.7	2.57
2000	248,916	56,039	29.1	2.55
2010	324,528	75,612	30.4	2.65

Table 1 indicates that the 2010 population of 324,528 represents an increase of 30.4 percent or 75,612 persons over the previous census in 2000. During the last intercensal period, the population grew at an average annual rate<sup>1</sup> of 2.65 percent, the highest annual growth rate recorded in Belize since the 1960 – 1970 intercensal period.

Figure 1: Belize Total Population at Census Day, 1946 to 2010

As reflected in Figure 1, the population growth pattern in Belize since 1946 very closely approximates the exponential curve. As a result, in the last 30 years (1980 to 2010) the population has more than doubled. Similarly, doubling occurred in the 31 years between 1960 and 1991 and also between 1970 and 2000. This pattern of the population doubling approximately every 30 years indicates that if Belize's population continues to grow at a rate similar to that of the 2000 to 2010 intercensal period, it will again double, but in 26.1 years<sup>2</sup> (by about the year 2036). This has potentially huge implications for the country's development going forward, and should be given weighty consideration by government in the formulation of social, economic and population policies.

### ***The Homeless***

The 118 persons found living on the streets on Census Night 2010, represents a decrease of 16 percent from the 141 found at Census 2000. Approximately 92 percent (109) of the homeless were situated in urban centers, with the Belize District accounting for 69.5 percent (82), followed by Cayo with 10 percent (12). Corozal had the smallest proportion of homeless persons, at less than 3 percent of the total (3 persons).

## Spatial Distribution of the Household Population

The total household population of 322,453 reflects an increase of 30.8 percent (75,915) over the 2000 population of 246,538. According to Table 2 below, the Cayo District had the largest population increase at 38.5 percent, followed closely by the Belize district at 38.0 percent, and Stann Creek at 36.1 percent. Orange Walk experienced the lowest increase at 14.5 percent.

Table 2: Total Population and Change by Major Administrative Areas, Belize 2000 and 2010

Area	Census 2000	Census 2010	Absolute Change	Percentage Change
<b>Country Total</b>	<b>246,538</b>	<b>322,453</b>	<b>75,915</b>	<b>30.8</b>
Urban	111,973	145,829	33,856	30.2
Rural	134,565	176,624	42,059	31.3
<b>Corozal</b>	<b>33,846</b>	<b>41,061</b>	<b>7,215</b>	<b>21.3</b>
Corozal Town	7,938	10,287	2,349	29.6
Corozal Rural	25,908	30,774	4,866	18.8
<b>Orange Walk</b>	<b>40,132</b>	<b>45,946</b>	<b>5,814</b>	<b>14.5</b>
Orange Walk Town	13,572	13,709	137	1.0
Orange Walk Rural	26,560	32,237	5,677	21.4
<b>Belize</b>	<b>69,041</b>	<b>95,292</b>	<b>26,251</b>	<b>38.0</b>
Belize City	49,456	57,169	7,713	15.6
San Pedro Town	4,267	11,765	7,498	175.7
Belize Rural	15,318	26,358	11,040	72.1
<b>Cayo</b>	<b>54,197</b>	<b>75,046</b>	<b>20,849</b>	<b>38.5</b>
San Ignacio/Santa Elena	13,268	17,878	4,610	34.7
Benque Viejo	5,420	6,148	728	13.4
Belmopan	5,088	13,931	8,843	173.8
Cayo Rural	30,421	37,089	6,668	21.9
<b>Stann Creek</b>	<b>25,228</b>	<b>34,323</b>	<b>9,095</b>	<b>36.1</b>
Dangriga	8,557	9,591	1,034	12.1
Stann Creek Rural	16,671	24,732	8,061	48.4
<b>Toledo</b>	<b>24,094</b>	<b>30,785</b>	<b>6,691</b>	<b>27.8</b>
Punta Gorda	4,407	5,351	944	21.4
Toledo Rural	19,687	25,434	5,747	29.2

The rural population grew by 31.3 percent or 42,059 (from 134,565 to 176,624), compared to the urban population which increased by 30.2 percent or 33,856 (from 111,973 to 145,829).

Across the districts, the urban areas recording the largest growth were San Pedro Town and the City of Belmopan, with the former increasing from 4,267 to 11,765, and the latter from 5,088 to 13,931. On the other hand, the population of Orange Walk Town remained fairly constant, while Dangriga's population grew by 12.1 percent. In the meantime, rural Belize District grew by 72 percent<sup>3</sup> followed by the Stann Creek rural population at 48.4 percent, with Corozal experiencing the smallest rural growth at 18.8 percent.

Figure 2: Proportional Distribution of Population by District, Belize 2000

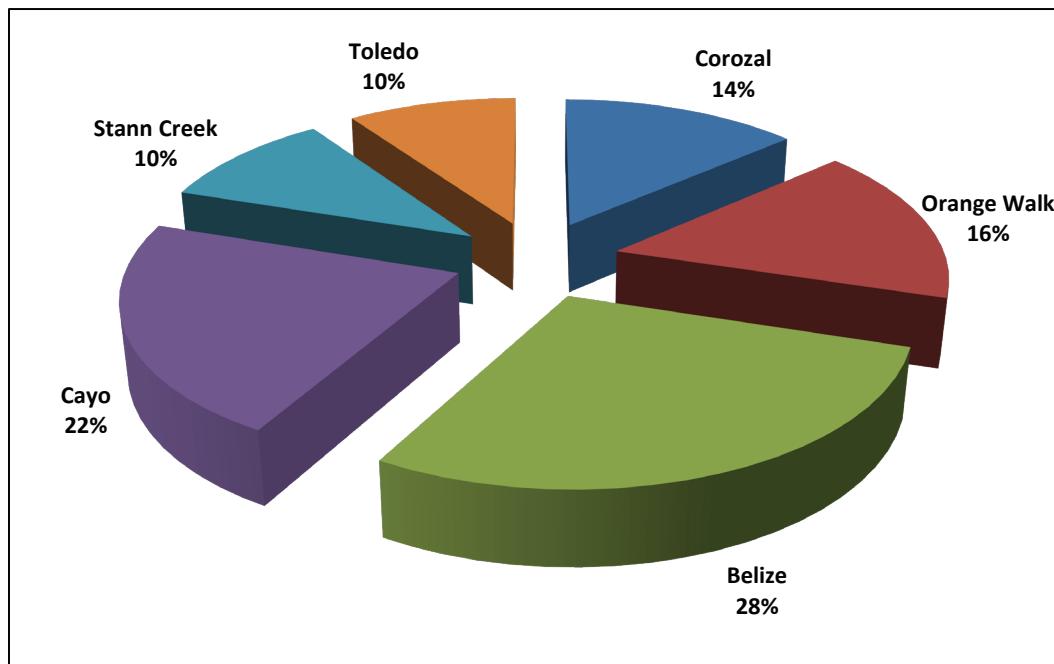

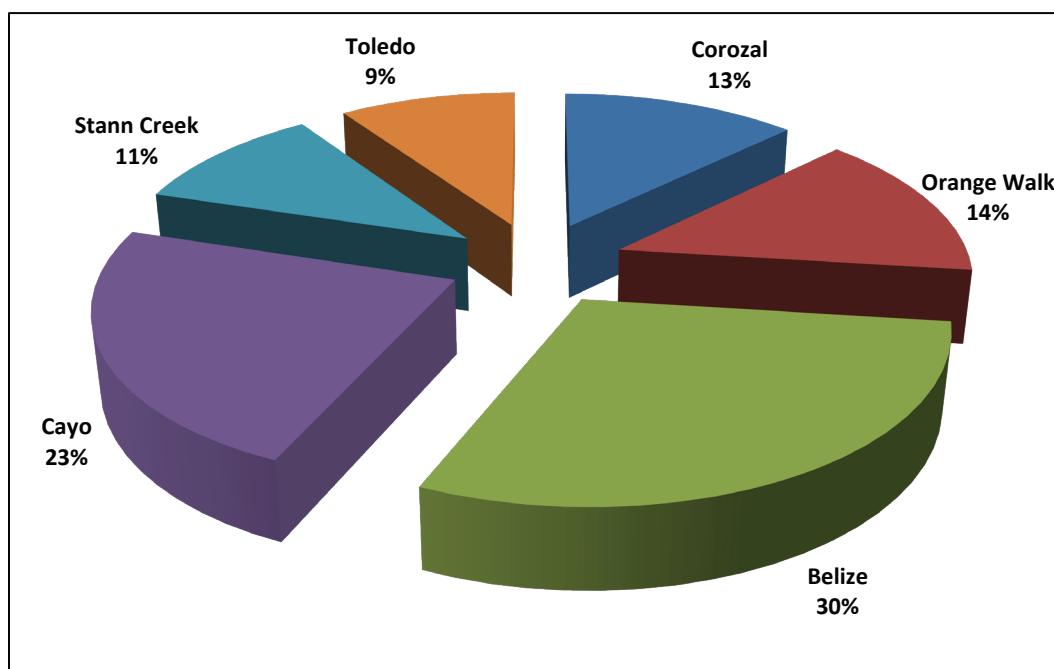

Figure 3: Proportional Distribution of Population by District, Belize 2010

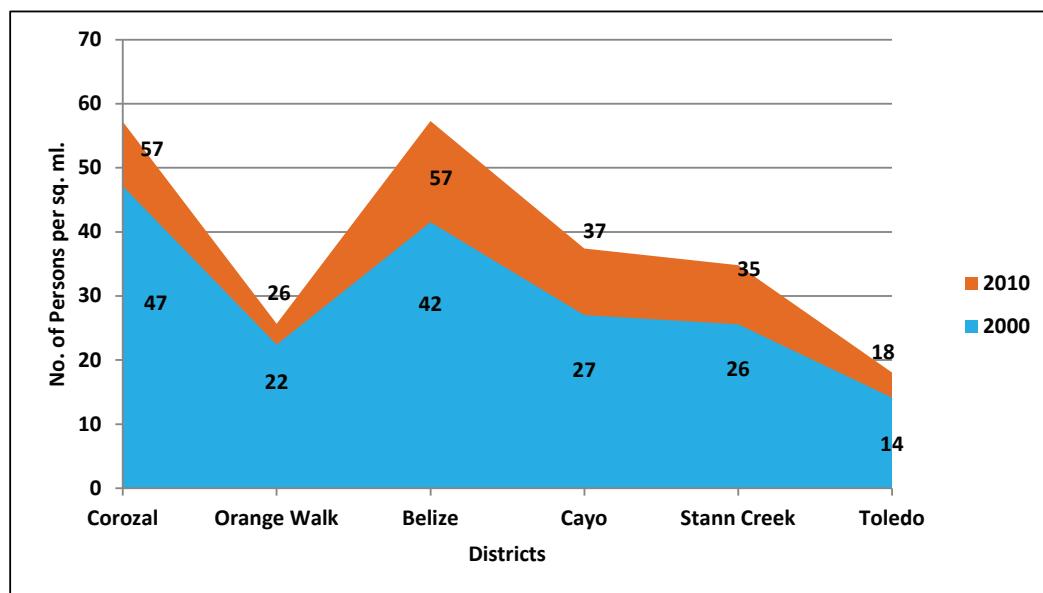

Figures 2 and 3 show how the distribution of the national population has changed between Census 2000 and Census 2010. The Belize District continues to have the highest share of the population at 30 percent, an increase of two percentage points since 2000. This is followed by Cayo with 23 percent and Orange Walk with 14 percent of the population. Toledo, which in 2000 was tied with Stann Creek with 10 percent of the population, now has the smallest proportion of the population at 9 percent.

### Population Density

The country of Belize now has a population density<sup>4</sup> of 36 persons per square mile of land, representing an increase of eight persons per square mile since Census 2000. Figure 4 indicates that ten years ago, Corozal had the highest population density at 47 persons per square mile, however, the Belize District now shares that first place position, with 57 persons per square mile, having the sharpest increase of 15 persons per square mile. Toledo continues to have the lowest population density, at 18 persons per square mile, an increase of four persons since Census 2000, while the Orange Walk District has seen the smallest change in density over the last ten years, moving from 22 to 26 persons per square mile.

Figure 4: Population Densities, Belize 2000 to 2010

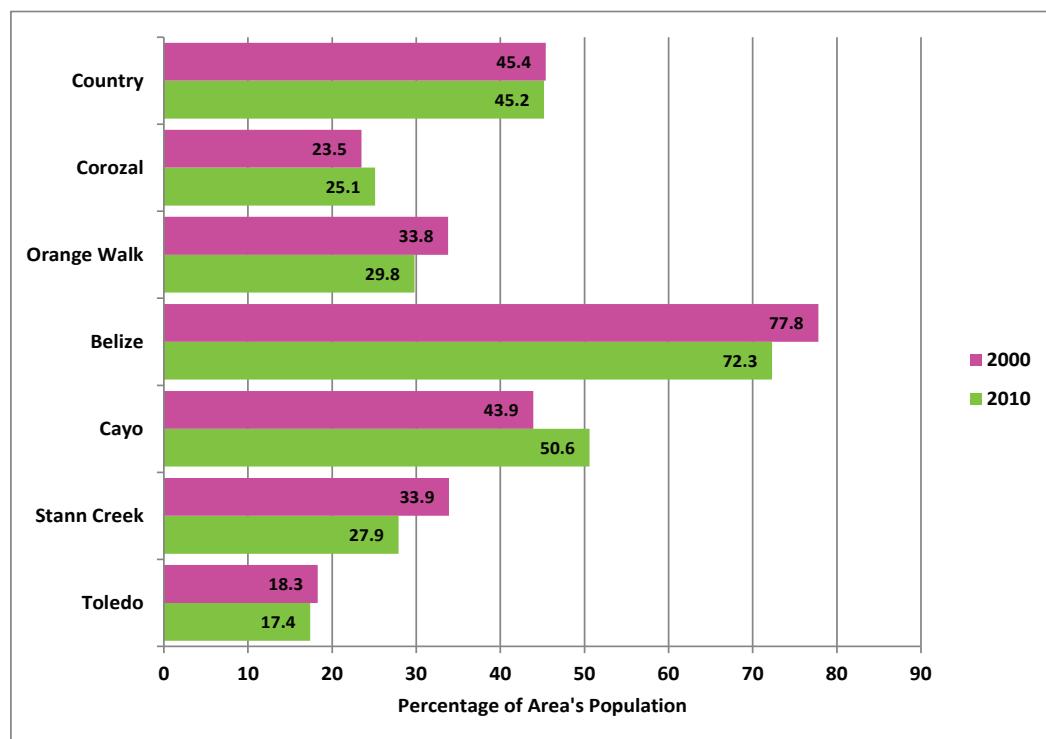

### Urban/Rural Distribution

Within the Central American and Caribbean regions, Belize continues to be among the minority of countries that has a predominantly rural population. Table 3 indicates that 54.8 percent of the total population was living in rural areas in 2010. Changes in the urban-rural composition are more pronounced at the district level, as seen in Figure 5, which indicates that only Corozal and Cayo have experienced an increase in the proportion of population that is urban. Cayo is of special interest, as about a half of its population is now urban (from 43.9 percent in 2000 to 50.6 percent in 2010), due in part to changes in the boundaries of Belmopan to include the San Martin, Salvapan, Maya Mopan and Las Flores areas as part of the city. Although the Belize District continues to have the largest urban population at 72.3 percent, this represents a decline from 77.8 percent in 2000, while Toledo remains the district with the smallest urban population, with a decline from 18.3 to 17.4 percent.

**Table 3: Proportion of Population Living in Urban/Rural Areas, Belize 2000 and 2010**

Area	Census 2000	Census 2010
<b>Country Total</b>	<b>100.0</b>	<b>100.0</b>

**Figure 5: Proportion of Population Living in Urban Areas, Belize 2000 and 2010**

### Households

At Census 2010, there were 79,492 households in Belize, representing a 42.4 percent (23,658) increase over 2000. Figures 6 and 7 indicate that the Belize and Cayo districts together continue to account for more than half the number of households in the country (increasing from 53 percent at Census 2000 to 55 percent at Census 2010), while Toledo remains the district with the smallest proportion of households at about eight percent. Orange Walk is the only district whose share of households has decreased, from 15 percent in 2000 to 13 percent in 2010.

Figure 6: Proportional Distribution of Households by District, Belize 2000

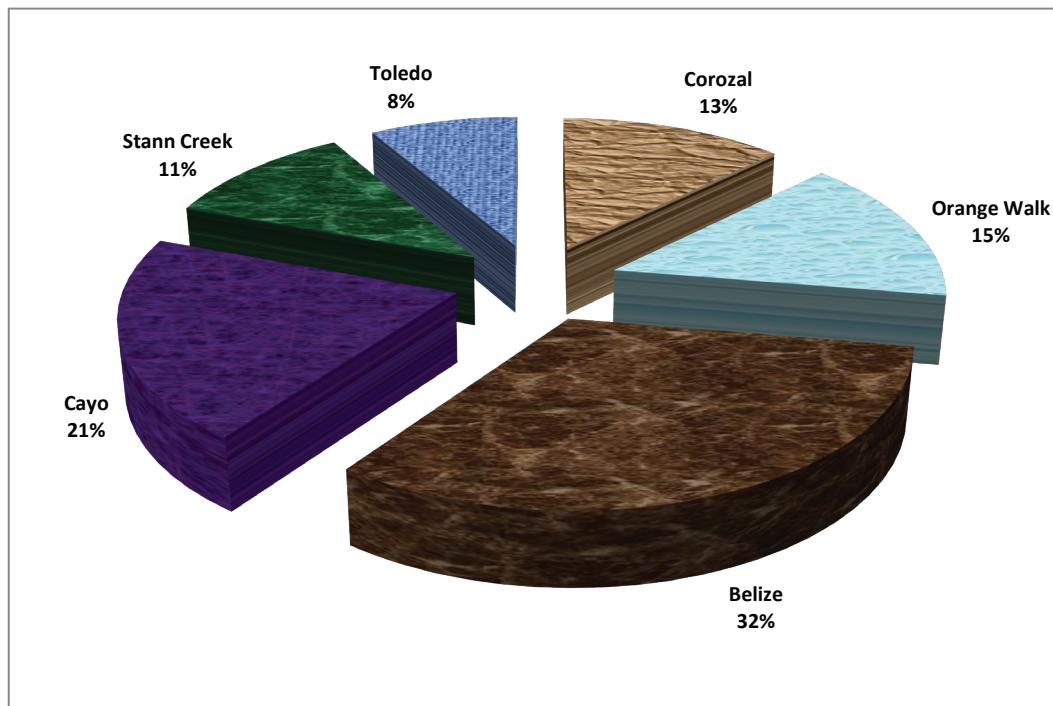

Figure 7: Proportional Distribution of Households by District, Belize 2010

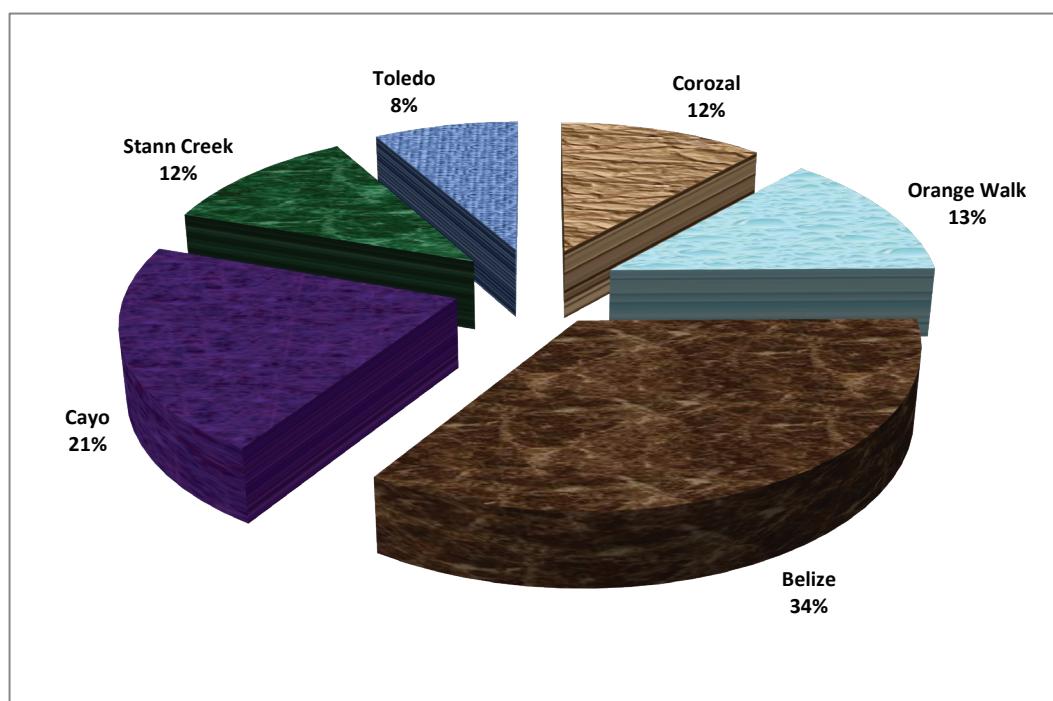

Table 4 indicates that since 2000, the number of households in the Belize District has increased by 50.9 percent, followed by Stann Creek with an increase of 48.3 percent, while Orange Walk experienced the smallest increase at 25.3 percent. Special attention must be drawn to San Pedro Town, where the number of households more than tripled (from 1,248 to 3,769 households) in the last ten years, and to the City of Belmopan, where the number of households increased by more than two and a half times (from 1,335 to 3,463 households). In the case of rural areas, the number of households in rural Belize District almost doubled, increasing from 3,706 in 2000 to 7,351 in 2010. Stann Creek had a 65.3 percent growth (increase of 2,568) in the number of rural households, followed by Toledo with an increase of 41.8 percent or 1,526.

**Table 4: Number of Households by Major Administrative Areas, Average Household Size and Percentage Change, Belize 2000 and 2010**

Area	Census 2000		Census 2010		Absolute Change	Percentage Change

<b>Belize</b>	<b>18,084</b>	<b>3.8</b>	<b>27,282</b>	<b>3.5</b>	<b>9,198</b>	<b>50.9</b>
Belize City	13,130	3.8	16,162	3.5	3,032	23.1
San Pedro Town	1,248	3.4	3,769	3.1	2,521	202.0
Belize Rural	3,706	4.1	7,351	3.6	3,645	98.4
<b>Cayo</b>	<b>11,521</b>	<b>4.7</b>	<b>16,889</b>	<b>4.4</b>	<b>5,368</b>	<b>46.6</b>
San Ignacio/Santa Elena	3,034	4.4	4,351	4.1	1,317	43.4
Benque Viejo	1,174	4.6	1,416	4.3	242	20.6
Belmopan	1,335	3.8	3,463	4.0	2,128	159.4
Cayo Rural	5,978	5.1	7,659	4.8	1,681	28.1
<b>Stann Creek</b>	<b>6,119</b>	<b>4.1</b>	<b>9,074</b>	<b>3.8</b>	<b>2,955</b>	<b>48.3</b>
Dangriga	2,185	3.9	2,572	3.7	387	17.7
Stann Creek Rural	3,934	4.2	6,502	3.8	2,568	65.3
<b>Toledo</b>	<b>4,693</b>	<b>5.1</b>	<b>6,537</b>	<b>4.7</b>	<b>1,844</b>	<b>39.3</b>
Punta Gorda	1,040	4.2	1,358	3.9	318	30.6
Toledo Rural	3,653	5.4	5,179	4.9	1,526	41.8

Household size is a key indicator for examining social issues such as poverty and health, especially as it relates to the risk of exposure to communicable diseases. Table 4 shows that the national average household size decreased from 4.4 persons per household at Census 2000 to 4.1 persons per household in 2010, and that the average household size also decreased in each district. However, except for the Stann Creek and Belize districts at 3.8 and 3.5 persons per household respectively, the average household size of each district is greater than the national average, with Toledo being the highest at 4.7 persons and Corozal, Orange Walk and Cayo tied for second at 4.4 persons per household.

The national average household size in rural areas declined from 4.9 to 4.4 persons per household, compared to urban areas, where the average went from 4.0 to 3.7 persons per household. Rural areas in all districts reported larger average household sizes than the urban areas, with Toledo leading at 4.9 persons per household, followed by Cayo (4.8) and Corozal (4.7), while the Belize District reported the lowest rural average household size at 3.6 persons per household.

Of all the urban areas, San Pedro Town continues to have the smallest average household size at 3.1<sup>5</sup> persons per household (a decrease from 3.4 persons at Census 2000), while Benque Viejo del Carmen recorded the highest, at 4.3 persons. Of note, while the average household size has decreased for all other areas (urban and rural), the City of Belmopan was the only area to experience an increased average household size (from 3.8 persons per household in 2000 to 4.0 persons per household in 2010).

<sup>5</sup> With tourism being its main industry, San Pedro Town depends a lot on persons from the mainland for its labour supply. As a result, many persons from the mainland go to work there without relocating their families, thus increasing the number of single-person households, which directly contributes to the relatively small average household size in this area.

## Age and Sex Composition of the Population

Of the 322,453 household population at Census 2010, a half of them (161,227) are males, resulting in a national sex ratio<sup>6</sup> of 100.0 males for every 100 females in the population. This is a decline from Census 2000, when there were 101.2 males for every 100 females (Table 5), and this trend (of declining sex ratios) is reflected across all districts except Belize, where the sex ratio increased from 94.5 to 96.8 males per 100 females. Similar to the findings at Census 2000, the Belize District has the lowest sex ratio in the country, while Stann Creek has the highest at 107.2, followed by Orange Walk at 102.1 males per 100 females<sup>7</sup>.

Table 5: Population by Major Administrative Area, Sex and Sex Ratio, Belize 2000 and 2010

Area	Census 2000			Census 2010			Sex Ratios	
	Total	Males	Females	Total	Males	Females	2000	2010

Belize Rural	15,318	7,748	7,570	26,355	13,165	13,190	102.4	99.8
<b>Cayo</b>	<b>54,197</b>	<b>27,114</b>	<b>27,083</b>	<b>75,046</b>	<b>37,445</b>	<b>37,601</b>	<b>100.1</b>	<b>99.6</b>
San Ignacio/Santa Elena	13,268	6,464	6,804	17,878	8,751	9,127	95.0	95.9
Benque Viejo	5,420	2,657	2,763	6,140	3,053	3,087	96.2	98.9
Belmopan	5,088	2,429	2,659	13,939	6,779	7,160	91.4	94.7
Cayo Rural	30,421	15,564	14,857	37,089	18,862	18,227	104.8	103.5
<b>Stann Creek</b>	<b>25,228</b>	<b>13,080</b>	<b>12,148</b>	<b>34,324</b>	<b>17,760</b>	<b>16,564</b>	<b>107.7</b>	<b>107.2</b>
Dangriga	8,557	4,176	4,381	9,593	4,617	4,976	95.3	92.8
Stann Creek Rural	16,671	8,904	7,767	24,731	13,143	11,588	114.6	113.4
<b>Toledo</b>	<b>24,094</b>	<b>12,127</b>	<b>11,967</b>	<b>30,785</b>	<b>15,415</b>	<b>15,370</b>	<b>101.3</b>	<b>100.3</b>
Punta Gorda	4,407	2,148	2,259	5,351	2,519	2,832	95.1	88.9
Toledo Rural	19,687	9,979	9,708	25,434	12,896	12,538	102.8	102.9

For the most part, the sex ratio in rural areas continues to be significantly higher than the national sex ratio, and even more so than the sex ratio in urban areas, with the exception being the Belize District. Census 2010 saw the country having a rural sex ratio of 104.2 males for every 100 females (down from 105.7 at Census 2000), compared to 95.1 males per 100 females in urban areas.

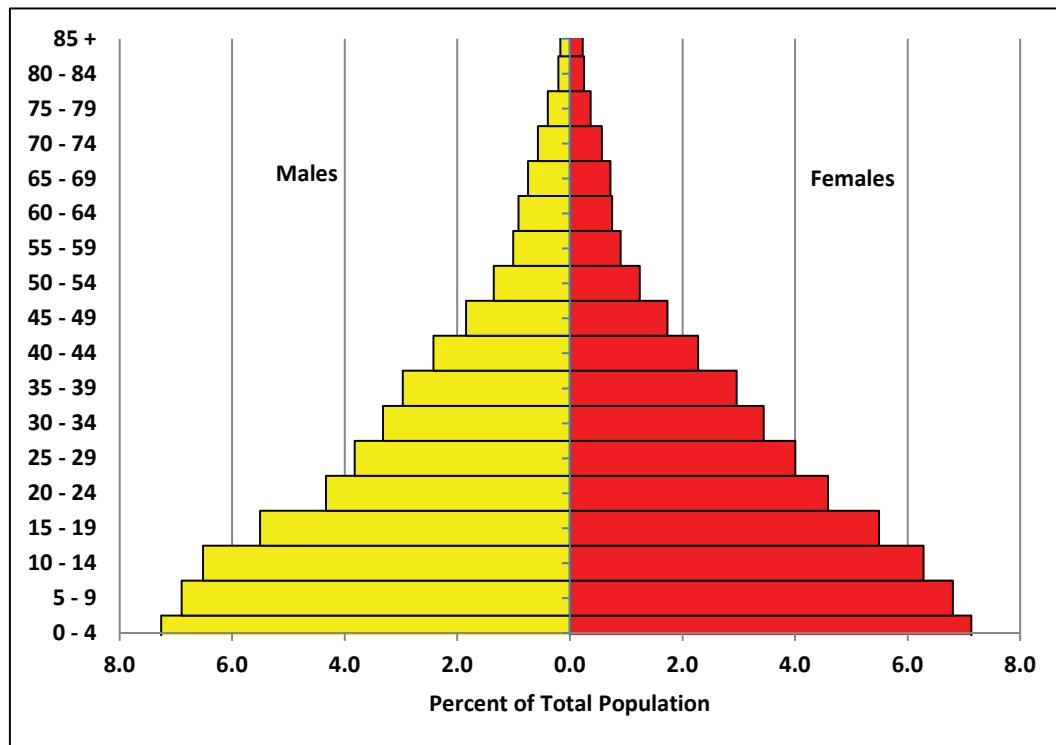

6 Sex Ratio = (Males ÷ Females) × 100

7 The higher sex ratio in Stann Creek and Orange Walk may be as a result of the concentration of the agricultural industry in these districts, and the fact that more males than females tend to gravitate toward agricultural jobs.

Rural Belize District is the only rural area that has less males than females, with a sex ratio of 99.8 males for every 100 females, down from 102.4 at Census 2000. All the other districts have more males than females in the rural area, from a high of 113.4 males for every 100 females in Stann Creek Rural, to a low of 102.7 males per 100 females in Corozal Rural.

On the other hand, San Pedro Town is the only urban area with more males than females, at 105.9 males for every 100 females. The sex ratio in the other urban areas range from a high of 98.9 males per 100 females in Benque Viejo del Carmen to a low of 88.9 males per 100 females in Punta Gorda.

Figure 8: Age and Sex Structure, Belize 2000

The population pyramids in Figures 8 and 9 indicate how the age and sex structure of the Belize population has changed over the last ten years. Between 2000 and 2010, the proportion of both males and females in the age groups under 20 years have contracted, while there has been an increase in the proportion of the population in each of the five-year age groups between 20 and 64 years. This has contributed to an increase in the national median age from 19.1 years at Census 2000 to 21.0 years in 2010 (Table 6), indicating that approximately half the population of Belize is less than 21 years old, which signals a slight ageing of the population.

Figure 9: Age and Sex Structure, Belize 2010

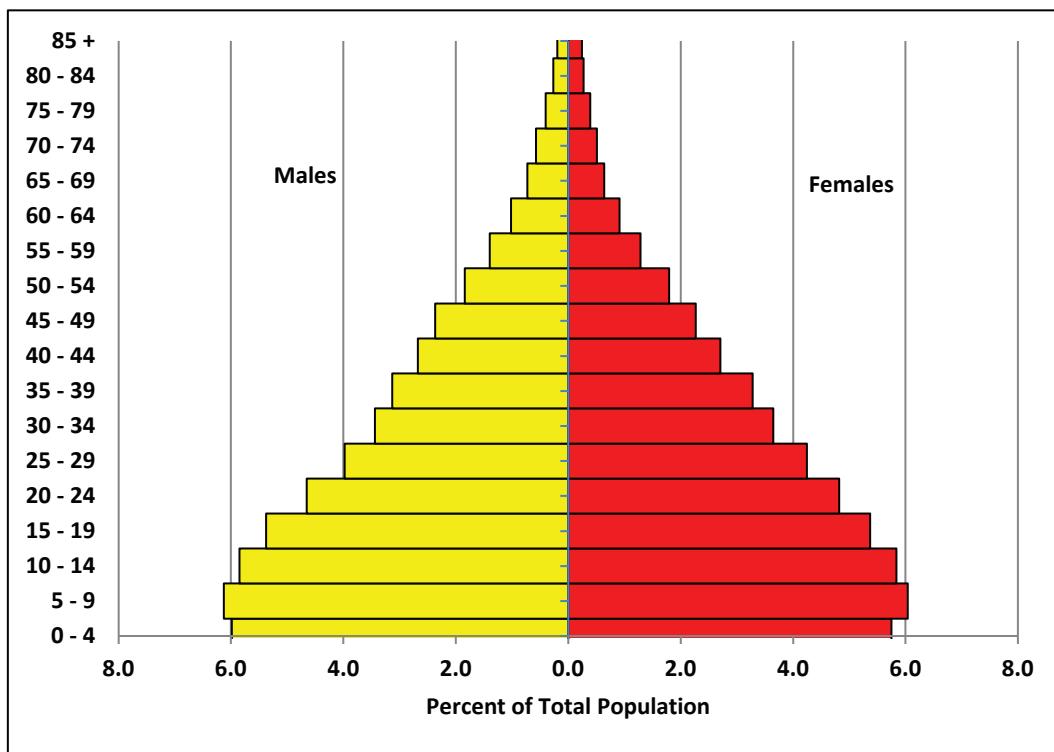

Table 6: Median Age and Age Dependency Ratios, Belize 2000 and 2010

Measure	Census 2000	Census 2010
Median Age (Years)	19.1	21.0
Males	19.0	21.0
Females	19.2	21.0
<b>Age Dependency Ratios (Per 100 Population 15 to 65 years)</b>		
Total	82.2	66.1
Child	74.5	59.1
Aged	7.7	7.0

We further examine changes in the population structure in terms of broad age groups: persons under the age of 15 years, the so-called 'productive' age group or 'working age population' (15 to 64 years), and the aged (65 + years). Figure 10 indicates that the proportion of the population 0 to 14 years has fallen from 41 to 36 percent, while the productive age group has grown from 55 to 60 percent. As seen in Table 6 above, this has resulted in a decline in the Child Dependency Ratio from approximately 75 to 59 dependents per 100 persons of working age, and a change in the Total Dependency Ratio<sup>8</sup> from 82 to 66 dependents per 100 persons of working age.

Further, while Figure 10 suggests that the proportion of the population over the age of 65 years has remained constant at four percent, Table 7 highlights the fact that this population has increased by approximately 30 percent (from 10,483 to 13,587). Additionally, the more vulnerable segment of that population – those who are 80 years and over and are more likely to require specialized care – has grown by 49 percent since 2000, the largest percentage change recorded by any of the broad age groups. This suggests that agencies with responsibility for elderly persons, such as the National Council on Ageing, may need to give additional attention to ensuring that the resources and facilities that will be required to adequately care for our more advanced aged population are being put in place.

Figure 10: Population Age Distribution by Broad Age Groups, Belize 2000 and 2010

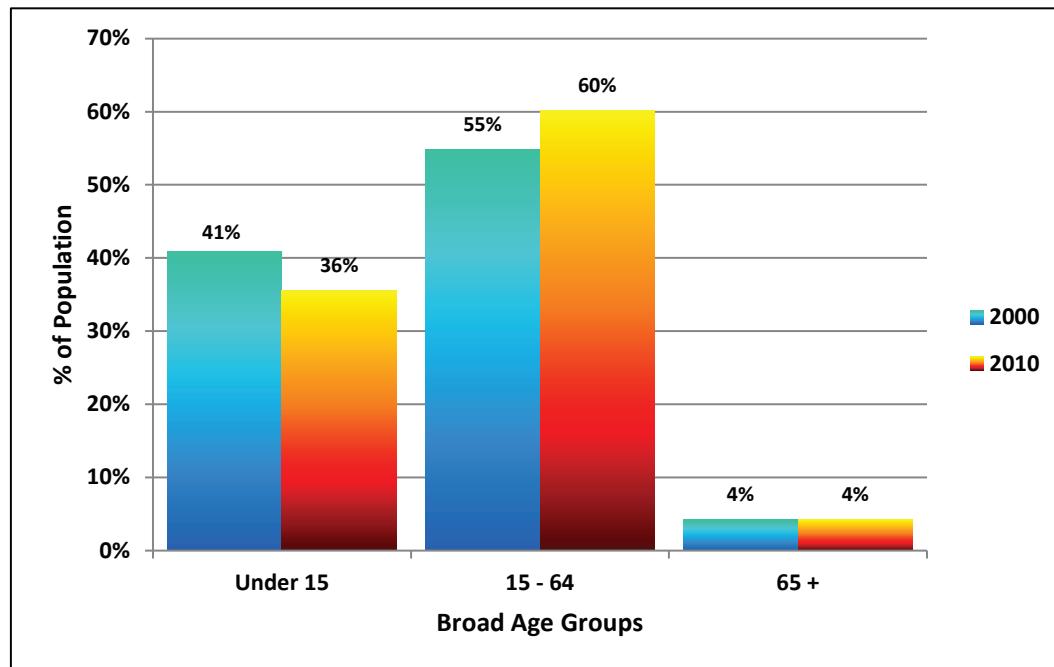

Table 7: Population Change by Special Age Groups, Belize 2000 and 2010

Age Group	Census 2000	Census 2010	Absolute Change	Percentage Change
Under 15	101,791	114,748	12,957	12.7
15 - 24	49,581	65,196	15,615	31.5
15 - 64	136,642	194,105	57,463	42.1
65 +	10,483	13,587	3,104	29.6
80 +	2,106	3,132	1,026	48.7

## Ethnic Groups

For countries such as Belize which are ethnically heterogeneous, ethnicity is a key component in the analysis of demographic trends. Data on ethnic groups are particularly useful to target specific populations for social, economic and health interventions, and there are implications when considering a wide range of socio-economic and demographic characteristics (McKibben, 2004 p.175).

Belize has a wide variety of cultures, and Table 8 shows the proportion of the population claiming to belong to each of the major ethnic groups. Respondents were allowed to indicate membership in up to two ethnic groups, and just over a half (52.9 percent or 170,446) of all Belizeans see themselves as belonging, at least in part, to the Mestizo ethnic group. The second largest ethnic group is the Creole, at 26 percent (83,460) of the population, followed by the Maya at 11.3 percent, who along with the Garifuna (6.1 percent) form the two indigenous groups in Belize.

Table 8: Percentage of Population in each Ethnic Group by District, Belize 2010\*

Ethnic Groups	No of Persons	Percentage of Population	Percentage of Population in District Claiming Ethnic Group					
			Corozal	Orange Walk	Belize	Cayo	Stann Creek	Toledo
Asian (Japanese, Chinese, Taiwanese)	3,316	1.0	0.8	0.8	1.5	1.0	0.9	0.3
Caucasian/White	4,015	1.2	1.0	0.3	1.7	1.3	1.7	1.0
Creole	83,460	25.9	8.0	7.2	56.5	18.5	22.0	5.0

Other	4,010	1.2	0.9	0.5	2.4	0.9	1.0	0.5
Not Stated	845	0.3	0.7	0.3	0.2	0.2	0.2	0.1
<b>Total Population</b>	-	<b>322,453</b>	<b>41,061</b>	<b>45,946</b>	<b>95,292</b>	<b>75,046</b>	<b>34,323</b>	<b>30,785</b>

\*Column percentages will not sum to 100, as some persons claim more than one ethnic group

Table 8 also indicates that the districts of Corozal, Orange Walk and Cayo are predominantly Mestizo, with this ethnic group accounting for approximately four-fifths of the population in the northern districts and about two-thirds of the population in Cayo. Although only 3.6 percent of the national population describe themselves as Mennonites, this is the second largest ethnic group in Orange Walk (11.1 percent), with the largest concentrations living in the villages of Shipyard and Blue Creek. Over one-half (56.5 percent) of the population in the Belize District are Creole, however there is also a strong Mestizo presence (34.5 percent) in this district. On the other hand, two-thirds (66.5 percent) of Toledo's population said that they are of Maya descent, while one-fifth (19.9 percent) claim Mestizo ancestry. Of all the districts, Stann Creek lays claim to being the most culturally diverse, as Creoles (22 percent), Garifuna (27.5 percent), Mayas (16.9 percent) and Mestizos (33.9 percent) are all well-represented.

## Language

Despite English being its official language, only 63 percent of Belize's population over the age of three years speak English well enough to have a conversation, as shown in Table 9 (and the possibility exists that some respondents who indicated they speak English might in fact have been referring to Creole). Spanish is the next most popular language spoken, with more than one half (56.6 percent) of the population reporting that they are able to conduct a conversation in Spanish, and this is followed by Creole, with 44.6 percent. Of note, despite the Garifuna population being almost twice as large as the Mennonite population (Table 8), a larger proportion of the population speaks German (3.2 percent) than Garifuna (2.9 percent).

**Table 9: Percentage of Population Four Years and Older by Language Spoken and District, Belize 2010\***

Languages	Number of Persons	Percentage of Population	Percent of Population in Districts Speaking the Language				
			Corozal	Orange Walk	Belize	Cayo	Stann Creek
Chinese	2,600	0.9	0.7	0.7	1.3	0.8	0.9
Creole	130,467	44.6	18.9	16.8	63.6	39.9	67.4
English	183,903	62.9	54.4	62.2	72.5	66.7	52.0

<b>Population 4 + Yrs.</b>	<b>-</b>	<b>292,263</b>	<b>37,079</b>	<b>41,478</b>	<b>87,486</b>	<b>68,072</b>	<b>31,041</b>
							<b>27,107</b>

\*Percentages will not sum to 100, as some persons speak multiple languages

At the district level, the language most widely spoken in Corozal (84.7 percent), Orange Walk (85.6 percent) and Cayo (71.5 percent) is Spanish, while Toledo has the lowest proportion of Spanish speakers, at 28.2 percent. The Belize District has the highest proportion of English speakers at 72.5 percent, followed by Cayo with 66.7 percent, while Toledo has the lowest at 47.9 percent. The language most widely spoken in the Stann Creek District is Creole, with more than two-thirds (67.4 percent) of the population speaking this language, while English is the second most popular language at 52.0 percent. Some form of the Maya language (Ketchi, Mopan, Yucatec) is spoken by two-thirds of the Toledo population and 16.3 percent of Stann Creek residents.

**Table 10: Percentage of Population Four Years and Older Speaking Selected Languages by Ten-year Age Group, Belize 2010**

Age Group	Population 4 + Years	Languages		
		Creole	English	Spanish
4 - 9	46,868	43.7	48.3	48.3
10 - 19	72,339	48.7	68.9	52.6
20 - 29	57,054	45.7	69.3	59.1
30 - 39	43,519	43.1	64.9	62.0
40 - 49	32,300	42.7	61.8	61.9
50 - 59	20,360	40.7	60.1	60.5
60 +	19,810	39.7	57.9	58.6
Not Stated	13	-	7.7	7.7

With Creole, English and Spanish being the languages most spoken in Belize, Table 10 indicates that a little less than half of Belize's children four to nine years old speak English well enough to have a conversation, while 43.7 percent of this age group are conversant in Creole. Persons 20 to 29 years were most proficient in the English Language, with about seven out of every ten being able to converse in this language.

## Religious Affiliation/Denomination

Table 11 reveals that the population of Belize continues to be predominantly Roman Catholic, with that religion accounting for 40.1 percent (129,456) of the population in 2010, compared to 49.4 percent in 2000. Despite the decline in population share, this represents a 5.2 percent growth in the number of Roman Catholics since Census 2000, and among Christian denominations, it has the second smallest gain in number of members.

Membership in the Salvation Army appears to be on the decline (a reduction of 2.2 percent), and the Methodist Church, while growing by 7.5 percent from 8,801 in 2000 to 9,457 in 2010, also saw its share of the population declining since 2000.

**Table 11: Population by Religious Affiliation/Denomination, Belize 2000 and 2010**

<b>Not Reported</b>	1,489	0.6	2,028	0.6	36.2

†Did not appear as options on the 2000 Census

The number of Jehovah's Witnesses grew by 48.9 percent, from 3,618 members in 2000 to 5,386 at Census 2010, representing the largest growth in membership among Christian denominations. This is followed by the Pentecostal denomination which grew by 47.8 percent since 2000, moving from 18,348 to 27,121 members.

Outside of the Christian religion, membership in Islam more than doubled (133.8 percent), increasing from 266 members at Census 2000 to 622 members at Census 2010. Although such a small group, their share of the population doubled over the intercensal period. Persons not affiliated with any religion/denomination saw their numbers more than double, from 23,304 in 2000 to 49,975 at Census 2010. Among all categories, they accounted for the second largest share of the population, increasing from 9.4 percent to 15.5 percent.

## Birth Registration

The registration of births is one of the key sources of data in studying fertility, one of the most important components of population change. Of the 37,823 children under the age of five years living in Belize at the time of the census, 90.5 percent of them had their birth registered (Table 12). Across districts, the proportion of this age group that had their birth registered ranged from 88.1 percent in Stann Creek to 93.9 percent in Toledo.

Table 12: Birth Registration Status of Children 0 to 4 Years by District, Belize 2010

District	Children 0 to 4 yrs.	Total	Birth Registration Status %		
			Registered	Not Registered	Not Reported
Total	37,823	100.0	90.5	4.4	5.1
Corozal	5,005	100.0	90.4	4.7	4.9
Orange Walk	5,638	100.0	89.7	4.7	5.6
Belize	9,769	100.0	90.9	3.8	5.4
Cayo	8,712	100.0	90.2	4.8	5.0
Stann Creek	4,131	100.0	88.1	5.9	6.1
Toledo	4,568	100.0	93.9	2.9	3.2

Table 13: Children 0 to 4 Years by Place of Registration of Birth and District, Belize 2010

District	Children 0 to 4 yrs.	Total	Place of Birth Registration %					
			Vital Statistics Unit	Magistrate Court	Village Registrar	Hospital	Other	Not Reported
Total	34,241	100.0	28.7	23.2	10.4	31.5	5.2	1.0
Corozal	4,524	100.0	14.1	28.4	19.4	32.2	4.8	1.0
Orange Walk	5,056	100.0	15.6	33.0	16.1	28.7	5.0	1.5
Belize	8,877	100.0	71.9	5.3	0.7	15.6	5.7	0.9
Cayo	7,858	100.0	9.0	38.9	4.1	40.4	6.4	1.2
Stann Creek	3,638	100.0	11.3	29.1	12.9	41.0	5.4	0.4
Toledo	4,288	100.0	20.7	9.6	23.8	42.6	2.6	0.7

Belize offers several avenues through which births can be registered, and Table 13 indicates that hospitals appear to be the most convenient place to register a birth (31.5 percent). This was followed by the Vital Statistics Unit with 28.7 percent and the Magistrate Court with 23.2 percent. Perhaps due to the location of the Vital Statistics Unit in Belize City, that was where the majority of births (71.9 percent) in the Belize District were registered, while Cayo, Stann Creek and Toledo registered about two-fifths of births at a hospital. The Magistrate Court was most heavily utilized as a birth registration center in Cayo (38.9 percent) and Orange Walk (33.0 percent). The Village Registrar, although accounting for only 10.4 percent of birth registration country-wide, was responsible for about a quarter of birth registrations in Toledo, and one-fifth in Corozal. The foregoing suggests that there may be factors beside access that have affected the level of birth registration in the districts.

## Education

Education is a basic human right and is crucial for personal and national development. According to O'Hare, Pollard & Ritualo (2004), "the share of individuals, especially those in younger age groups, enrolled in school is a key indicator of a society's level of socioeconomic advancement".

\*For the 2010 Census, 'formal school' includes pre-school

At Census 2010, one-third (101,655) of the population two years and older was enrolled in the formal education system, with not much difference between the proportion of registered males (32.6 percent) and females (33.6 percent), similar to the situation in 2000.

Although early childhood education is being recognized more and more as one of the primary building blocks for performing well in life, only 27 percent of children aged two to four years were enrolled in school in 2010.

Within this age group, 26.3 percent of males and 27.7 percent of females were enrolled. Although these proportions are low, they almost double the enrolment rates recorded in 2000.

Among children of primary school age (five to twelve years), 95.9 percent were attending formal school, with no notable difference between the proportion of males and females enrolled. This is an improvement over the situation at Census 2000, when 93.7 percent of this age group was enrolled in school.

On the other hand, about three quarters (75.9 percent) of secondary school-aged (13 to 16 years) persons were attending formal school, up from just over two-thirds (68.0 percent) of them in 2000. Compared to 2000, there has been a slight shift in the gender distribution in favour of females, as while the proportions continue to be similar, females (76.4 percent) are now slightly ahead of males (75.5 percent).

### **Primary Enrollment**

The gross enrollment ratio in primary education shows the general level of participation in primary education and is an indication of the country's capacity to facilitate this level of education (International Consultative Forum on Education for All, 1998). Table 15 indicates that at Census 2010, Belize's gross enrollment ratio for primary education<sup>9</sup> was 107.5 percent, and it was higher for males (108.6 percent)

**Table 15: Gross and Net Primary Enrollment Ratios by District and Sex, Belize 2010**

than for females (106.4 percent), suggesting that participation in primary education is high, as is the capacity to accommodate all children of primary school age in school. The gross enrollment ratio ranges from about 103 percent in Corozal and Orange Walk, to about 111 percent in Stann Creek and Toledo. Except for Corozal, there was a higher participation rate among males than females across districts.

On the other hand, the net enrollment ratio in primary education<sup>10</sup> is an indication of the level of participation in primary education among children in the official age group (International Consultative Forum on Education for All, 1998). It is also one of the indicators used to measure the achievement of the Millennium Development Goal (MDG) 2, 'Achieving universal primary education'. At Census 2010, 92.5 percent of children aged five to twelve years were enrolled in primary school, with the Belize and Stann Creek districts having the highest net enrollment ratio of approximately 94 percent, while Orange Walk had the lowest at about 90 percent. The differences between males and females in the primary net enrollment ratio was negligible at both the national and district levels. The shortfall in the proportion of children five to twelve years enrolled in primary education may be due in part to the fact that some children begin school at six or seven years, despite the legal requirement. Additionally, there are children who 'skip' grade(s), hence moving on to high school before attaining the age of twelve years.

### **Secondary Enrollment**

Table 16 indicates that at the secondary education level, at Census 2010 the gross enrollment ratio<sup>11</sup> was 65.1 percent, and it was higher for females (68.6 percent) than for males (61.6 percent). Contrary to the primary enrollment situation, Toledo had one of the lowest rate of participation at the secondary level (53.2 percent), along with Orange Walk (51.0 percent). The Belize District had the highest gross enrollment ratio at 83.3 percent, followed by Stann Creek with 74.3 percent. Except in the cases of Toledo and Corozal, the participation rate was higher among females at the district level.

$$10 \quad NER_p = P_{ep(5-12)} \div P_{5-12} \times 100$$

$$11 \quad GER_s = P_{es} \div P_{13-16} \times 100$$

In terms of the net enrollment ratio<sup>12</sup> at the secondary level, less than one-half (45.5 percent) the population aged 13 to 16 years were enrolled in secondary school, and a greater proportion of females (48.4 percent) than males (42.6 percent) were enrolled. Across districts, Orange Walk and Toledo had the lowest net enrollment ratio at about 36 percent, while the Belize District had the highest ratio at 59.8 percent, with 55.7 percent of males enrolled, compared to 63.8 percent of females. It should be noted that of the total 21,933 children 13 to 16 years old who were enrolled in formal school, only 60% were at the secondary level. The remaining 8,793 were either still in primary school or had already started their Associates Degree.

### ***Children not Enrolled in School***

Under the Laws of Belize, the mandatory school age begins at five years, and children are required to be in school as long as they have not attained their fourteenth year or have not completed primary school. Census 2010 found about 3,000 children 5 to 13 years who were not enrolled in school (Table 17). In terms of distribution by district, 30.6 percent of non-attendees were found in Cayo and 24.1 percent in Orange Walk, while Stann Creek accounted for only eight percent of the non-attendees.

It should be noted that about two-fifths of non-attendees were five years old, and approximately one-tenth were six years old, therefore the possibility exists that these children are late starters, rather than that they will never be sent to school. For example, among the Mennonite communities, children generally begin school at age seven years, rather than at five years. Additionally, about 10 percent of the children not attending school had in fact already completed primary school.

**Table 17: Population 5 to 13 Years Not Enrolled in School by District and Sex, Belize 2010**

District	Total	Non-attendees	Percentage of

Stann Creek	249	8.3	49.0	51.0
Toledo	322	10.7	47.5	52.5

### ***Educational Achievement***

An examination of the educational achievement of the Belizean population 14 years and older revealed that one in five persons (19.9 percent) had not completed the primary level of education (Table 18). The corresponding rates at the district level varied from about 29 percent in Toledo and Orange Walk to 8.7 percent in the Belize District. While the proportion of the population 14 years and older who did not have a primary level of education was equal for males and females at the national level, at the district level, except in the cases of the Belize and Stann Creek districts, the proportion was slightly higher for females than males.

On the other hand, 73 percent of the working-age population had completed at least a primary school education. Both the Belize (87.7 percent) and Stann Creek (74.4 percent) districts exceeded the national rate, while in Toledo, only about three out of every five persons (58.7 percent) of working age had achieved at least a primary level of education.

### Literacy

The MDG 2, to 'Achieve universal primary education', speaks to the target of ensuring "that, by 2015, children everywhere, boys and girls alike, will be able to complete a full course of primary schooling" (UN, 2003), and uses the literacy rate as one of the indicators to measure the achievement of this goal.

For the purpose of this report, persons who have completed at least Standard Five at primary school are considered literate. Table 19 indicates that in 2010, four of every five persons 15 years or older were literate, with females exhibiting a higher rate of literacy (84.1 percent) than males (75.2 percent). The Belize District had the highest rate of adult literacy at 91.4 percent, followed by Stann Creek with 81.3 percent. The adult literacy rate for females in the Belize District was 97.7 percent compared to 84.8 percent for males, while 85.9 percent of females in Stann Creek were literate, as opposed to 77.2 percent of males. Toledo had the lowest adult literacy rate at 69.2 percent.

The national youth literacy rate (population 15 to 24 years) of 88.1 percent reveals that there has been some improvement in the literacy level of the population over the last ten to fifteen years, and the gap between males (86.6 percent) and females (89.6 percent) is much smaller.

At the district level, the pattern of youth literacy is similar to that of adult literacy. Of note, despite the relatively high rates of literacy in the Belize District, the female youth literacy rate (96.9 percent) is slightly lower than the adult female literacy rate (97.7 percent).

Table 19: Adult and Youth Literacy Rates by District and Sex, Belize 2010

### Literacy and Ethnicity

Among ethnic groups, the Lebanese (95.5 percent), Garifuna (94.5 percent) and Creoles (93.5 percent) have the highest adult literacy rates, while only 22.7 percent of Mennonites and 65.5 percent of Ketchi Mayas 15 years and older have completed at least 7 years of primary education. Although for the most part the adult literacy rate is higher among females, Asian, Hindu, Mennonites and Ketchi and Mopan Maya women have a lower literacy rate than their male counterparts.

Additionally, there has been an improvement in literacy among all ethnic groups over the last ten years. Except among the Ketchi and Mopan Mayas, the Mestizos and the Mennonites, the youth literacy rate is upwards of 93 percent.

Table 20: Adult and Youth Literacy Rates by Ethnic Group and Sex, Belize 2010

## Access to the Internet

Information technology plays an increasingly vital role in the planning and execution of activities aimed at growth and development in general, and the ease with which a population can access information oftentimes impacts the efficiency of the implementation of interventions. The Internet represents one of the fastest means of accessing and sharing information, and it is fast becoming a necessary tool for success among all sectors of society. The

number of Internet users is also one of the indicators used to monitor a country's progress in the achievement of Target 8.F under MDG 8, which states "In cooperation with the private sector, make available the benefits of new technologies, especially information and communications" (UN, 2003).

As shown in Table 21, 28.2 percent (80,356) of persons living in Belize five years and older accessed the Internet in the three months leading up to the census, with 84.6 percent of those persons using only a computer and 2.1 percent using only a mobile device. The Belize District had the highest rate of Internet usage at 38.2 percent, followed by Cayo at 29.6 percent, while Toledo had the lowest rate at 16.0 percent. The device of choice was similar across districts, with between 81 and 89 percent of users gaining access via a computer only.

**Table 21: Population Five Years and Older by Device Used to Access the Internet, Belize 2010**

District	Number of Users	Percentage Accessing the Internet	Percentage Using Device			
			Computer Only	Computer & Mobile Device	Mobile Device Only	Not Reported
<b>Total</b>	<b>80,356</b>	<b>28.2</b>	<b>84.6</b>	<b>9.8</b>	<b>2.1</b>	<b>3.6</b>
Corozal	7,680	21.3	84.1	9.0	2.5	4.3
Orange Walk	8,972	22.3	81.6	9.7	2.7	6.0
Belize	32,642	38.2	84.1	11.5	2.5	2.0
Cayo	19,627	29.6	85.6	8.6	1.4	4.4
Stann Creek	7,252	24.0	85.6	7.7	2.0	4.8
Toledo	4,183	16.0	89.1	6.6	1.0	3.3

Figure 11: Internet Access by Five-year Age Group, Belize 2010

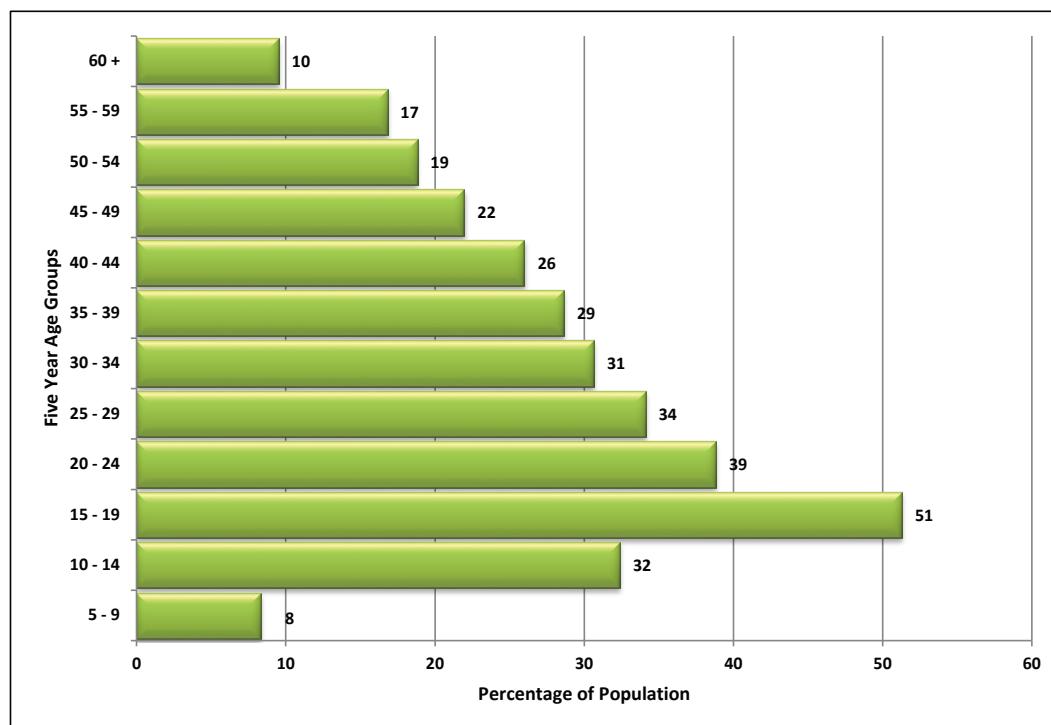

Figure 11 indicates that among the entire population, the rate of Internet access was highest among 15 to 19 year olds at 51 percent. About two out of every five persons 20 to 24 years old had accessed the Internet, while among the 25 to 29 and 10 to 14 years age groups, about one out of every three persons had accessed the Internet. There was a steady decline in the percentage of users as age increased, with only ten percent of the population 60 years and older reporting that they used the Internet during the three-month period.

## Marital and Union Status

The main reason for collecting data on marital status is its importance in the study of the fertility patterns of the population. This data provide a good indication of the age at which women become involved in sexual relations and by extension, become likely to experience childbearing (Newell, 1988). In addition, like in many other countries, children in Belize are often born and families often formed outside of marriage, therefore it is also important to examine data on union status. Marital and union status data also provide information on the formation and dissolution of families and households, and may be used to measure the support systems available to members of the population.

### Marital Status

Table 22 indicates that at Census 2010, almost three of every five persons (57.5 percent) 15 years or older had never been legally married. The proportion of males (59.3 percent) falling into this category is slightly higher than females (55.6 percent), and this pattern (greater proportion of never-married males than never-married females) was constant throughout all the age groups. Among 40 to 44 year olds, about 37 percent had never been married, while almost one of every five persons 65 years and older fell into this category.

About 36 percent of the population was legally married, and the proportion was similar for both males and females. While only two percent of 15 to 19 year olds were married, the proportion of married females (3.3 percent) in this age group was almost five times that of married males (0.7 percent). Among persons 15 to 39 years, the proportion of married females was greater than that of married males in each age group, however above that age group, there was an increasingly greater proportion of married males than married females, and by age 65, only 39.2 percent of females were married, compared to 61.2 percent of males.

Although only about 6 percent of the total population 15 years and older had been divorced, legally separated or widowed, the proportion of females is almost twice that of males in each age group. Among the 65 years and older population, about one out of every three persons were either divorced, legally separated or widowed – one in five men and two in five women.

As indicated in Table 23, the Stann Creek and Belize districts had the highest proportion of never-married persons, with about two out of every three persons falling into this category, and Corozal was the only district where less than half the population had never married, at 47.6 percent.

Corozal had the highest proportion of married persons (45.5 percent), followed by Orange Walk with 43.7 percent, while only about three of every ten persons in the Stann Creek and Belize districts were married. Toledo and Corozal had the highest proportion of married 15 to 19 year olds.

The Corozal, Cayo and Belize districts had the highest proportion of persons 65 years and older (approximately a third of the population in that age group) who were either divorced, widowed or legally separated.

### **Union Status**

Tables 24 and 25 summarize the population's union status situation at Census 2010. Almost two of every five persons (37.1 percent) 15 years and older were not in any type of union. Among persons 15 to 29 years, a greater proportion of males than females were not in a union, however, from 35 years, a greater proportion of females than males were single. About 46 percent of persons aged 65 and older were not in any union, with quite a large gap between the proportion of males (32.9 percent) and the proportion of females (59.6 percent).

One-third of the population 15 years and older was married and living with their spouse, while another 23 percent were engaged in a common-law arrangement. While only about eight percent of persons 15 to 19 years old reported that they were in a common-law relationship, the proportion of females (13.1 percent) was more than three times that of males (3.7 percent). About six percent of the population reported that they were involved in a visiting partner relationship, with the 20 to 24 age group having the highest proportion in this category, at 12.2 percent.

About two out of every five persons in Corozal and Orange Walk were married and living with their spouse, compared to about one-quarter of the Stann Creek population. Stann Creek had the highest proportion of persons in a common-law relationship (29.7 percent), while Corozal had the lowest at 18.5 percent.

The Belize District (11.7 percent), followed by Stann Creek (8.5 percent), had the highest proportion of persons in visiting-partner relationships, while less than two percent of the Orange Walk and Corozal populations fell into this category.

## The Foreign-Born Population

In countries like Belize where border control poses a major challenge, it is extremely difficult to collect information on the number and characteristics of immigrants. As such, census data on the foreign-born population provides the closest approximation of the immigration situation, despite the possibility of some illegal immigrants eluding the census takers.

### Place of Residence and Country of Birth

The following provides a snapshot of the characteristics of immigrants in Belize at Census 2010. It was found that 14.2 percent (45,723) of Belize's population was born abroad, compared to 14.7 percent (36,642) in 2000, representing a growth of 19.9 percent in this population. As indicated in Table 26, almost a third (32.1 percent) of the foreign-born population live in Cayo, while a quarter (25.2 percent) of them live in the Belize District. Corozal continues to have the smallest proportion of immigrants at 7.3 percent.

The most popular countries of origin are listed in Table 27, which shows that about two-fifths (41.3 percent) of all immigrants were born in Guatemala, followed by El Salvador (15.5 percent) and Honduras (15.3 percent). The share of immigrants from Mexico has decreased from 6.8 to 4.9 percent, while the proportion from the United States of America has grown from 5.1 to 6.2 percent.

**Table 26: Foreign-Born Population by District of Residence, Belize 2000 and 2010**

District	Census 2000 (%)	Census 2010 (%)
Population	36,642	45,723
<b>Total</b>	<b>14.7</b>	<b>14.2</b>
Corozal	7.9	7.3
Orange Walk	13.4	10.8
Belize	22.8	25.2

<b>Not Reported</b>	-	0.6
<b>Total</b>	100.0	100.0
<b>Population</b>	<b>36,642</b>	<b>45,723</b>

### Age and Sex

Table 28 indicates that the foreign-born population is almost equally distributed between the sexes. More than four-fifths (38,175 or 83.5 percent) of this population falls within the productive age group (15 to 64 years), while only one-tenth (4,632) are children 0 to 14 years old.

**Table 28: Foreign-Born Population by Broad Age Groups and Sex, Belize 2010**

Age Groups	Total	Males	Females
Total	45,723	22,841	22,882
0 - 14	4,632	2,293	2,339
15 - 64	38,175	18,819	19,356
65 +	2,915	1,728	1,187
Not Stated	1	1	-

### Educational Achievement

Table 29 examines the educational achievement of foreign-born persons who are at least 14 years old. More than a quarter (26.6 percent) of them had not completed a primary education, while 10.8 percent had at least an associate degree. Almost a half (48.4 percent) of the immigrants from Mexico had not completed a primary education, while more than a third (35.4 percent) of those from Guatemala fall into this category. Among those immigrants who had achieved only a primary level education,

**Table 29: Proportion of Foreign-Born Population 14 Years and Over by Country of Birth and Highest Level of Formal Education Completed, Belize 2010**

Country of Birth	Population	Total	Less than Primary			Post Secondary/Tertiary		Not Reported	
			Primary	Secondary	Tertiary	Other	Reported

Not Reported	237	100.0	4.6	21.5	21.9	44.7	1.7	5.5	

the Hondurans and Nicaraguans are most represented at 48.4 and 36.6 percent, respectively. At the same time, 45.3 percent of Americans and 44.4 percent of Indians have achieved at least an Associate degree, and among immigrants from countries other than those listed in the table, 42.8 percent had at least an Associate degree.

## Household Composition

Households consisted mainly of a head, a spouse and their children, as indicated in Table 30. About 18 percent or 27,522 of the children were at least 20 years old. Factors contributing to the high proportion of grown children in the parental home could include the cost of higher education, growing housing costs, lack of employment or the dissolution of families resulting from divorces (Setterson, 1988; Da Vanzo & Goldscheider, 1990), as well as cultural norms.

After children and household heads, the next largest category of household members was the spouses/partners at 16 percent, followed by grandchildren which accounted for 5.6 percent of household members.

**Table 30: Distribution of Population by Relationship to Household Head, Belize 2010**

Relationship to Household Head	Total	Percent
<b>Total</b>	<b>322,453</b>	<b>100.0</b>

## HOUSING CHARACTERISTICS

Data from housing censuses are used mainly as a basis for the development of housing and land-use policies, the evaluation of the adequacy of the housing stock to inform plans for the housing market, as well as to facilitate studies of the living conditions of the general populace. Furthermore, the type and quality of housing affects the health, social and general outlook of the population, hence the need for interventions based on housing data (UN, 2007).

### Type, Tenure and Age of Dwellings

The 2010 Population and Housing Census found that about four of every five households (82.3 percent) occupy an undivided private house, similar to the situation (83.7 percent) found at Census 2000. As indicated in Table 32, Corozal and Orange Walk had the highest proportion of households in this category at 90 and 88 percent, respectively, while approximately three-quarters of households in the Belize District occupied undivided private houses. The Belize District had the highest proportion of households living in flats/apartments/condominiums (12.4 percent), and 14.0 percent of Stann Creek's households occupied other dwelling types such as barracks and 'combined business and dwelling'.

**Table 32: Proportion of Households by District and Type of Dwelling Occupied, Belize 2010**

District	Number of Households	Total	Type of Dwelling				
			Undivided Private House	Part of Private House	Flat/ Apartment/ Condominium	Other	Not Reported
<b>Country Total</b>	<b>79,492</b>	<b>100.0</b>	<b>82.3</b>	<b>5.7</b>	<b>5.3</b>	<b>6.5</b>	<b>0.1</b>
Corozal	9,258	100.0	90.0	4.0	1.3	4.5	0.3
Orange Walk	10,452	100.0	88.1	5.9	1.2	4.7	0.1
Belize	27,281	100.0	74.6	7.3	12.4	5.6	0.1
Cayo	16,889	100.0	85.6	6.2	2.4	5.8	0.1
Stann Creek	9,074	100.0	81.7	3.0	1.2	14.0	0.1
Toledo	6,538	100.0	86.5	4.3	1.7	7.5	0.1

Across the country, a half of all households owned their dwellings free and clear, and another 13.9 percent had a home mortgage (Table 33). Toledo had the highest rate of home-ownership (67.6 percent), followed by Corozal with 60.2 percent. Only 38.6 percent of households in the Belize District owned their dwelling free and clear, while 16.2 percent had a mortgage. The Belize District had the highest rate of rental at 34.1 percent, compared to about 12 percent of households in Toledo and Corozal.

**Table 33: Proportion of Households by District and Tenure of Dwelling Unit, Belize 2010**

District	Number of Households	Total	Type of Dwelling Tenure					Not Reported
			Owned with Mortgage	Owned without Mortgage	Renting	Rent-free	Other	
<b>Country Total</b>	<b>79,492</b>	<b>100.0</b>	<b>13.9</b>	<b>50.4</b>	<b>22.3</b>	<b>11.1</b>	<b>2.1</b>	<b>0.3</b>
Corozal	9,258	100.0	13.0	60.2	12.3	9.6	4.5	0.5
Orange Walk	10,452	100.0	14.3	59.4	13.3	9.6	3.0	0.3
Belize	27,281	100.0	16.2	38.6	34.1	9.6	1.2	0.3
Cayo	16,889	100.0	14.7	53.2	19.7	10.3	1.8	0.3
Stann Creek	9,074	100.0	9.5	47.4	20.2	21.5	1.3	0.2
Toledo	6,538	100.0	9.1	67.6	11.6	9.0	2.6	0.1

Among households owning their home (with or without a mortgage), two-thirds owned the land on which the dwelling unit was located, while about a quarter had their dwellings on leased land (Table 34). Land ownership ranged from a low of 53.2 percent in Toledo<sup>13</sup> to a high of 77.4 percent in the Belize District. Orange Walk had the highest proportion of households on leased land at 32.3 percent, followed by Cayo with 30.0 percent<sup>14</sup>.

**Table 34: Proportion of Households with Owned Dwelling Unit by District and Land Tenure, Belize 2010**

District	Number of Households	Type of Land Tenure				
		Total	Owned	Leasehold	Other	Not Reported
Country Total	51,066	100.0	66.0	24.6	8.5	0.9
Corozal	6,769	100.0	66.0	28.9	4.0	1.1
Orange Walk	7,710	100.0	60.6	32.3	6.3	0.8
Belize	14,945	100.0	77.4	17.0	4.5	1.0
Cayo	11,474	100.0	61.1	30.0	7.8	1.1
Stann Creek	5,156	100.0	64.5	28.7	6.2	0.6
Toledo	5,012	100.0	53.2	12.8	33.5	0.5

Table 35 indicates the age of dwelling units occupied by their owners. Approximately 15 percent of these dwellings were built more than 30 years ago, almost a half (48.3 percent) were built between 1990 and 2005, and only 17.7 percent were less than five years old. Corozal had the highest proportion of dwellings built before 1980 (20.0 percent), while only four percent of the dwellings in Toledo were that old. About two-thirds of the owner-occupied dwellings in Toledo were less than ten years old<sup>15</sup>, followed by Stann Creek with 49 percent of dwellings falling into this combined category. The Belize and northern districts had the lowest proportion of dwellings built in the last ten years, at around 36 percent.

**Table 35: Proportion of Households with Owned Dwelling Unit by District and Year Dwelling was Built, Belize 2010**

District	Number of Households	Total	Year Dwelling was Built					
			Before 1980	1980 to 1989	1990 to 1999	2000 to 2005	2006 to 2010	Not Reported
Country Total	51,066	100.0	14.8	11.9	24.3	24.0	17.7	7.3
Corozal	6,769	100.0	20.0	15.5	23.0	20.5	15.3	5.7
Orange Walk	7,710	100.0	18.9	14.2	24.5	20.7	16.4	5.4
Belize	14,945	100.0	15.3	13.6	26.9	22.4	13.2	8.7
Cayo	11,474	100.0	14.3	9.8	25.1	23.7	18.1	8.9
Stann Creek	5,156	100.0	11.6	8.8	25.1	28.9	20.5	5.2
Toledo	5,012	100.0	4.0	6.5	15.2	34.7	32.8	6.7

<sup>13</sup> Majority of households in Toledo that do not have secure land tenure is due in part to the cultural practice of living on reservation land.

<sup>14</sup> Included in the 'Other' category in Table 33 are households that erected their dwellings on either squatted or reservation land. Although only about two percent of households in the country built their dwelling unit on squatted land, it should be noted that 34 percent of these households are in Toledo, while about a quarter of them are located in the Belize and Cayo districts. Additionally, about 24 percent of Toledo households are on reservation land, representing 98 percent of all households on reservation land across the country.

<sup>15</sup> The high proportion of 'new' dwellings in Toledo is probably due to the fact that three-fifths of dwellings are constructed of wood and about three-tenths are thatched, thus making them relatively easy to replace.

### Construction Material of Dwelling Units

Census 2010 found that at the national level, the most popular materials for constructing the outer walls of dwelling units were concrete/brick (50.8 percent) and wood (33.6 percent). However, as shown in Table 36, at the district level, the percentage of households constructing their dwelling from concrete/brick ranged from a low of 31.6 percent in Toledo to a high of 64.8 percent in Corozal. About three of every five dwellings (61.7 percent) in Toledo were constructed of wood, while only 16 percent of the households in Corozal used wood as their main outer wall material.

Table 36: Proportion of Households by District and Main Material of Outer Walls of Dwelling Unit, Belize 2010

Toledo	6,538	100.0	64.5	5.3	29.1	0.9	0.1		

Table 37 indicates that four of every five households (81.0 percent) in Belize used sheet metal as the roofing material of choice, and another 12.5 percent used concrete. Corozal had the highest proportion of concrete roof (37.5 percent) followed by Orange Walk (16.4 percent). About nine out of every ten households in the Cayo and Belize districts had sheet metal on the roof of their dwellings, while about three out of every five households in Corozal and Toledo fell into this category. While only four percent of the country's households used thatch as the main roofing material, this was the main roofing material of 29.1 percent of households in Toledo.

Table 38 indicates that countrywide, approximately two-thirds of households had concrete as the main flooring material, while approximately a quarter had wooden floors. Corozal and Orange Walk had the highest percentage of households with concrete flooring at 88.4 and 80.0 percent respectively, while only 53.6 percent of Stann Creek's households had concrete floors. Stann Creek had the highest proportion of households with wooden floors (42.2 percent) followed by the Belize District with 34.0 percent, compared to only eight percent of households in Corozal. Although only approximately four percent of the country's households have earth/sand as their main flooring material, this is the main flooring material of almost a quarter (23.8 percent) of the households in Toledo.

<b>Cayo</b>	<b>7,805</b>	100.0	35.3	24.3	40.0	0.4
<b>Stann Creek</b>	<b>3,711</b>	100.0	41.3	18.4	40.1	0.2
<b>Toledo</b>	<b>2,610</b>	100.0	35.5	20.5	43.6	0.5

In terms of the perceived state of repair of the nation's housing stock, 46.1 percent (36,619) of households indicated that their dwelling is in need of some kind of repairs. According to Table 39, about one-half of households in Orange Walk (5,682) and Corozal (4,708) reported that their dwellings needed repairs, while about 40 percent of those in the southern districts thought repairs were needed. Of the dwellings perceived as requiring repairs, 39 percent were reported as requiring major repairs or as irreparable, while another 25 percent require moderate repairs. Toledo had the highest proportion of households reporting that their dwellings either needed major repairs or were irreparable (43.6 percent).

## Sanitary Facilities and Household Utilities

The availability, adequacy and location of sanitary facilities such as toilets, bathing and cooking facilities, garbage disposal methods, as well as ready access to potable water, have implications for the health and well-being of everyone, especially as it relates to the control/elimination of contagious and water-borne diseases.

## Cooking Facility and Fuel

Across the country, 78.6 percent of households had their kitchen inside their dwelling (Table 40), and another six percent had a kitchenette or other cooking space inside. Within the Belize District, 91.3 percent of households had their cooking space inside the dwelling, followed by Cayo with 84.9 percent, compared to only three-quarters of the households in Toledo. About one-fifth of the households in Toledo and Corozal had their main cooking facility outside the dwelling, but only 2.5 percent of households in the Belize District cooked outside.

**Table 40: Proportion of Households by District and Type of Cooking Facility, Belize 2010**

District	Number of Households	Total	Type of Cooking Facility				
			Kitchen in Dwelling	Other Cooking Space in Dwelling	Cooking Space Outside Dwelling	No Cooking Space	Not Reported
<b>Country Total</b>	<b>79,492</b>	<b>100.0</b>	<b>78.6</b>	<b>5.8</b>	<b>11.1</b>	<b>4.1</b>	<b>0.4</b>
Corozal	9,258	100.0	74.1	4.8	19.1	1.5	0.6
Orange Walk	10,452	100.0	74.0	5.4	17.8	2.3	0.4
Belize	27,281	100.0	84.2	7.1	2.5	5.9	0.4
Cayo	16,889	100.0	80.4	4.5	13.1	1.5	0.4
Stann Creek	9,074	100.0	77.5	3.6	10.8	7.7	0.4
Toledo	6,538	100.0	65.9	9.4	19.8	4.6	0.2

**Table 41: Proportion of Households by District and Type of Cooking Fuel, Belize 2010**

District	Number of Households	Total	Type of Cooking Fuel			
			Wood/Charcoal	Butane/Biogas	Other	Not Reported
<b>Country Total</b>	<b>75,932</b>	<b>100.0</b>	<b>14.8</b>	<b>83.1</b>	<b>1.9</b>	<b>0.2</b>
Corozal	9,067	100.0	24.4	74.5	1.0	0.2
Orange Walk	10,172	100.0	18.4	80.7	0.7	0.1
Belize	25,577	100.0	2.2	94.6	2.9	0.3
Cayo	16,560	100.0	15.0	83.4	1.5	0.1
Stann Creek	8,338	100.0	11.2	85.8	2.8	0.2
Toledo	6,218	100.0	51.2	47.5	1.2	0.1

One of the indicators used to measure progress in MDG 7, “Ensure environmental sustainability”, is the proportion of the population using solid fuels for cooking. Table 41 indicates that overall, 83.1 percent of households in the country of Belize use liquid petroleum gas (LPG) or bio-gas as the main fuel for cooking, with as much as 94.6 percent of households in the Belize District falling into this category. In the other districts, 74 to 86 percent of households use LPG or biogas, except for Toledo, where less than half the households (47.5 percent) use any of these. While on average about 15 percent of the country’s households use wood or charcoal as the main type of fuel for cooking, as much as 51.2 percent of Toledo households and 24.4 percent of Corozal households use this type of fuel, compared to only 2.2 percent of households in the Belize District.

### ***Garbage Disposal***

According to Table 42, municipal collection (48.3 percent) is the method of garbage disposal most used by households in Belize. The proportion of households using this method is highest in the districts of Belize (65.9 percent) and Cayo (52.5 percent), and lowest in Toledo (21.6 percent). Another ten percent of households had their garbage collected by a private garbage disposal company, and the Stann Creek and Belize districts had the highest proportion of households utilizing this private service, at 14.8 and 11.2 percent, respectively. Across the country, about 27 percent of households burn their garbage, but the proportion of households using this method in Toledo is almost twice the national average.

**Table 42: Proportion of Households by District and Method of Garbage Disposal, Belize 2010**

District	Number of Households	Total	Method of Garbage Disposal					Not Reported
			Take to Dumpsite	Burn	Municipal Collection	Private Garbage Truck	Other	
<b>Country Total</b>	<b>79,492</b>	<b>100.0</b>	<b>10.5</b>	<b>26.9</b>	<b>48.3</b>	<b>9.5</b>	<b>4.5</b>	<b>0.4</b>
<b>Corozal</b>	<b>9,258</b>	100.0	23.4	36.5	28.4	8.7	2.6	0.5
<b>Orange Walk</b>	<b>10,452</b>	100.0	21.3	39.4	33.0	2.4	3.4	0.4
<b>Belize</b>	<b>27,281</b>	100.0	4.1	13.8	65.9	11.2	4.6	0.4
<b>Cayo</b>	<b>16,889</b>	100.0	6.5	27.8	52.5	9.9	2.9	0.4
<b>Stann Creek</b>	<b>9,074</b>	100.0	10.3	22.2	45.2	14.8	7.2	0.4
<b>Toledo</b>	<b>6,538</b>	100.0	11.9	51.7	21.6	5.9	8.7	0.2

### ***Sanitation and Bathing Facilities***

The proportion of the population using an improved sanitation facility is another one of the indicators used to measure progress under MDG 7, and since 1990, Belize has halved the proportion of the population without access to basic sanitation.

As shown in Table 43, on average two out of three households in Belize usually use a flush toilet. At the district level, the proportion of households using a flush toilet ranges from a high of 91.5 percent in the Belize District, to a low of 27.8 percent in Toledo. The other main type of toilet used by households is the pit latrine, at 30.6 percent countrywide. However, more than a

half (56.8 percent) of Toledo households and about a half of Orange Walk households (49.9 percent) use a pit latrine, compared to a mere five percent of households in the Belize District. Although only about three percent of households in the country reported not having any toilet, about 15 percent of the households in Toledo are without this very important facility. Bearing in mind that the absence of an adequate method to dispose of human excreta is a key factor in the spread of diseases such as cholera, diarrhea and worm infections, this is an area for immediate intervention by policy makers.

Table 43: Proportion of Households by District and Main Type of Toilet Facility, Belize 2010

District	Number of Households	Type of Toilet						Not Reported
		Total	Flush Toilet	Pit Latrine	Other	None		
<b>Country Total</b>	<b>79,492</b>	<b>100.0</b>	<b>65.8</b>	<b>30.6</b>	<b>0.5</b>	<b>2.9</b>		<b>0.3</b>
<b>Corozal</b>	<b>9,258</b>	<b>100.0</b>	<b>51.6</b>	<b>46.6</b>	<b>0.2</b>	<b>1.2</b>		<b>0.4</b>
<b>Orange Walk</b>	<b>10,452</b>	<b>100.0</b>	<b>47.7</b>	<b>49.9</b>	<b>0.7</b>	<b>1.6</b>		<b>0.1</b>
<b>Belize</b>	<b>27,281</b>	<b>100.0</b>	<b>91.5</b>	<b>4.9</b>	<b>0.7</b>	<b>2.5</b>		<b>0.4</b>
<b>Cayo</b>	<b>16,889</b>	<b>100.0</b>	<b>58.3</b>	<b>40.4</b>	<b>0.1</b>	<b>1.0</b>		<b>0.2</b>
<b>Stann Creek</b>	<b>9,074</b>	<b>100.0</b>	<b>65.0</b>	<b>31.9</b>	<b>0.6</b>	<b>2.3</b>		<b>0.2</b>
<b>Toledo</b>	<b>6,538</b>	<b>100.0</b>	<b>27.8</b>	<b>56.8</b>	<b>0.4</b>	<b>14.8</b>		<b>0.2</b>

Additionally, 38.1 percent of households in the country had their toilets outside of their dwelling, and across districts, this proportion ranged from 73.6 percent in Toledo, to 13.4 percent in the Belize District. Country-wide, almost one of every seven households share their toilets with at least one other household. This is perhaps due to some extent to the relatively high number of households that live in barracks that serve the banana and citrus industries. Stann Creek had the highest proportion of households sharing toilets at 19.0 percent, followed by Toledo at 17.2 percent, while the Belize District had the lowest proportion of households sharing a toilet at 11.4 percent.

Table 44 indicates that about one-tenth (11.7 percent) of households in the country have no fixed bathing facility. One out of every five households in Toledo lack this amenity, which is very high when compared to the other districts. Additionally, a quarter of the country's households have their bathing facility outside of their dwelling, and while the proportion in most districts range between 30 and 36 percent, in the Belize District it was only ten percent.

Table 44: Proportion of Households by District and Type of Bathing Facility, Belize 2010

District	Number of Households	Total	Type of Bathing Facility				Not Reported
			Fixed Bath or Shower Inside Dwelling	Fixed Bath or Shower Outside Dwelling	No Fixed Bath or Shower Available		
<b>Country Total</b>	<b>79,492</b>	<b>100.0</b>	<b>62.5</b>	<b>25.0</b>	<b>11.7</b>		<b>0.8</b>
<b>Corozal</b>	<b>9,258</b>	<b>100.0</b>	<b>57.9</b>	<b>33.1</b>	<b>8.1</b>		<b>0.8</b>
<b>Orange Walk</b>	<b>10,452</b>	<b>100.0</b>	<b>52.0</b>	<b>35.3</b>	<b>11.9</b>		<b>0.7</b>
<b>Belize</b>	<b>27,281</b>	<b>100.0</b>	<b>84.0</b>	<b>10.2</b>	<b>4.9</b>		<b>0.8</b>
<b>Cayo</b>	<b>16,889</b>	<b>100.0</b>	<b>57.0</b>	<b>30.0</b>	<b>12.2</b>		<b>0.9</b>
<b>Stann Creek</b>	<b>9,074</b>	<b>100.0</b>	<b>53.5</b>	<b>32.3</b>	<b>13.5</b>		<b>0.7</b>
<b>Toledo</b>	<b>6,538</b>	<b>100.0</b>	<b>23.1</b>	<b>35.6</b>	<b>40.9</b>		<b>0.4</b>

### Water Source

The main source of water for general household use is from the public water supply (Table 45). Stann Creek ranks the highest with 85 percent of its households in this category, followed by the Belize and Cayo districts with 80 percent, while only 61 percent of Toledo households get water from the public supply. Almost six percent of households across the country use water from a well for general household use, however, the rate was as high as 14 percent in Corozal and 11 percent in Toledo. Meanwhile, ten percent of the households in Toledo use water from open sources such as rivers, creeks or springs.

Table 45: Proportion of Households by District and Main Source of Water Supply, Belize 2010

District	Number of Households	Total	Source of Water					
			Public Piped into Dwelling/ Yard Only	Private Piped into Dwelling/ Yard Only	Dug Well	River/ Stream/ Creek/ Pond/ Spring		Other
						Other	Reported	
Country Total	79,492	100.0	77.7	8.0	5.7	2.1	6.4	0.2
Corozal	9,258	100.0	74.8	6.6	14.0	0.1	4.2	0.3
Orange Walk	10,452	100.0	74.2	13.4	7.8	0.6	3.9	0.1
Belize	27,281	100.0	80.0	9.6	3.3	0.6	6.4	0.2
Cayo	16,889	100.0	80.1	3.6	3.6	3.4	9.2	0.1
Stann Creek	9,074	100.0	85.0	6.9	2.1	1.9	3.9	0.1
Toledo	6,538	100.0	61.2	7.4	11.0	10.2	10.1	0.1

Another indicator for measuring progress under MDG 7 is the proportion of the population using an improved source of drinking water. Table 46 indicates that about a half (51.6 percent) of all households reported that their main source of drinking water was purified bottled water. About two-thirds of households in the Belize and Orange Walk districts drink mainly bottled water, while only 13.3 percent of households in Toledo do so. On the other hand, about 30 percent of all households countrywide drink tap water, and this is the main source of drinking water for three-quarters of the households in Stann Creek and 56.7 percent of households in Toledo, compared to 12.1 percent in Corozal. Among Toledo households falling within the “other” category, approximately 17% (out of the 20%) get their drinking water either from a protected dug well, or private catchments.

Table 46: Proportion of Households by District and Main Source of Drinking Water, Belize 2010

District	Number of Households	Total	Source of Drinking Water					
			Piped into Dwelling or Yard	Private Catchment Not Piped	Bottled/ Purified Water	Other	Not Reported	
							Other	Reported
Country Total	79,492	100.0	29.4	12.6	51.6	6.3	0.2	
Corozal	9,258	100.0	12.1	20.0	59.5	8.1	0.3	
Orange Walk	10,452	100.0	13.9	15.7	64.7	5.6	0.1	
Belize	27,281	100.0	15.5	12.9	68.6	2.9	0.2	
Cayo	16,889	100.0	36.0	12.2	45.4	6.3	0.1	
Stann Creek	9,074	100.0	74.7	3.3	16.9	5.0	0.1	
Toledo	6,538	100.0	56.7	9.4	13.3	20.4	0.1	

### Household Lighting

Table 47 shows that the bulk (83.5 percent) of household lighting in Belize is provided by the public electricity company. The Belize District tops this category with 93.1 percent, followed by Corozal with 86.8 percent, while Toledo has the lowest proportion of households using public electricity, at 55.5 percent. Although less than one-tenth of the country's household use sources of lighting other than electricity, almost a third of Toledo's households use other sources of lighting, followed by Orange Walk with 11.8 percent.

**Table 47: Proportion of Households by District and Main Source of Lighting, Belize 2010**

District	Number of Households	Total	Source of Lighting					None	Not Reported
			Electricity from Public Source	Electricity from Private Source	Electricity Drop from Neighbour	Other Sources			
<b>Country Total</b>	<b>79,492</b>	<b>100.0</b>	<b>83.5</b>	<b>2.6</b>	<b>3.8</b>	<b>9.1</b>	<b>0.7</b>	<b>0.3</b>	
<b>Corozal</b>	<b>9,258</b>	<b>100.0</b>	<b>86.8</b>	<b>0.6</b>	<b>4.0</b>	<b>7.7</b>	<b>0.5</b>	<b>0.4</b>	
<b>Orange Walk</b>	<b>10,452</b>	<b>100.0</b>	<b>79.6</b>	<b>2.5</b>	<b>5.2</b>	<b>11.8</b>	<b>0.6</b>	<b>0.2</b>

<b>Stann Creek</b>	<b>9,074</b>	<b>100.0</b>	<b>82.6</b>	<b>2.6</b>	<b>4.2</b>	<b>9.5</b>	<b>0.8</b>	<b>0.3</b>	
<b>Toledo</b>	<b>6,538</b>	<b>100.0</b>	<b>55.5</b>	<b>9.4</b>	<b>2.6</b>	<b>31.2</b>	<b>1.1</b>	<b>0.1</b>	

### Information and Communication

In addition to the basic utilities of electricity and water, Census 2010 also collected data on the availability of cable television service, fixed line telephone service and Internet access in households, and Table 48 provides a summary of the distribution of these utilities.

**Table 48: Proportion of Households with Cable TV, Fixed Line Telephone and Internet Access, Belize 2010**

District	Total	Has Cable TV Service	Has Fixed	Has
			Line Telephone	Internet Access
<b>Country Total</b>	<b>79,492</b>	<b>54.3</b>	<b>22.3</b>	<b>13.6</b>
<b>Corozal</b>	<b>9,258</b>	<b>41.9</b>	<b>19.0</b>	<b>9.4</b>
<b>Orange Walk</b>	<b>10,452</b>	<b>47.5</b>	<b>20.7</b>	<b>8.4</b>
<b>Belize</b>	<b>27,281</b>	<b>74.4</b>	<b>30.6</b>	<b>21.0</b>
<b>Cayo</b>	<b>16,889</b>	<b>48.9</b>	<b>17.8</b>	<b>12.6</b>
<b>Stann Creek</b>	<b>9,074</b>	<b>50.4</b>	<b>21.0</b>	<b>10.8</b>
<b>Toledo</b>	<b>6,538</b>	<b>18.5</b>	<b>8.4</b>	<b>3.4</b>

Just over a half of households in Belize subscribe to cable TV service. The Belize District had the highest proportion of subscribers (74.4 percent), followed by Stann Creek and Cayo with about 50 percent of households, while only 18.5 percent of households in Toledo subscribe to this service. Only 22.3 percent of all households had a fixed line telephone. Across districts, the proportion of households with fixed line telephones ranged from a high of 30.6 percent in the Belize District, to a low of 8.4 percent in Toledo. In terms of Internet access, 13.6 percent of all households subscribed to this service. Again, the Belize District had the highest proportion of subscribers at 21.0 percent followed by Cayo with 12.6 percent, while only 3.4 percent of households in Toledo had Internet service.

## Overcrowding

Among the indicators generally employed in the study of the quality of life of a population is that of overcrowding. One of the measures most frequently used for determining whether overcrowding exists is to calculate the number of persons per bedroom (PPB) in households, and overcrowding may be said to exist if on average there are more than two persons per bedroom.

Census 2010 found that on average, there are 1.8 persons per bedroom in Belize (Table 49). Toledo was the only district with an overall indication of overcrowding, at an average of 2.6 persons per bedroom. The Belize District had an average of 1.5 persons per bedroom, while the other four districts had an average of about two persons per bedroom. At the regional level, rural areas averaged 2.1 persons per bedroom, compared to urban areas with 1.6 persons per bedroom.

**Table 49: Proportion of Households with More than Two Persons Per Bedroom by Major Administrative Area, Belize 2010**

Area	Number of Households	Average Number of Persons Per Bedroom	Percentage of Households with >2 PPB
Country	79,492	1.8	31.7
Rural	40,330	2.1	39.8
Urban	39,162	1.6	23.3
Corozal	9,258	2.0	37.3
Orange Walk	10,452	2.0	38.0
Belize	27,281	1.5	21.6
Cayo	16,889	1.9	32.9
Stann Creek	9,074	1.8	30.3
Toledo	6,538	2.6	54.8

Table 49 further indicates that about a third of the country's households has more than 2 persons per bedroom, with approximately two of every five rural households and a quarter of urban households being overcrowded. More than a half of Toledo households (54.8 percent) were overcrowded, followed by Orange Walk and Corozal at around 38 percent. The Belize District recorded the smallest proportion of overcrowded households, at 21.6 percent.

## Millennium Development Goals: Summary

Figure 12 summarizes those achievements under the MDGs that can be measured using data presented in this report.

Figure 12: Millennium Development Goals Census-Based Summary Score Card, Belize 2010

Goal	Target	Indicator	Score
2. Achieve universal primary education	2.A: Ensure that, by 2015, children everywhere, boys and girls alike, will be able to complete a full course of primary schooling	2.1: Net enrollment ratio in primary education 2.3: Literacy rate of 15 - 24 year olds	92.5 88.1
3. Promote gender equality and empower women	3.A: Eliminate gender disparity in primary and secondary education, preferably by 2005, and in all levels of education no later than 2015	3.1: Ratio of females to males in primary, secondary and tertiary education	0.97 * 1.11 ** 1.55 ***
7. Ensure environmental sustainability	7.A: Integrate the principles of sustainable development into country policies and programmes and reverse the loss of environmental resources 7.C: Halve, by 2015, the proportion of people without sustainable access to safe drinking water and basic sanitation	7.3: Proportion of the population using solid fuels 7.8: Proportion of population using an improved drinking water source 7.9: Proportion of population using an improved sanitation facility	18.8 93.4 96.5
8. Develop a global partnership for development	8.F: In cooperation with the private sector, make available the benefits of new technologies, especially information and communications	8.16: Internet users per 100 population	28.2 †
Adequate shelter for all	Provision of sufficient living space and avoidance of overcrowding (United Nations Conference on Human Settlements, [Habitat II], 1996)	Average number of persons per room	1.1 ‡

\* Primary education  
\*\* Secondary Education  
\*\*\* Tertiary Education  
† Population five years and older

## RECOMMENDATIONS

# Recommendations

## SOME POLICY IMPLICATIONS AND RECOMMENDATIONS, AND PLANS FOR MORE DETAILED ANALYSIS

Census results are “the sine qua non of evidence-based decision-making at all levels” (UN, 2007), and provide a framework within which to monitor our development progress as a country. In order to maximize on the considerable investment made in financing the population and housing census, the results of the exercise must, of necessity, be incorporated into any policy formulation and implementation exercise being undertaken by stakeholders in Belize. These stakeholders include, but are not limited to, the Government of Belize, the business sector, academia, and social partners such as non-governmental organizations and regional and international bodies.

In addition to the raw data produced regarding the demographic and socio-economic circumstances of all persons living in Belize, the census data provide a framework within which to make decisions regarding areas/topics requiring in-depth studies and analyses, especially as it relates to population projections and social issues. This section of the report therefore attempts to highlight some areas for urgent attention, based on the foregoing findings of the 2010 Population and Housing Census, and it should be noted that this section is by no means exhaustive.

### **Population Change**

The size, composition and distribution of a country’s population, and the way these attributes have been changing and are expected to change, must be one of the key building blocks upon which national decisions are based. This is so as trends in the way the population changes have implications for the provision of adequate social services such as education and health care, the creation of employment and public safety, as well as for the prescription of measures to be instituted to minimize environmental impact and promote sustainable development.

### ***National Population Policy***

The combined results of the last three censuses conducted in Belize indicate that the population doubled in less than 30 years, and that if the current pattern of growth continues, the population will again double in 26 years. The most urgent question arising out of this finding for policy makers is, whether this outcome is what is best for the country of Belize. In formulating a response to this question, consideration must be given to the far-reaching impacts of a rapidly growing population, such as the increased pressure on renewable and non-renewable resources, climate change, food security, and the provision of employment and basic social services (UN, 2010).

To assist in formulating a response to this very pertinent question, it is recommended that the Government revisits and provides resources to support the development, adoption and implementation of a National Population Policy (NPP) for Belize.

The NPP will provide a comprehensive statement of the ideal demographic trends that will contribute to sustainable development in Belize, and a roadmap of goals through which these objectives will be achieved. It is the foundation upon which all other policies, both economic and social, aimed at directly affecting the quality of life of the inhabitants of Belize should be based. Additionally, the NPP will act as a catalyst in the effective implementation of the provisions of existing development plans and policies such as Horizon 2030, the National Health Policy, the National Gender Policy, the National Policy on HIV/AIDS and the National Policy for Older Persons.

Implementing this recommendation will require:

1. Contracting the services of a Consultant Demographer to guide the formulation process and the activities of the National Population Policy Task Force, to report on the Task Force's progress and to document the final output of the exercise for adoption by Cabinet;
2. The formation of a National Population Policy Task Force, which will comprise stakeholders from all sectors of society, including civil society. The main objectives of the Task Force will be:
  - i. to access and examine data on the factors of population change and on the myriad socio-economic factors impacting the state of the nation's population;
  - ii. to reach a consensus on the ideal size and quality of a stable population for Belize; and
  - iii. to formulate and outline the specific goals to be undertaken to achieve this stable population.
3. An in-depth study of trends in the main components of population change (Fertility, Mortality and Migration) to be undertaken by the Statistical Institute of Belize. These results, in addition to sector studies to be undertaken by the Task Force, will provide the bases for decisions informing the goals emanating out of the National Population Policy;
4. Updating of the National Population Projections for the next 50 years, to be undertaken by the Statistical Institute of Belize.

It is also recommended that the National Population Policy Task Force be supported by a secretariat, situated within the Statistical Institute of Belize.

### ***Urban-Rural Designation***

At present, all areas in Belize that have been officially designated towns or cities are classified as urban, while all other areas including villages and settlements are classified as rural. The designation of an area as a city, town or village is currently effected via administrative decree, through the issuance of a Statutory Instrument.

The census results suggest that the country is experiencing a process of reversed urbanization, with the rural population growing at a faster rate than the urban population. Upon closer examination of the population of villages in the various districts, we see, for example, that several of these villages have populations in excess of 3,000 persons. Internationally, in addition to the size of the population and the relatively rapid rate of population growth occurring in an area, other criteria considered in distinguishing urban from rural areas include, but are not limited to, access to utilities and the level of participation in agriculture (both fishing and farming).

The Statistical Institute of Belize will therefore, with input from stakeholders such as the Ministry of Natural Resources and Agriculture, and in keeping with the recommendations of the National Land Use Policy, embark on the development of a specific set of criteria upon which the designation of areas as urban will be based. Going forward, this re-designation activity will be one of the outcomes of the population and housing census.

### **Language**

With 63 percent of the country's population speaking English well enough to have a conversation and approximately 57 percent speaking Spanish at this level, perhaps it is time for the Government of Belize to examine the issue of designating an official second language. Across districts, the maximum proportion of the population speaking English is about three in every four, compared to Spanish, which is spoken by almost nine of every ten persons in some areas. This brings to mind one of the proposals of Horizon 2030, for the creation of "One Belize for All – Un Belice para todos" (Barnett, Catzim-Sanchez & Humes, 2011), which speaks to the concept of instituting changes in the way we do things, which will contribute to the garnering/strengthening of the population's sense of belonging and patriotism.

### ***Spanish as Belize's Official Second Language***

The Government of Belize might want to consider establishing Spanish as Belize's second language. To assist this effort:

1. Policy should be formulated to make learning Spanish as a second language a mandatory component of all Teacher Education Programmes, with credit being given to students who are already fluent in the language and are able to satisfy testing requirements upon entry into the Programme. This will facilitate the academic support of students in the classroom who are native Spanish speakers.
2. To garner the support of the University of Belize, the only institution offering Teacher Education Programmes, it may be prudent to offer some form of incentive (such as the requirement to have their programmes re-accredited), in order to have this change instituted within a specified time-frame.
3. Teachers already trained and in the system may be offered an incentive as part of their annual performance evaluation to embark on a course to become a certified Spanish teacher.
4. The teaching of Spanish as a second language should be instituted as part of the regular primary school curriculum, in such a way to ensure that by the end of Standard Six, all students are able to have a conversation in Spanish. Bearing this aim in mind, it will not be necessary to include Spanish as a component of the Primary School Examinations (PSE).
5. To support the teaching of Spanish as a second language, the teaching staff of all primary schools should be supplemented by enough Spanish teachers to support the number of enrolled students.

### ***Teaching English as a Second Language***

With less than a half of the population under the age of ten years reporting that they speak English well enough to have a conversation, there is the implication of an adverse effect on learning outcomes for children in this age group. It is therefore recommended that:

1. Further to the recommendation in the Belize Education Sector Strategy 2011 - 2016 (Appendix A - Strategies 2.5.10 to 2.5.12), a study should be undertaken by the Ministry of Education, to determine whether there is any correlation between the learning outcomes of children four to nine years old and their ability to speak, understand and write English (Oluwole, 2008; Felber-Smith, 2009).
2. If the study confirms that children who are better at speaking English achieve more desirable learning outcomes than their counterparts who, for example, have Spanish as their first language, then it is recommended that consideration be given to instituting the teaching of English as a second language in primary schools.

### **Education**

#### ***Secondary Education***

Having only about three-quarters of secondary school-aged children enrolled in formal school at Census 2010 should alert policy makers that at least a guaranteed one-quarter of the population will not be contributing to the improvement of Belize's human capital in the immediate future. While these persons may well be able to acquire some form of gainful employment, it is clear that this will most likely be at the elementary level, as they will not meet the minimum educational requirements demanded by employers in many industries. Additionally, the greater the proportion of 14 to 16 year olds that are in school, the lower the number of youths in the labour force will be, which will in turn have a direct positive effect on the country's unemployment rate.

To contribute to the improvement of the quality of Belize's human capital, it is recommended that education in general should become an area of even higher priority and investment for the Government of Belize.

1. Although intuitively it may be concluded that these children are not attending school because of a lack of financial resources, it is important that the Ministry of Education undertake a formal study to determine why a quarter of the population 13 to 16 years old are not enrolled in school.
2. The Government should revive its 'stay-in-school' public education campaign, targeted mainly at parents/guardians to promote the benefits of ensuring that children attend the entire course of secondary school, with emphasis on the fact that the opportunity cost of keeping a child in secondary school is far outweighed by the benefits to be achieved.
3. To demonstrate support for the 'stay-in-school' agenda, the Government will need to ensure that every village has ready access to a secondary school, whether through proximity or free transportation. Government should also ensure that each of these schools has a school-feeding programme and a text-book programme in place.
4. Furthermore, this intervention will have a direct positive impact on the country's literacy rate, which indicates that one-fifth of the population have not completed the Standard Five level of education.

### ***Early Childhood Education***

Early childhood, the most important period in the development of children's mental functions, "is now known to be greatly influenced by exogenous factors including the nature of the educational environment to which the child is exposed during the first six to eight years of life" (Bowman, Donovan and Burns, 2001). With only 27 percent of two to four year-olds enrolled in formal school at 2010, there is a need for the Government to foster partnerships which will enable the majority of the nation's children to access early childhood education.

1. It is recommended that greater emphasis be placed on realizing Section 1 of the Ministry of Education's Action Plan 2005 – 2010 in its entirety, which stated one of its expected outcomes (to date unrealized) as "increased preschool enrollment to 50% of the age cohort" by 2010 (See Appendix B). The new deadline for achieving this objective should be set at 2020. This should be in conjunction with Strategies 1.1.1 to 1.1.4 of the Belize Education Sector Strategy 2011 - 2016 (Appendix A).
2. In support of the recommendation at 1 above, and in recognition of the importance of early childhood education in increasing children's level of readiness to learn, a greater portion of the Ministry of Education's budget, with the support of the Government of Belize, should be applied to this area.

## Household Utilities

### ***Water and Lighting***

The Government of Belize, through the electricity and water distribution companies, has an obligation to the people of Belize to ensure that all households have access to a safe and affordable source of electricity, and to piped, potable water, as these are crucial elements in determining the quality of life of the population. It is imperative that these entities incorporate the results from the Census into their expansion plans for the next planning period, to correct deficiencies in the distribution of these very vital utilities. Attention is most urgently drawn to the Toledo District, where less than two-thirds of households have access to piped water, and just over a half of households have access to electricity.

It is therefore recommended that the Government of Belize, in cooperation with the utility companies, continue making the provision of potable water and safe lighting for all, a priority in future budgets.

### ***Sanitation***

Although only a relatively small proportion of households are currently without an improved sanitation facility, it is recommended that providing basic sanitation for all should remain an item of high priority for the government, mostly because of the serious health implications inherent in the situation. Many diseases associated with the lack of adequate basic sanitation, such as cholera, diarrhea and worm infestation, by nature tends to start with small children and are communicable, thus making epidemics a very real possibility.

## EXCERPT: BELIZE EDUCATION SECTOR STRATEGY 2011 - 2016

1

GOVERNMENT OF BELIZE  
 MINISTRY OF EDUCATION AND YOUTH  
 POLICY AND PLANNING UNIT

BELIZE EDUCATION SECTOR STRATEGY  
 2011-2016

*To be implemented in the five school years 2011/2 to 2015/16*

SUMMARY FRAMEWORK

NOTES

Each output has an OUTPUT OWNER, an individual who will assume overall responsibility for planning and coordinating activities as well as monitoring and reporting on progress against the targets for that specific output.

Each strategy has the RESPONSIBILITY for action allocated in squared [] brackets. The first entry in each bracket is given in bold and underlined. This denotes the LEAD responsibility. Subsequent entries also have responsibilities under that lead.

## POLICY OBJECTIVE 1:

### INCREASE EQUITABLE ACCESS AT ALL LEVELS OF EDUCATION

Policy objective  
indicators:

Net Enrolment Rates (by gender, district, urban/rural)  
Completion rates (by gender, district, urban/rural)

Outputs	Targets by 2016	Strategies [Responsibility]	Source/verification
1.1 Expand access to Pre-School Education (3-4 yr olds)	1.1.1 Reach 50% GER in both rural and urban areas of each district <sup>1</sup> .	1.1.1 Using mapping model, undertake detailed mapping exercise in each district to determine supply and demand, results of which will provide basis for expansion. [DM, MA]	DEC Access and Infrastructure Masterplan
		1.1.2 Attach pre schools to existing primary schools prioritising the most needy, least well served locations based on socio-economic and poverty/deprivation indicators [DM, MA, MOEY]	DEC Annual workplans
		1.1.3 Encourage and facilitate the establishment of community and private pre-schools, prioritising the most needy, least well served locations based on socio-economic and poverty/deprivation indicators [DM, MA, MOEY]	Register of Schools Approval of licence of school EMIS reports
		1.1.4 Establish new separate pre-schools in remote rural communities where attachment to primary school is not an option. [DM, MA, MOEY]	MOEY Pre-School Unit
1.2 Increased enrolment and completion at primary level	1.2.1 100% NER in both rural and urban areas of each district	1.2.1 Primary schools work with PTAs and community to identify out of school and neediest children and provide awareness and sensitisation to enrol missing	DEC Access and Infrastructure Masterplan

<sup>1</sup> Focus will be on rural areas as most urban areas are close to or above the target. [Is there any difficulty about rural/urban boundary definitions? Dispute potential?]

2.4 Increased number of appropriately certified teachers at all levels	2.4.1 All newly qualified teachers engaged in appropriate induction	2.4.1 Continue to apply incentives to ensure all teachers successfully complete a recognised training programme. <b>[MA, DEC]</b>	Register of Programme
	2.4.2 Percentage of teachers in each district with full licence (appropriate to the level at which they are teaching)	2.4.2 Utilise nationally the licensing framework to award full licence at all levels <b>[TSC]</b>	Specifications for approved TE programmes
<b>Output Owner:</b> <b>TEDS</b>	25% at pre-primary level,	2.4.3 Develop and implement induction programme for Newly Qualified Teachers for pre-primary and secondary teachers <b>[TEDS, DEC, MA, School Principals]</b>	Programme Monitoring Reports
	75% at primary level,	2.4.4 Strengthen and formalise the induction programme for Newly Qualified Teachers at the primary level. <b>[TEDS, DEC, MA, School Principals]</b>	TSC Annual Report
<b>Output Owner:</b> <b>QADS</b>	50% at secondary level	2.4.5 Restructure the teacher service to create clear career pathways offering enhanced opportunities for specialisation and senior positions based on actual performance. <b>[CEO, TEDS]</b>	TEDS Annual Report
	2.4.3 At least 50% of teachers teaching SaT in all institutions are professionally qualified	2.5.1 Evaluate relevance and delivery of existing curriculum, including language, SEN and science and technology. <b>[QADS, SFRTF, BAPPS]</b>	Observational data from supervision reports
<b>Output Owner:</b> <b>QADS</b>	2.5.1 All schools assessed as performing at satisfactory level or above on the National Quality Schools Framework (see 3.4.2) in area of curriculum delivery, pedagogy and student achievement.	2.5.2 Develop series of desired learning outcomes for all stages (grades/years) and subject areas of curriculum, and disseminate to all schools <b>[QADS]</b>	Curriculum guides in place
	2.5.3 Review existing curriculum guides in terms of their relevance, value to and use by teachers and update as necessary to include improved adherence to agreed learning outcomes (2.5.2) as well as a more diversified and learner-centred curriculum delivery that supports all students in raising	2.5.3 Review existing curriculum guides in terms of their relevance, value to and use by teachers and update as necessary to include improved adherence to agreed learning outcomes (2.5.2) as well as a more diversified and learner-centred curriculum delivery that supports all students in raising	Supervision reports from DECs, Curriculum document

achievement [QADS]	School based data
2.5.4 Provide training to teachers in the use and localisation <sup>5</sup> of curriculum, and assessment, during in service training [QADS, DEC]	Surveys
2.5.5 Introduce more practical experiences and early technical and vocational opportunities into the existing primary curriculum in order to build pupils' skills, aptitude and appreciation of practical subjects. [QADS, ETES]	Curriculum documents NQF document
2.5.6 Provide training to school leaders in the support and monitoring of more effective and localised curriculum delivery. [TEDs, DECs]	CSEC reports
2.5.7 Provide training to teacher educators in the use of curriculum guides and the more effective delivery of curriculum, including its localisation [TEDs, DECs]	
2.5.8 Monitor the effective delivery of curriculum in schools, including teachers' ability in formative assessment of pupil progress. [DECs, MAS]	
2.5.9 Review the PSE and look to improve its utility to provide consistent year on year achievement data [QADS]	
2.5.3 Revised secondary curriculum based around core and options adopted in all secondary schools and ITVETs	
2.5.2 Appropriate language support programmes in place in all schools.	
2.5.10 Undertake a national survey into the status of learners' English Language proficiency, using school based data; the status of instructional programmes; and the impact English proficiency has on overall	

<sup>5</sup> Localisation here refers to the capacity of teachers to adapt the curriculum to both the particular social, cultural and economic context of learners as well as the interests and ability range of learners

levels of achievement. [QADS]

2.5.11 Develop a primary language policy [PPU]

2.5.12 Develop programmes, including training and materials, to support schools and teachers develop learning programmes and classroom approaches in accordance with policy. [QADS, TEDS, ESS]

2.5.13 Standardise the high school curriculum around core subjects and options, including technical and vocational options. [QADS]

2.5.14 Develop series of desired learning outcomes for all stages (grades/years) and subject areas of curriculum, and disseminate to all schools [QADS]

2.5.15 Provide support and training to school principals and teachers in student assessment and monitoring of student learning against agreed learning outcomes. [TEDS]

2.5.16 Improve alignment and equivalence between secondary and TVET programmes, and promote the movement between, and pursuit of concurrent courses in, High School and TVETS. [QADS, ETES, ITVET, HS]

2.5.17 Establish a National Qualifications Framework, with levels of attainment and competencies defined at each stage/level. [QADS]

1.3.12 Develop and introduce a standardised National Secondary School Certificate. [QADS]

1.3.13 Ensure all Form 4 are supported to sit core CSEC examinations. [MA, SP]

6.1.1 Develop a comprehensive Human Resource Development Strategy based on a Labour Market

6. Improve the quality and relevance of

6.1 Drop out from ITVETS reduced to maximum 10% in

# MINISTRY OF EDUCATION ACTION PLAN 2005 – 2010

The various consultations before and during the National Education Summit yielded hundreds of recommendations. These recommendations made it very clear that the Ministry of Education would need to take bold and decisive steps to reshape the education system to allow for delivery of innovative ways to meet Belize's education needs for the 21st century. Working committees comprised of Ministry personnel and experienced educators were assigned the task to review the recommendations and organize them into an implementation plan that would guide the Ministry's activities over the next decade. From the review the following areas emerged as key action areas:

1. Early Childhood Education and Development
2. Teacher Training
3. Adult and Continuing Education
4. Curriculum and Assessment
5. Technical and Vocational Education
6. Special Education
7. Higher Education
8. Policy Development

A detailed plan of action was further developed by each working committee to outline the most effective strategies to address change in these areas. Whereas the detailed plans covered a period of ten years, from 2005 to 2015, the Ministry's working document which is produced below will address a five year period. This approach was taken to allow for more detailed documentation of the Ministry's five year plan of action. The original document produced by the Summit working committees will be reproduced and kept in the Ministry for future reference beyond the 2005-2010 period that the action plan covers.

## 1. Early Childhood Education & Development

The period of early childhood is that period of a child's life that spans from age zero to eight years. The education system has traditionally given far from sufficient attention to this most important phase in children's development. There is urgent need to increase access opportunities and quality of education at this critical stage of children's development. The action plan seeks to address both these concerns in order to bring about meaningful change in this area.

Although the action plan mostly addresses activities relating to preschool education, it also seeks to strengthen the links in the three stages of early childhood. Meaningful connections are initiated with the first stage of early childhood from birth to three years, the preschool years, and the later stage of early childhood which includes the transition from pre to primary school. Emphasis is also placed on initiating and maintaining strong links with other sectors addressing early childhood issues

## APPENDIX B

### EXCERPT: MINISTRY OF EDUCATION ACTION PLAN 2005 - 2010

Goal	Activities by 2005 - 2010	Timeline		Expected Outcomes	Responsible Agency	Measurable Outcome
		Start Date	End Date			
1. Creating access	1. Support attachment of preschools to primary schools in all districts  2. Pay salaries for all preschool teachers in licensed preschools  3. Construct/support construction of preschools where none exist  4. Establish Summer Preschool experience Program in all districts	April 2004	2010	• Cost of preschool education reduced by 50%  • Guarantee retention of trained preschool teachers	GOB/MOE/ Partners	• Increased preschool enrollment to 50% of age cohort  • Increase retention rate for trained preschool teachers to 100%, excluding natural attrition
2. Enhancing quality	1. Establish and resource a specialized Unit – <i>Early Childhood Education and Development Centre</i>  2. Train & certify 50 % of preschool teachers  3. Complete curriculum development & implement in all preschools  4. Ongoing monitoring of preschools countrywide by district supervisory teams	April 2005  July 2005  August 2005  August 2005  Sept. 2005	2010  Ongoing  Ongoing  Ongoing  Ongoing	• Equal opportunity for access to preschool experience  • Every child given an opportunity to receive readiness preparation for entrance to primary school	GOB/Managing Authorities/ NGOs  MOE/ ECEDC	• Increased access to additional 25% minimum  • Readiness opportunity available to all children
				• Greater efficiency and effectiveness in service delivery  • Improve quality of preschool experience	MOE  ECEDC	• Centre with appropriate staff and equipment  • 50% of preschool teachers trained and certified
				• Promote standardization  • Increase accountability	ECEDC/QADS/ DECs	• Standardized preschool curriculum in all preschools

	5. Training workshops to aid transition from pre to primary school	Aug. 2005	Ongoing	• seamless transition from pre to primary level	ECEDC/QADS	• Eliminate repetition at lower primary
		Sept. 2005	June 2006	• Evaluation of system performance at preschool and lower primary levels	ECEDC/Exams Unit/ QADS/ Pilot Schools	• Performance data available
3. Accountability Measures	1. Complete development and ratification of preschool policy	Ongoing	April 2005	• Establish legal framework for operation of preschool	ECEDC/MOE	• Policy for Early Childhood Education and Development
	2. Operationalize rules and procedures in all preschools	Sept. 2005	Ongoing	• Standardization	MOE	• All preschools equipped with MOE rules and procedures for early childhood education
	3. Register, license and publish all recognized preschool centres	April 2005	Aug. 2005	• Increased accountability	MOE	• Register of Licensed preschools
	4. Establishing Linkages	1. Inter-ministerial cooperation/collaboration in health and childcare initiatives	April 2005	ongoing	MOE/MHD/MOH	• increased dialogue and collaboration on early childhood issues across ministries
		2. regional and international collaboration	ongoing	• Sharing of resources • Strengthened partnerships	ECEDC	
				• Maintaining currency • opportunity for professional development		
5. Parental Involvement	1. Institutionalize training for parents of preschool children	Aug. 2005	ongoing	• increase knowledge • greater and more effective home support	ECEDC/MHD	• organized training • workshops for parents of preschool children

## LISTING OF HOUSEHOLD MEMBERS

First, we will be listing your household members. Household members are persons who usually sleep at least 4 nights per week and share a daily meal with the household.

Please give me the names of all household members, including those persons who are temporarily elsewhere. Kindly begin with the head of the household and then give me the names of the other members in order of age, from the oldest to youngest.

## INTERVIEWER: CIRCLE THE PERSON NUMBER(S) OF THE PROVIDER(S) OF THE INFORMATION

## SECTION 1 HOUSING

1.12: What is your household's main source of drinking water?

- Public piped into dwelling
- Public piped into yard only
- Private piped into dwelling or yard
- Public standpipe
- Tanker truck
- Protected dug well
- Unprotected dug well
- Private catchments, not piped (vat, drum, water tank, etc.)
- River/Stream/Creek/Pond/Spring
- Bottled/Purified water
- Neighbour
- Other (specify) \_\_\_\_\_
- DK/NS

1.13a: What type of toilet facility does your household usually use?

- Flush toilet linked to BWS sewer system
- Flush toilet linked to septic tank
- Pit latrine, ventilated and elevated \_\_\_\_\_
- Pit latrine, ventilated and not elevated \_\_\_\_\_
- Pit latrine, not ventilated and not elevated \_\_\_\_\_
- Pit latrine, elevated and not ventilated \_\_\_\_\_
- Other (specify) \_\_\_\_\_
- None (e.g. bucket, bush) \_\_\_\_\_
- DK/NS \_\_\_\_\_

→ SKIP TO 1.13c

→ SKIP TO 1.14

1.13b: Is that toilet indoor or outdoor?

- Indoor
- Outdoor
- DK/NS

1.13c: Is that toilet shared with any other household?

- Yes
- No
- DK/NS

1.14: What type of bathing facility does your household usually use?

- Fixed bath or shower inside dwelling
- Fixed bath or shower outside dwelling
- No fixed bath or shower available
- DK/NS

1.15: What is the main source of lighting for your household?

- Electricity from BEL
- Electricity - Private generator
- Electricity - Solar energy
- Electricity "drop" from neighbour/other source
- Kerosene lamp/Gas lamp
- Candle
- Other (specify) \_\_\_\_\_
- None
- DK/NS

1.16: How many rooms does your dwelling have?

<input type="radio"/>	<input type="radio"/>	DK/NS							
<input type="radio"/>									

1.17: How many bedrooms does your dwelling have?

<input type="radio"/>	<input type="radio"/>	DK/NS							
<input type="radio"/>									

1.18: How many of the following appliances or equipment does your household own and have in working order?

[READ ALL OPTIONS]

4+ DK/NS

- a. Air conditioner
- b. Refrigerator
- c. Microwave oven
- d. Washing machine
- e. Stove (Gas/electric/solar)
- f. Radio/stereo
- g. DVD player
- h. Portable MP3/Media Player
- i. Television set
- j. Electrical generator
- k. Mobile/cellular phone
- l. Computer
- m. Private motor vehicle

1.19: Does your household have...

[READ ALL OPTIONS]	Yes	No	DK/NS
a. Cable TV service	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
b. Fixed line telephone	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
c. Internet access	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
